### Cloud Masterclass 2023

# Growing Cloud Consumption with Desktop as a Service (DaaS)

Date: May 25, 2023

Brady Ranum, VP of Solution Advisors, Dizzion

Prem D'Cruz, Product Manager IBM Cloud

# Agenda

- 1. Why the need for Desktop as a Service (DaaS)?
- 2. What is DaaS?
- 3. What are the top use cases?
- 4. How to engage with us

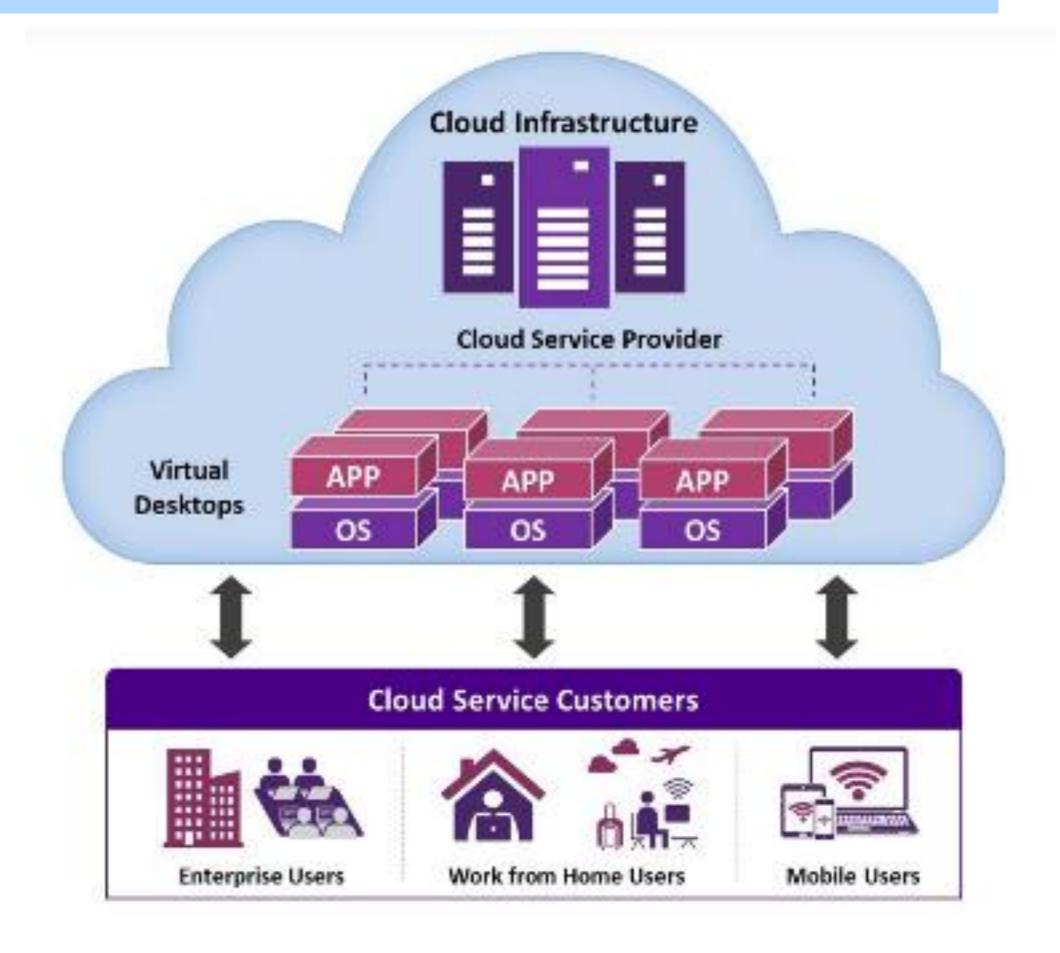

## Market Landscape

#### MARKET OPPORTUNITY

- DaaS projected to reach \$17.8 billion in 2029 with a CAGR of 18.1%\*
- By 2024, 80% of virtual desktops served to remote users will be DaaS, up from fewer than 30% today\*\*
- DaaS is being adopted by customers new to desktop virtualization or new users within existing desktop virtualization customers\*\*
  - \*Future Market Insights Aug 2022

    \*\* Gartner Market Guide for DaaS June 2021

- DaaS solutions provide a virtualized desktop or applications to employees entirely from a remote hosted experience such as a public cloud
- DaaS eliminates the need for businesses to purchase the physical infrastructure, instead functioning through subscription and usagebased payment structures
- DaaS alleviates the on-premises Virtual Desktop Infrastructure (VDI) issues of performance and latency with elastic capacity

# Why do customers care?

### **Business Continuity**

Disaster Recovery and end point replacements

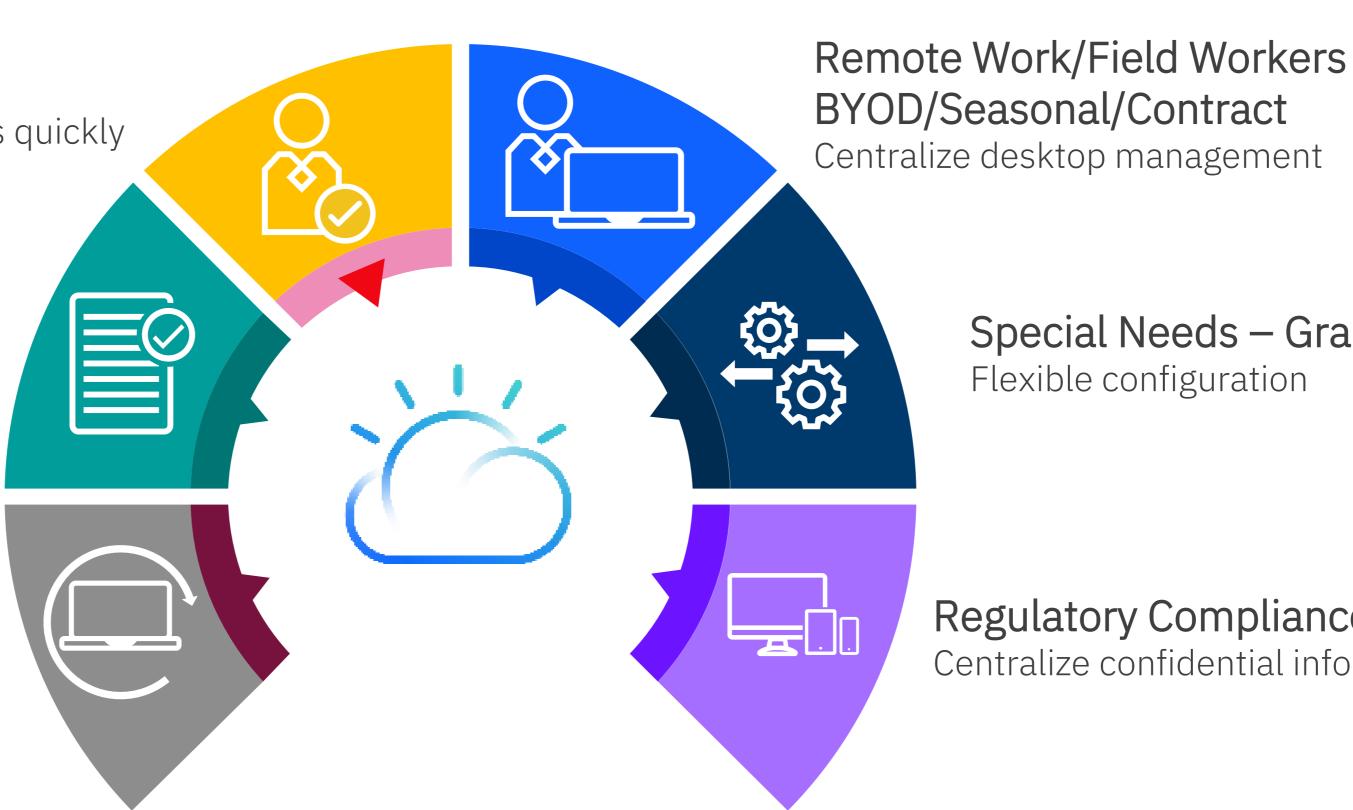

Support new users and applications quickly

### Software Developers

Improve data security for geographically dispersed teams

### Call Centers and Streaming Use

Reduce management effort, cost and ability to handle load changes

BYOD/Seasonal/Contract Centralize desktop management

> Special Needs – Graphics/HPC Flexible configuration

Regulatory Compliance

Centralize confidential information

### ROI for DaaS

- Cost savings by centralizing applications and data for risk reduction and compliance controls
- Improved operational efficiency by enabling quick desktop replacement, better desktop performance and business continuity
- Increased revenue with time-to-market gains by enabling device choice, working anywhere and onboarding new users in minutes

According to a recent Forrester Total Economic Impact<sup>TM</sup> (TEI) Study, organizations that move from traditional VDI to desktops-as-a-service (DaaS) can experience benefits of \$6.70M over three years. That's versus costs of \$2.66M, adding up to a net present value of \$4.05 million and an ROI of 153 percent.

# DaaS Buyer Personas

Personas	Role	What are they looking for?
Line of business (LOB) executives	Determine strategy to stay ahead of market direction and changing customer requirements, delivering quality products to market faster.  Commonly known as:  Chief Operating Officer  Chief Technology Officer  VP Software Development  VP Sales  VP Contact Center	LOB managers are continuously balancing cost with benefits derived for supporting remote work, BYOD, seasonal/contract and M&A new employees. They are required to reduce costs, but at the same time are challenged with providing service to their geographically dispersed employees faster and with a high quality. Today, technologies such as hybrid cloud and virtualization are commonly used to achieve this. Furthermore, LOB managers require visibility and oversight of their IT infrastructure to assess the overall efficiency of their department.
IT executives	The primary function of IT managers or executives is to oversee data center management, IT management, IT strategy and IT operations.  Common titles include:  • Vice President of IT Infrastructure  • VP IT Operations  • VP Enterprise Infrastructure  • VP of IT  • VP Development	IT executives set the vision and strategy for the IT in an organization to empower teams for growth and success. To this end, IT executives are constantly exploring and evaluating the latest available technology and tools to enhance the productivity in the organization aligned with the business goals. Key concerns are end-user computing performance, capital expenses, continuity of business without disruptions and regulatory compliance issues

### What is DaaS?

- DaaS stands for Desktop as a Service.
- It is a cloud computing model that enables the delivery of virtual desktops to end-users over the internet.
- Instead of running applications and storing data on individual physical devices, DaaS allows users to access their desktop environment from any device with an internet connection.

DaaS is a cloud-based solution that provides flexible, cost-efficient, and secure desktop environments accessible from any device with an internet connection. Its benefits include scalability, simplified IT management, enhanced security, remote work enablement, and business continuity.

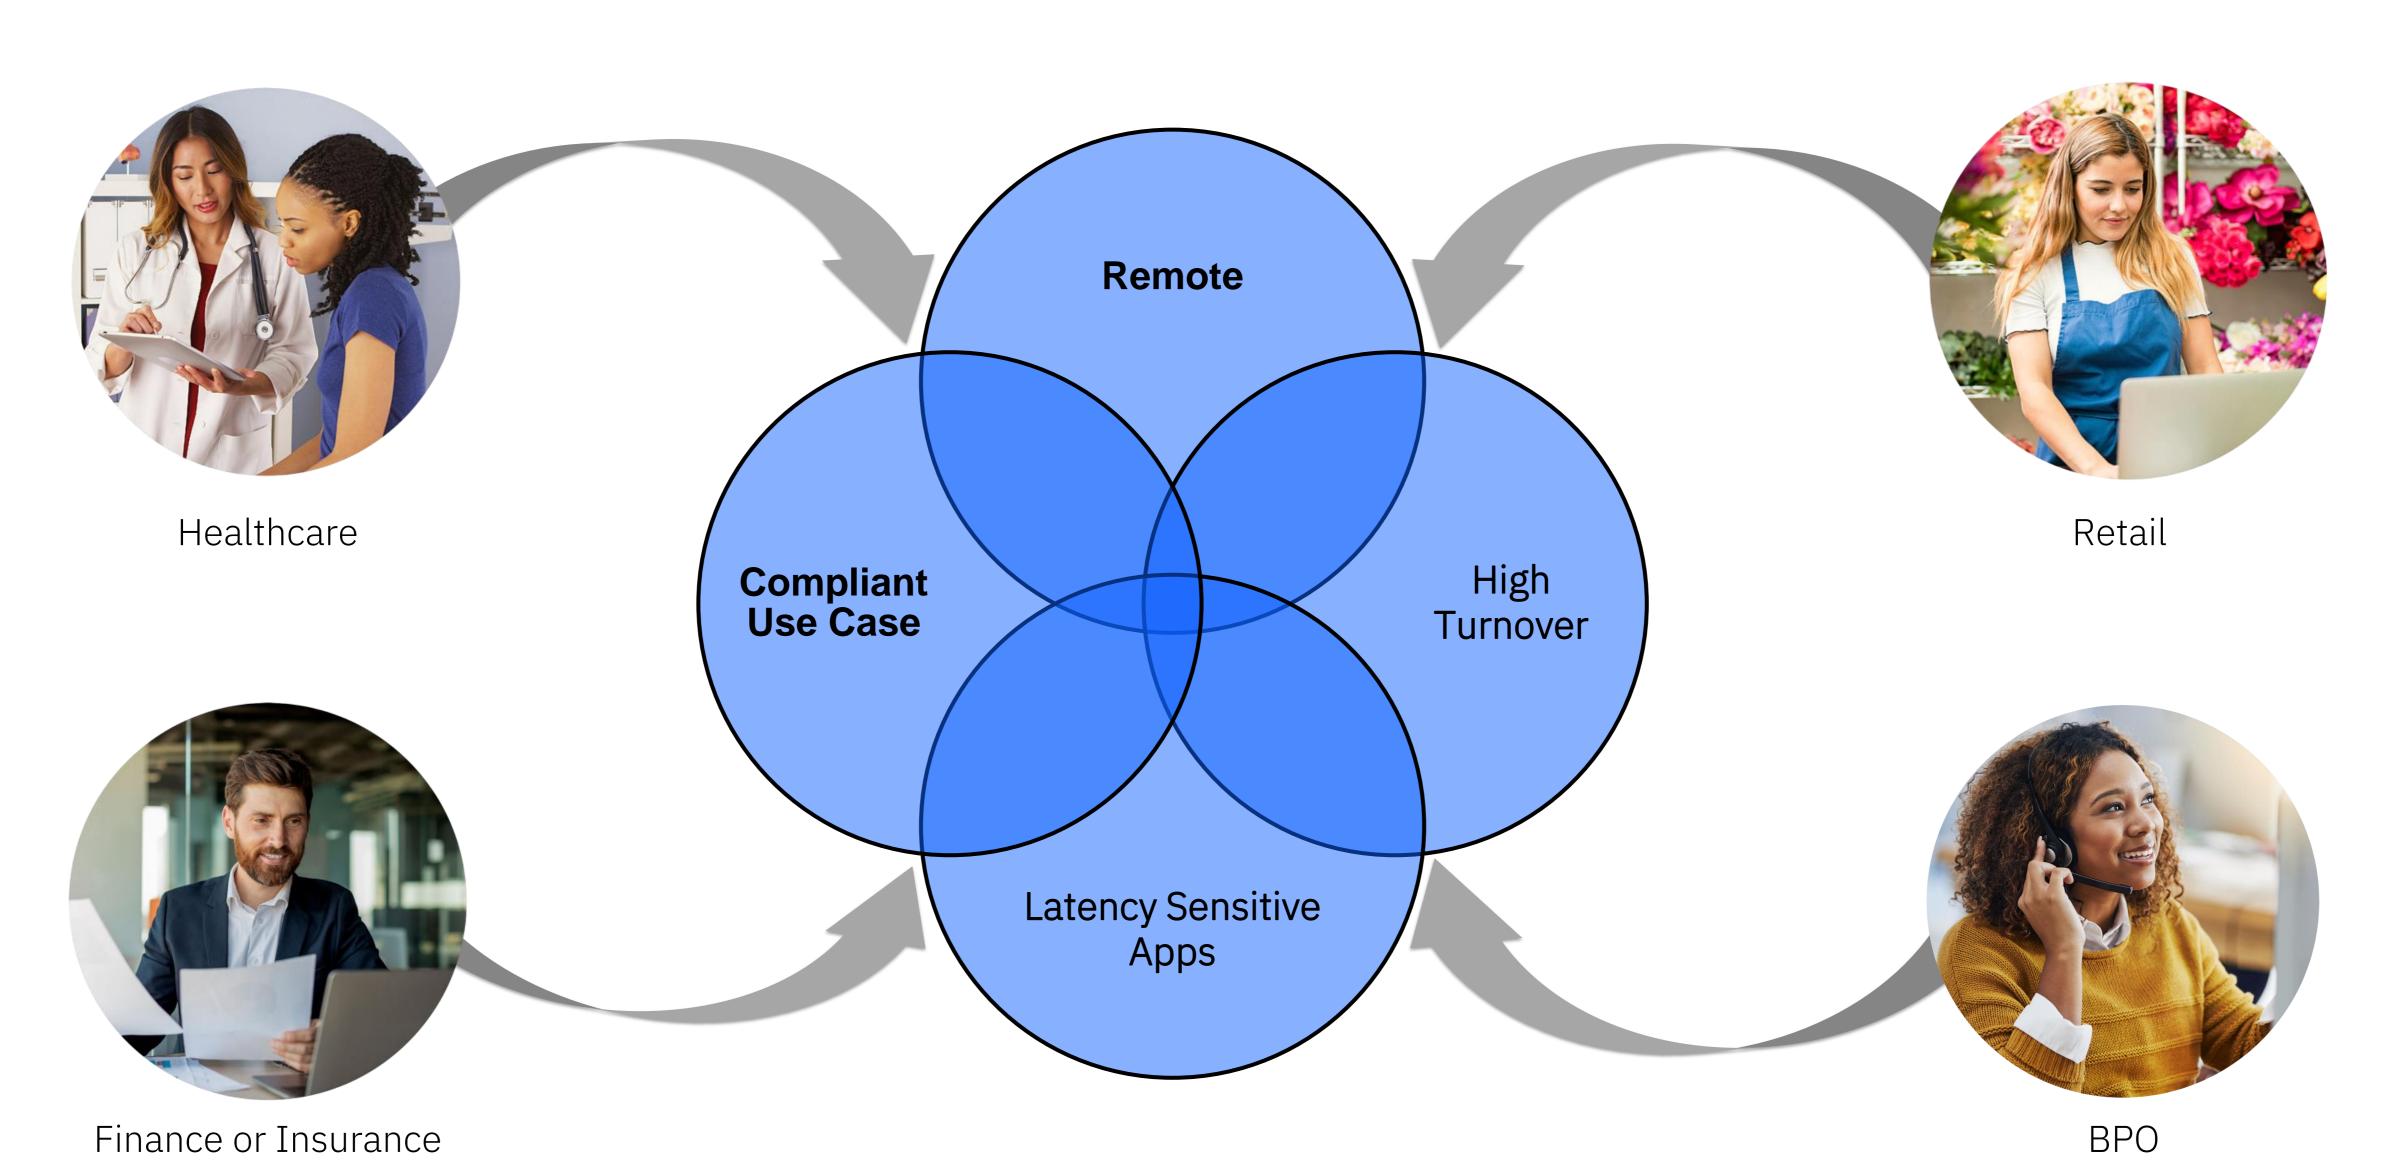

Why should you care about DaaS?

- Hot Topic Everyone is trying to figure out what they will do for their "great refresh".
- Desktop Gravity Desktops drag many more cloud services with them.
- DaaS is a Competitive Differentiator Within our ICP, you have the best solution hands down.
- Fulfill ACV Quotas Typically larger than IaaS projects.

# Is DaaS for everyone?

Different Industries have different needs. How do you decide who is the perfect fit?

# Why use DaaS?

#### **Before Covid**

Employees within ~30 minutes of the office No or low latency VPN connections Employees drive in to get laptops fixed

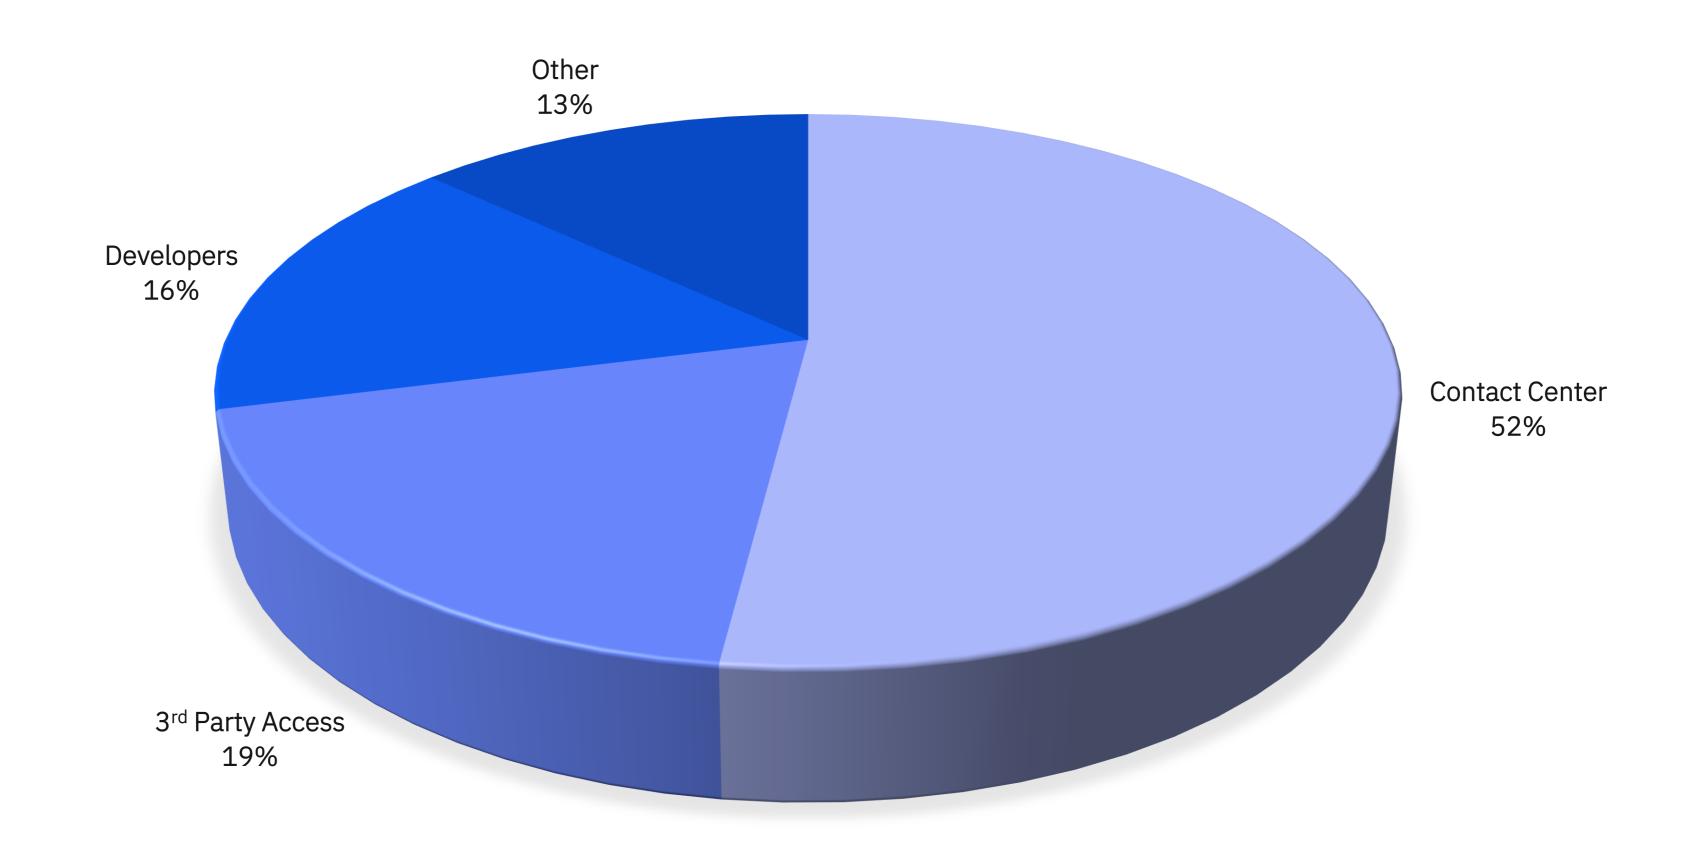

### **After Covid**

Employees all over the place
High latency due to distance
Employees shipping laptops when issues

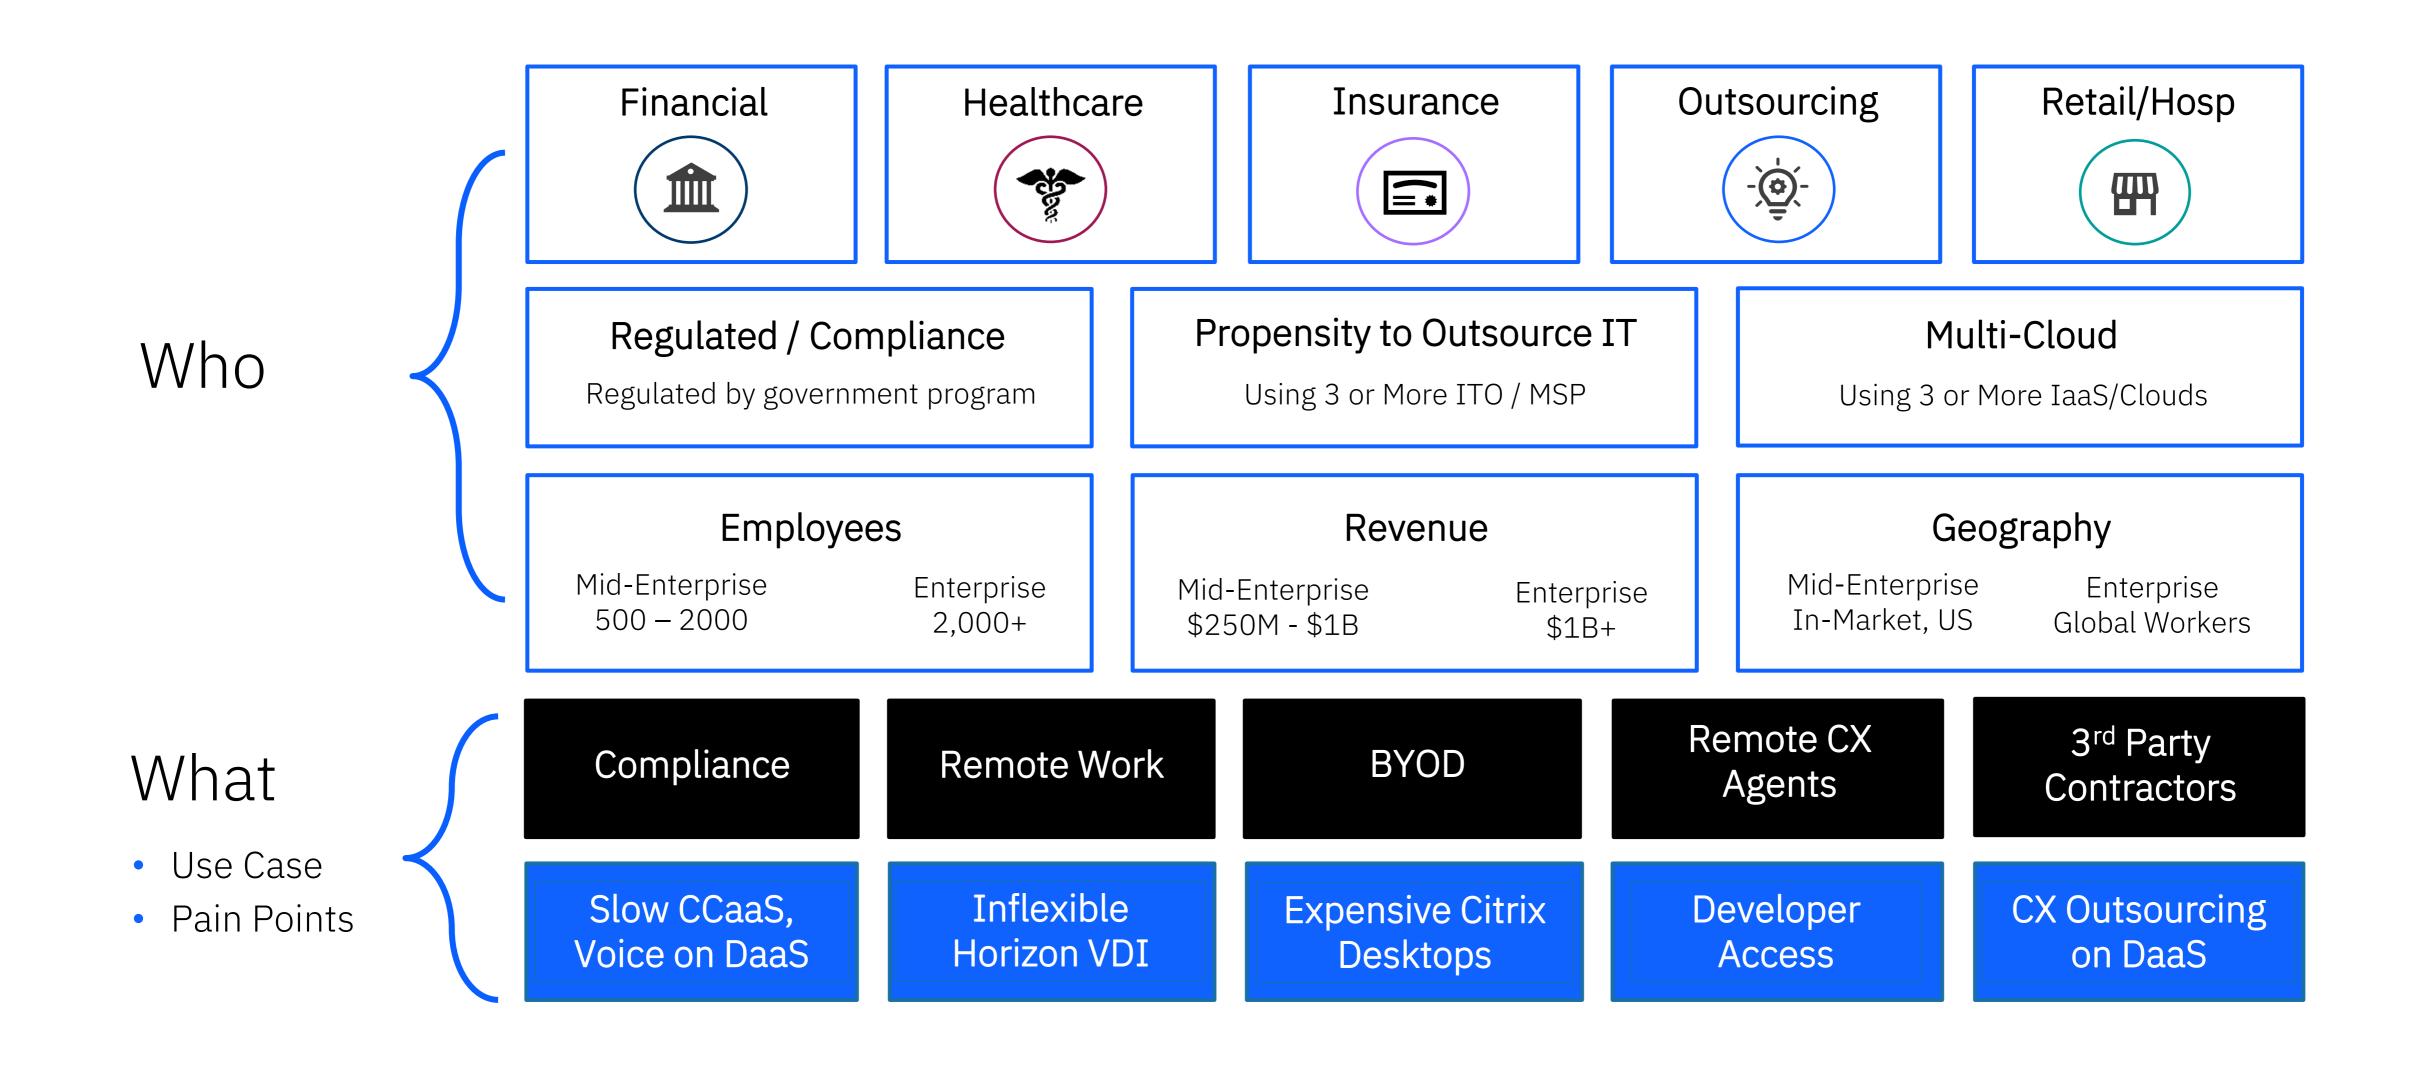

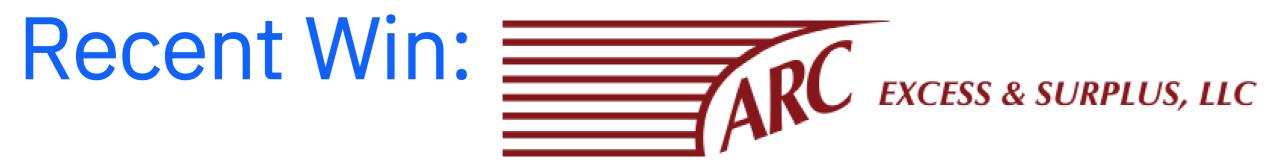

## DIZZION'S Success

DaaS is not an all or none, it's best suited for specific use cases within an organization

# Determining and Targeting the ICP

### Business

### Challenge

### Solution

ARC Excess & Surplus is a wholesale insurance brokerage specializing in Professional Liability products and services, including Directors and Officers Liability (D&O), **Errors and Omissions** Insurance (E&O), Employment Practices Liability (EPLI), Fiduciary Liability, Crime Insurance, Medical Malpractice (Med Mal), Property & Casualty (P&C), and Miscellaneous Professional Liability (MPL).

The client used WorkSpot for several years.

- They grew increasingly dissatisfied with the performance, esp. voice and video performance, reliability and customer overall end user experience
- The Helpdesk Time To Resolution (TTR) increased due to the inefficient troubleshooting process impacting CSAT and customer experience
- The IT team felt that with the manpower they had, and the helpdesk challenges they would struggle to keep up with the anticipated growth

The reason Dizzion DaaS hosted on IBM Cloud was selected was:

- 1. Cloud-based solution with high performance in voice/video for **Zoom and Teams**
- 2. 24x7x365 US-based support offloads some of the mundane tasks
- 3. Dizzion C3 portal shortens the timeframe to resolve user issues

# How to engage with us?

#### REGISTER YOUR LEADS

#### Step 1 – Fill out Lead Reg Form

http://go.dizzion.com/ibm.html

#### **Step 2 – Data Transfer Call**

After you submit your lead, a Dizzion Channel Team Member will reach out to schedule a call to go over the details of your referral to ensure ideal pursuit.

#### **Step3 – Confirmation**

Upon completion of the information gathering process, you will receive confirmation that you lead is officially registered and reserved in Dizzion's CRM. This prevents other partners or internal sales from selling to your referral.
