| Arora | ▶ Geospatial Asset Management | <i>January 10, 2019 9:30 AM to 10:30 AM</i> |
| <p>Presentation Description: True Enterprise Asset Management is achieved when organizations receive accurate, current and consistent data about the location and condition of their assets. This must include reliable positional data and data that provides solid information to support not just reactive maintenance but allows for analytics to begin the process of converting to a predictive maintenance culture.</p> <p>Empowering Maximo with geospatial intelligence, location based services and tying in sensor data will provide information across an intelligent platform that promotes mobility is the key to unlocking true Enterprise Asset Management</p> | | |
| CiM | ▶ Benefits of Work Week Management (Insure Routine Maintenance is Done on Time) | <i>January 10, 2019 11:00 AM to 12:00 PM</i> |
| <p>Presentation Description: We will present what is the Work Week Management process as well as the strategy to use to overcome the implementation challenges. We will also showcase the benefits achieved once it is successfully implemented.</p> | | |
| DataSplice | ▶ DataSplice Mobilizes Airport Operations | <i>January 10, 2019 1:00 PM to 2:00 PM</i> |
| <p>Presentation Description: A discussion complete with demos about how DataSplice, a mobile for Maximo platform, is being used at three different airports to digitize operations from the front of the house to the back.</p> | | |
| EDI | ▶ EDI Strategic Asset Management System (eSAM) IoT Enabled | <i>January 10, 2019 2:00 PM to 3:00 PM</i> |
| <p>Presentation Description: EDI will present the new Maximo eSAM that recently went live at PHL. This system can now be deployed in half the normal time for a deployment at half the average cost. The system for airports incorporates Desk Top and Mobile capabilities for GIS/Spatial Work Management, Inventory Management, Terminal and Airfield Inspection along with the airport Safety Management System (SMS) Module and the IoT Connection.</p> | | |
| Interloc Solutions | ▶ Best Practices for IBM Maximo Mobility | <i>January 10, 2019 3:30 PM to 4:30 PM</i> |
| <p>Presentation Description: This presentation delivers an overview of best practices and recommendations when considering to augment your IBM Maximo Asset Management with a mobile solution.</p> <p>Presentation topics include business examples and use cases, technological and user community considerations, and implementation and adoption guidance.</p> | | |
| JFC | ▶ Using IoT to Help Airports Make Better Connections | <i>January 11, 2019 9:30 AM to 10:30 AM</i> |
| <p>Presentation Description: JFC & Associates working with JFK Airport created end-to-end solutions to help solve business by connecting to the IoT and MAXIMO. The presentation will cover an overview of the platform with the following key elements to a successful IoT project: What is the right data, How to select sensors, What are the gateway options, developing custom alerting, developing an intuitive dashboard and integrating to Maximo and lessons learned.</p> | | |
| Solufy | ▶ The Benefits of Simplified Planning and Scheduling Processes | <i>January 11, 2019 11:00 AM to 12:00 PM</i> |
| <p>Presentation Description: This presentation delivers an overview of best practices and recommendations when considering to augment your IBM Maximo Asset Management with a mobile solution.</p> <p>Presentation topics include business examples and use cases, technological and user community considerations, and implementation and adoption guidance.</p> | | |
| Airport Round Table | ▶ Airport Round Table - Airports and Vendors Open Discussions and Questions | <i>January 11, 2019 1:00 PM to 3:00 PM</i> |
