IBM

IBM i and Real Vision Imaging Going Paperless on IBM i

Capture documents and automate workflows!

Highlights

- Includes unlimited users
- Scans paper documents
- Captures spool files/AFP
- Imports digital/office files
- Provides workflow/mobile
- Integrates easily with apps

With over 30 years of document capture, workflow, and integration experience, Real Vision Imaging (RVI) has probably heard your story before! Thousands of companies across many industries have used RVI to transform their business from chasing paperwork to making it an integral part of their operation.

RVI gets IBM i! RVI provides a capture system to digitize documents and workflow to automate work processes. RVI audits and dashboards show what's running smoothly (and what's not) so you can fine tune your workload. And RVI mobile apps provide secured access to your documents anytime from anyplace.

With RVI, your documents are just a click away, making them easier to find, share, manage and protect, resulting in greater efficiency and faster responses.

Key Features of RVI for IBM i Include:

- Native application for IBM i and Power Systems
- Unlimited RVI users with no add-on modules
- Expandable to multiple applications and departments
- Up to 99 unique indexes per application or department
- Annual support includes future RVI releases
- Capture system included with comprehensive features
- Send-To-RVI for Microsoft Outlook/Office applications
- Drag & Drop or Virtual Print Driver for PC file imports
- IBM i spool file system for print output and AFP reports
- Flexible storage, retention and purge options
- Security controls authorized by individual users
- Audits and dashboards in log or graphical formats
- Advanced workflow and approval system included
- Signature support for tablets, pads or mobile devices
- Interfaces with green-screen and modernized apps
- Program calls, screen scrape or web services options
- Remote user access over-the-web or from mobile apps

Key Benefits

RVI Provides a Simple User Interface

The RVI OneLook interface was designed with the user in mind. It presents an intuitive look and feel which simplifies training. OneLook is browser-based, so there is no workstation code to download. And it can be implemented as a stand-alone inquiry system or interfaced with applications using program calls, a screen-scrape approach or web services.

Instant and Secured Access to ALL Documents

The RVI capture system does more than scan paper. RVI easily imports PC files such as word processing, spreadsheets, emails, photos, videos and much more. RVI also captures spool file and AFP print output. Your documents will never be misplaced and can be instantly and securely accessed from the office, over-the-web or even from a mobile device.

Improved Records Management Capabilities

RVI security controls authorize who can access what and which user actions are permitted. RVI audits and dashboards provide detailed data about your workload and are available in log or graphical formats. Your documents are better protected with new backup capabilities and RVI retention controls are available to automate your records purging policies.

Automate Work Processes for Efficiency

RVI workflow allows you to define how work is to be distributed, automate the approval process and track item counts and routing status. RVI also supports e-signatures, forms recognition, PDF data extraction, versions, redactions and several integrated approaches to automate inbound email capture.

Why IBM i and RVI?

In an industry dominated by Windows systems, RVI was designed by developers who understand IBM i. Real Vision Software has been developing, supporting and installing the RVI solution for over thirty years. RVI is a native IBM i application which offers several advantages:

- Integration with core business applications is greatly simplified
- RVI leverages the superior reliability and scalability of IBM i
- Images can be stored to the IBM i IFS or to a Network Storage Device
- RVI indexes are maintained in a standard IBM Db2 for i database
- User access options include browser (OneLook), Windows or mobile apps
- IBM i spool file system included to capture standard SCS/AFP output
- Entry-level RVI systems (Basic/Express) can upgrade to RVI Complete
- RVI Windows/Cloud migration options are available (if required)

RVI is a total document management solution equipped with everything you need. There are no user-based fees, no workstation charges, no page costs and no optional modules. You pay one time and get it all - a powerful capture system, forms recognition, PDF extraction, advanced workflow, mobile apps, integration tools, GUI-enabled, web support, security and expiration controls, detailed audits, dashboards, signature stamping, and so many other features that are included in the base product. And RVI annual support includes future software releases.

Since 1990, RVI for IBM i has been used in many industries for a wide variety of applications. With RVI, it's never complicated or expensive. RVI will provide the installation and training expertise needed to launch your project quickly and easily.

Customer Testimonials

"RVI running on IBM i provides rock solid stability and maximum security for all our documents and data. RVI was easy to install, simple to use, and their support team is reliable as IBM i."
- Borden Dairy (Dallas, TX)

"RVI has become a valuable tool that we can't live without. The support you get it better than any other product we have used. If you ever need to speak with their President, he is not hard to find."
- Birdsong Peanuts (Suffolk, VA)

"Our goal is to automate as much as possible. With RVI, we produce very few printouts and seldom touch paper anymore. Our biggest payback has come from rendition billing and keeping track of driver records (safety, training and recruiting documents). RVI has really helped reduce our turn-around times, establish better audit/security controls, reduce our expenses and eliminate the hassle of handling paper."
- Maverick Transportation (Little Rock, AR)

"We have been very satisfied with RVI software and their support. A couple of lines of code and RVI was implemented into our infrastructure. By far, the easiest software implemented to date. It has paid for itself many times over." **- Southwestern Motor Transport (San Antonio, TX)**

"I don't blame the users for being apprehensive but now everyone sees the benefits and they couldn't be happier. Our biggest skeptics have become our strongest supporters and would never consider going back to the old way of doing things."**- Trailer Bridge (Jacksonville, FL)**
