06 October 2022
10:00 AM CDT

IBM Turbonomic Application Resource Management

Join us to learn how you can simultaneously assure application performance, minimize costs, and eliminate cloud and infrastructure waste!

In this session you will learn how to:

- Unlock the true potential of cloud native and application modernization investments
- Achieve performance goals in a way that is both financially and environmentally sustainable
- Leverage cloud optimization decisions to ensure a superior digital experience for your customers
- Drive desired business outcomes while providing a better end-user experience

Location:
IBM – Houston
315 Capitol Street, Houston, TX 77002
