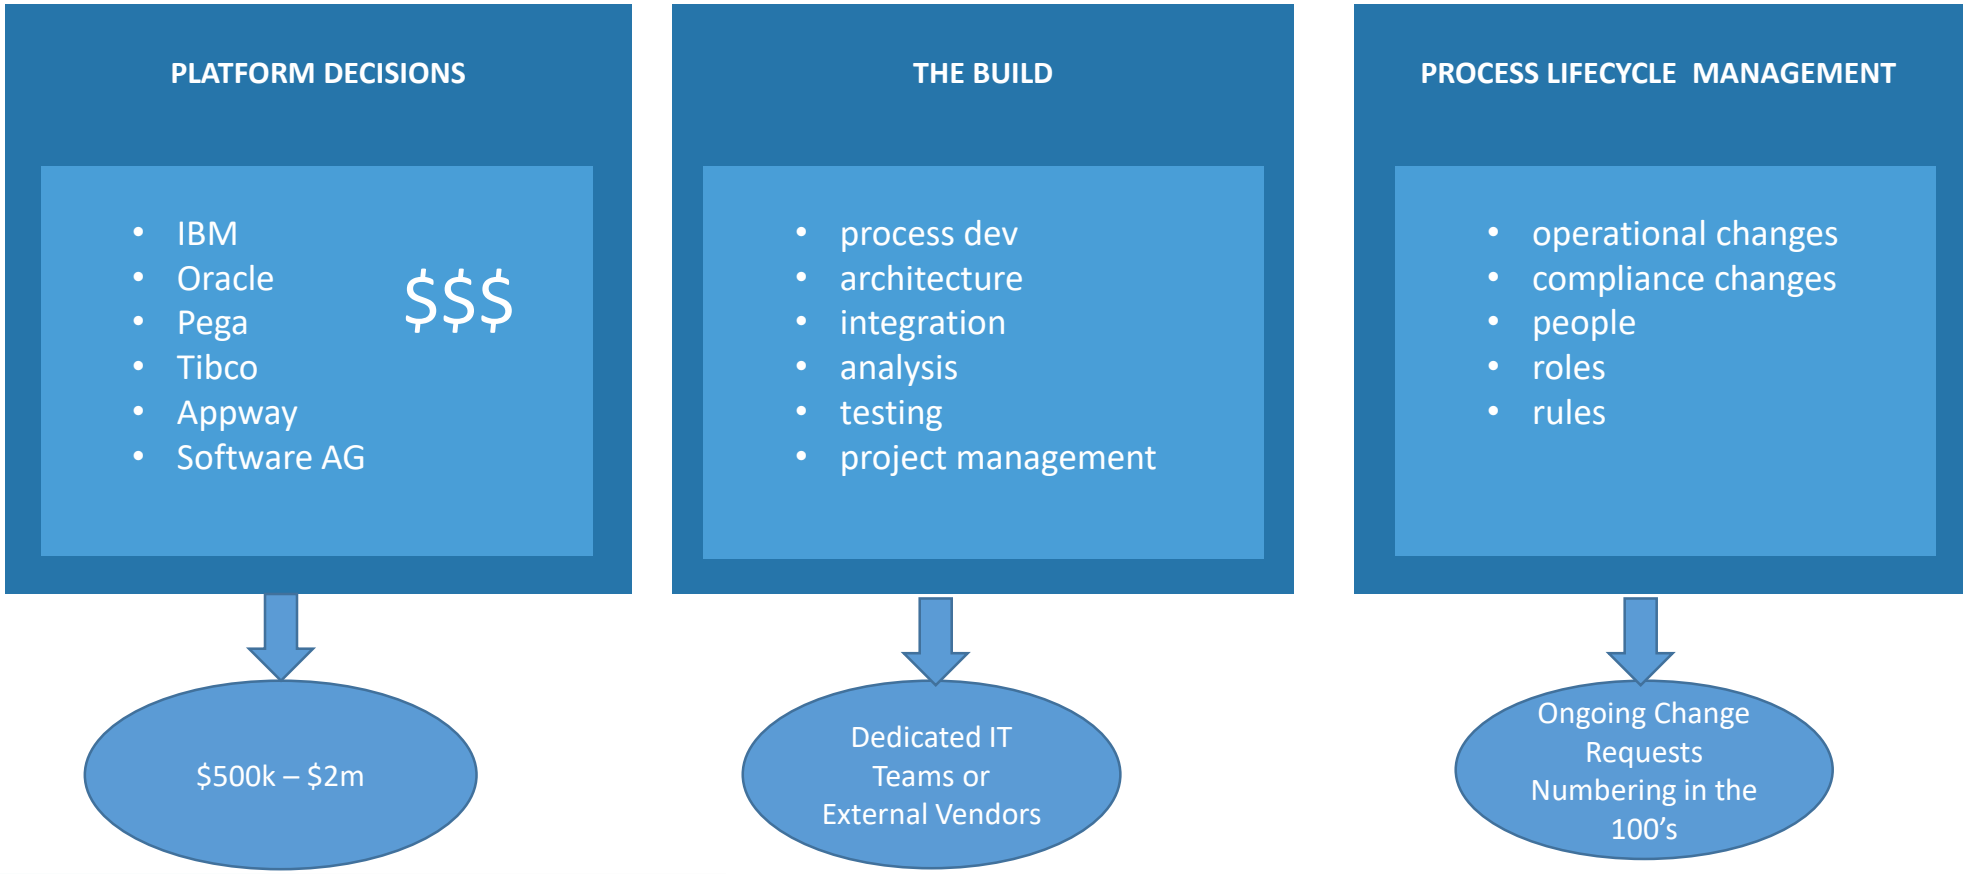
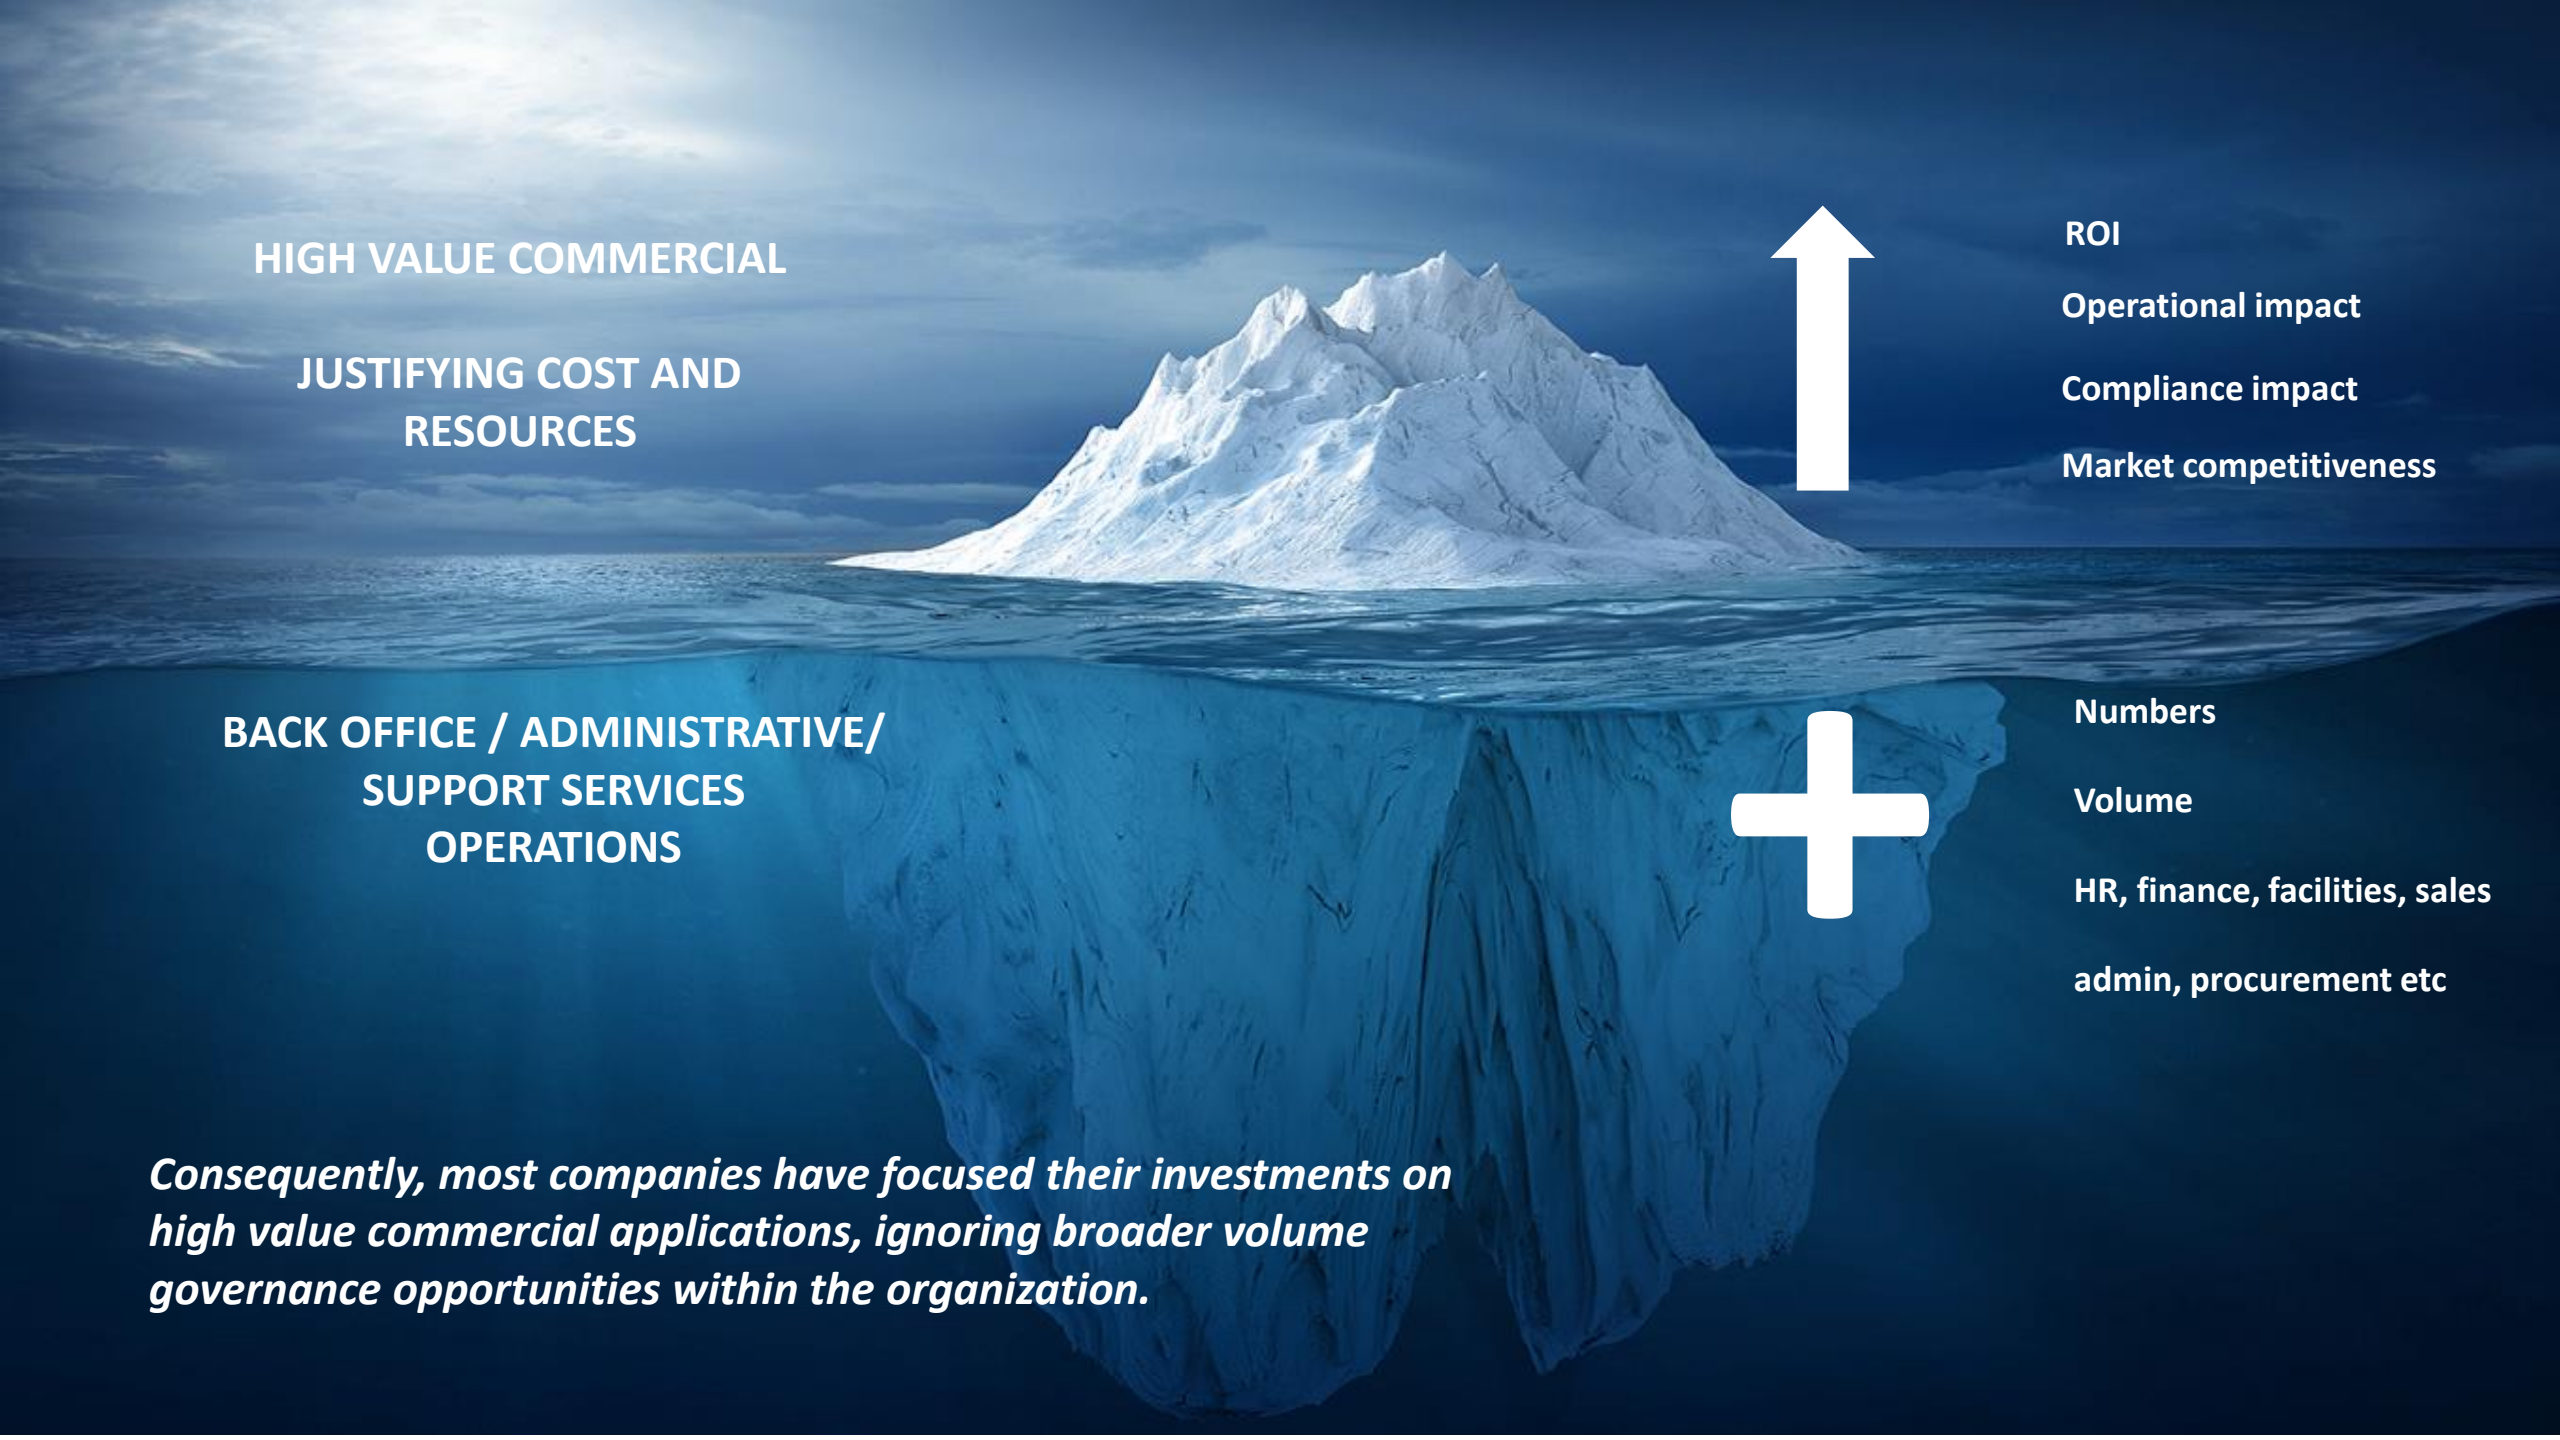
Why BlueFabric?

Considerations for Process Automation



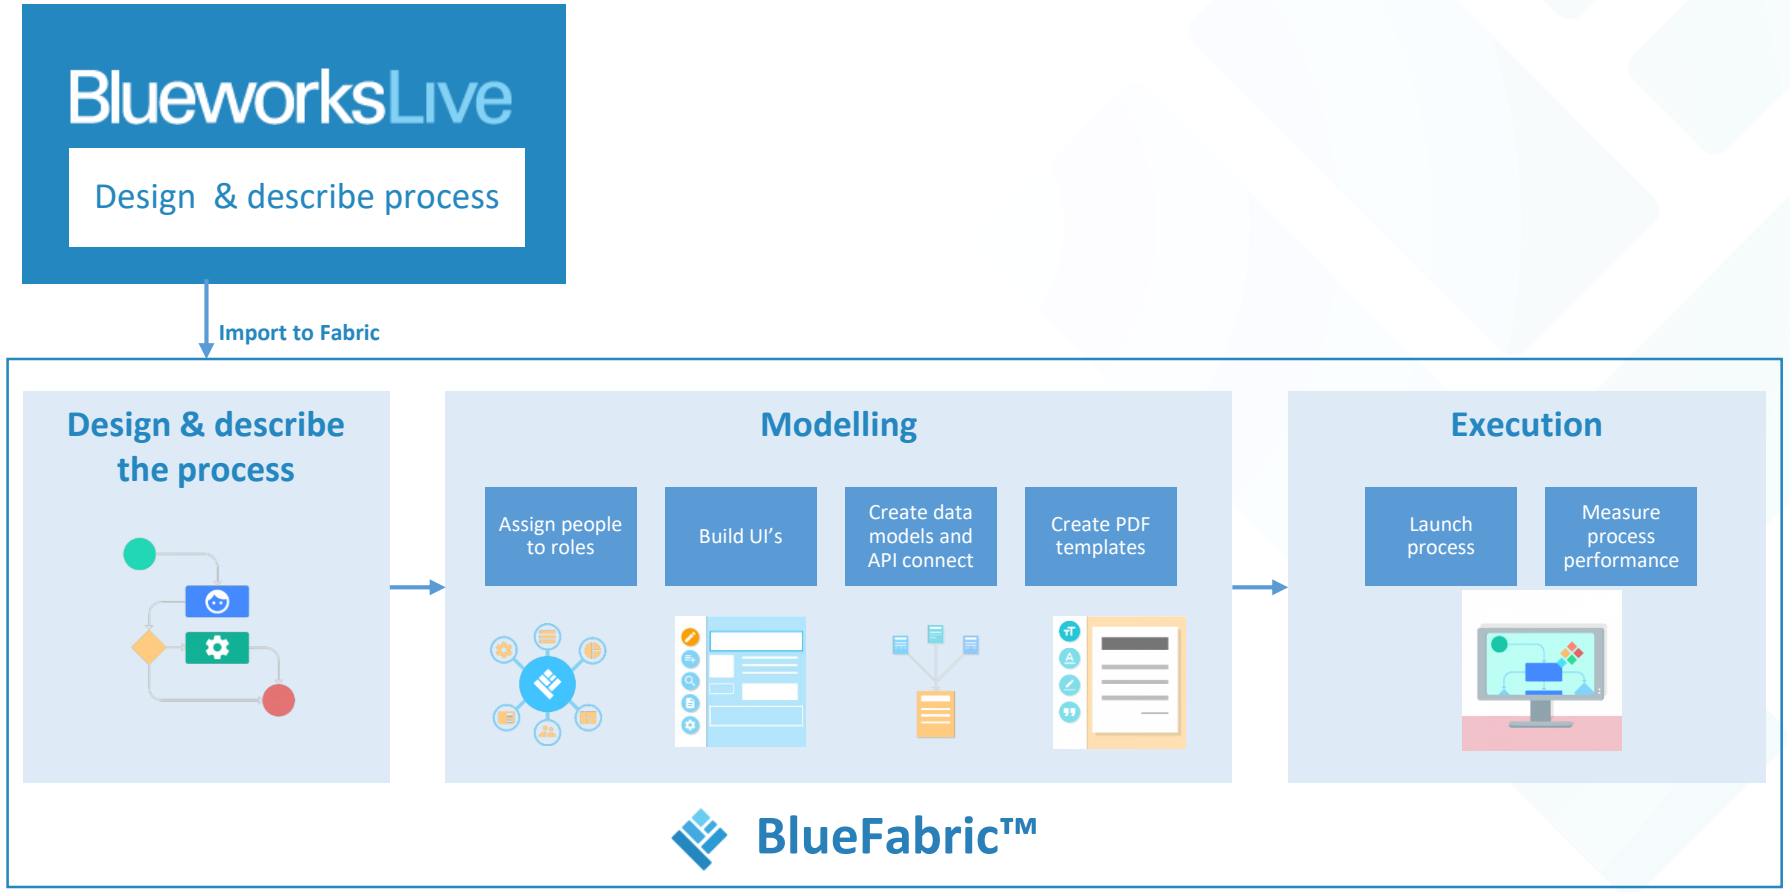


Consequently, most companies have focused their investments on high value commercial applications, ignoring broader volume governance opportunities within the organization.

This long time market gap can now be served with BlueFabric™

BlueFabric is a revolutionary way of **automating volume processes in house**, without the need to code.

Business owners can model and run a pre-defined process **within hours and at minimal cost**.



BLUEFABRIC

BPM Native vs. Fabric

What do you eliminate?

Need to hire, train or allocate specialized developers

Coding, Coding, Coding

UI Dev, List of Values, Rules, Data Models, App Specific Integration, DB Setup

Cost and resource overhead associated with Process Lifecycle Management

Long and protracted testing cycles

Long drawn out technology evaluation cycles

Delays in automating for operational value

BLUEFABRIC

The value of Fabric

Removes the bottlenecks in delivery of business apps that moves my company's profitability and competitive position forward, while ensuring capital expenditure is utilized effectively.

Senior Managers

IT Architects

Increase volume of output to internal customers, while keeping internal overhead costs in control and maintaining standards around sanctioned software use.

Partners

Generate a new level of value within my clients businesses, increase the volume of output for my customers and deliver accelerated business transformation. And do so without the challenge of sourcing and training more specialized development resources.

Business Managers and Specialists

Create apps that respond to your group's business needs, quickly, for operational impact and KPI achievement.

BLUEFABRIC PLATFORM

An exciting platform for further simplifying a client's process automation needs, while building continually increasing value across the entire global fabric user community.

PROCESS CONTENT

Process content will be developed by **IBM business partners** and independent developers, who can publish their process developments on Fabric for global commercial consumption

BUSINESS PROCESS

Comprised of best in class business process applications across common horizontal business

CLIENTS

Fabric client subscribers will be able to test, evaluate and pull down for use, ready built processes from this community seamlessly without changing their Fabric pricing agreements
