IBM IoT Exchange
Maximo Academy

July 23–24, 2019 | Hilton Sydney

Unlock new value from data with AI for Assets and Operations Management

Join practitioners, subject matter experts (SMEs) and innovators at Maximo® Academy to extend your asset management skills. Learn how to apply solutions to gain end-to-end support for your industrial Internet of Things, thereby allowing you to optimise operations with enterprise asset management, improve equipment operations with asset performance management and expand the aperture to get the full scope of factory floor insights for enhanced production optimisation.

Topics include:
– Client use cases and best practices
– Implementation, deployment, configuration
  and upgrades
– Predictive maintenance, worker safety and
  next-gen analytics
– Blockchain, A/R and AI innovation
– IBM Maximo Products and Technology

Watson IoT™
