

An IBM Modernization Event Denver, CO

For those companies that have been successful in their Enterprise Modernization efforts, the modernization of their mainframe platform has been a key building block.

The **IBM Modernization Event** is designed to enlighten customers on the top trends and developments in the mainframe arena. Armed with the most up-to-date information about the capabilities of the platform, you will then be able to chart your own journey to modernization.

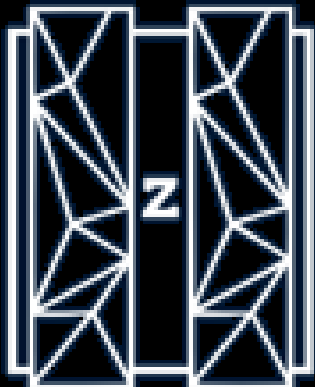

This one-day event will begin with an overview of the **IBM Z Digital Transformation Framework** to help customers understand what factors should be considered when developing a modernization strategy. Then, subject matter experts will provide deeper dives into capabilities that address popular interest areas and outline next steps. This event will provide a look at **APIs, Modern Tools, and Open Source** capabilities on the mainframe.

Agenda Topics and Speakers

- Digital Transformation and Modernization on Z** – Scott Simons, IBM Z Workload Transformation Leader
- DevOps Day 2 – Supporting the Journey to Cloud** – Eric Minick, IBM Hybrid Cloud DevOps Offering Manager
- IBM Z Hybrid Multi Cloud** – Bryan Foley, IBM Z-as-a-Service Offering Leader
- Modern DevOps Tooling on Z** – Mark Boyd, IBM Z DevOps Client Technical Specialist

Audience:

The target audience includes business end users, application developers (Java/COBOL), systems programmers, architects/leads, and managers.
