

IBM Cloud Platform Overview for Data Scientists

Thomas Schaeck
Distinguished Engineer, Watson Studio

Data Science and ML in Enterprises

Enterprises generate TONS OF DATA
... requiring cataloging and governance

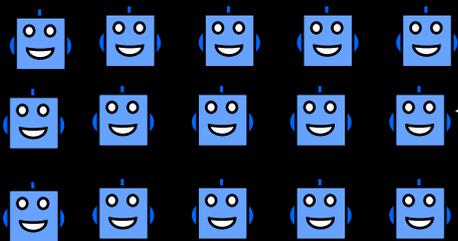

Data must be cleaned and shaped for training

need good data ↓ avoid bias

... then models must be created

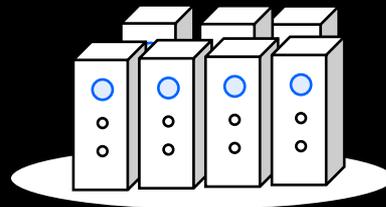

...that must be hosted and monitored at scale

to select an optimal model...

... and trained on high performance compute

Why are enterprises struggling to capture the value of AI?

Data Access

- Data resides in silos & difficult to access
- Unstructured and external data wasn't considered

Data Governance

- If the data isn't secure, self-service isn't a reality
- Challenge understanding data lineage and getting to a system of truth

Skills

- Data Science skills are in low supply and high demand
- Nurturing new data professionals is challenging

Tools&Infrastructure

- Need an environment that enables quick experiments and real outcomes
- Discrete tools present barriers to productivity

Watson AI and Data

Applications, solutions and services
Targeted solutions for enterprise businesses

Watson Studio & Knowledge Catalog

Virtual agent

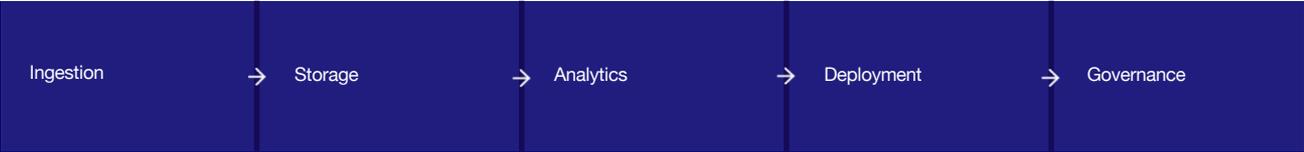

Watson AI
Cognitive building blocks for developers

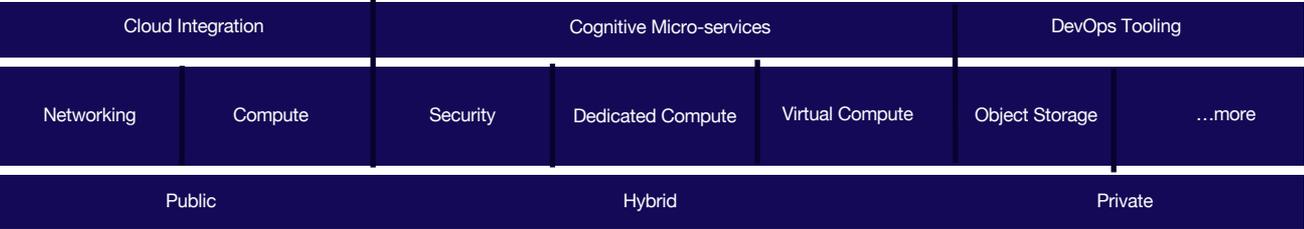

API Assistant	API Discovery	API Compare and Comply	API Watson Machine Learning	API Tone Analyzer	API Personality Insight
API Visual Recognition	API Speech	API Document Conversion	API Nat Language Understanding	API Nat Language Classifier	...more

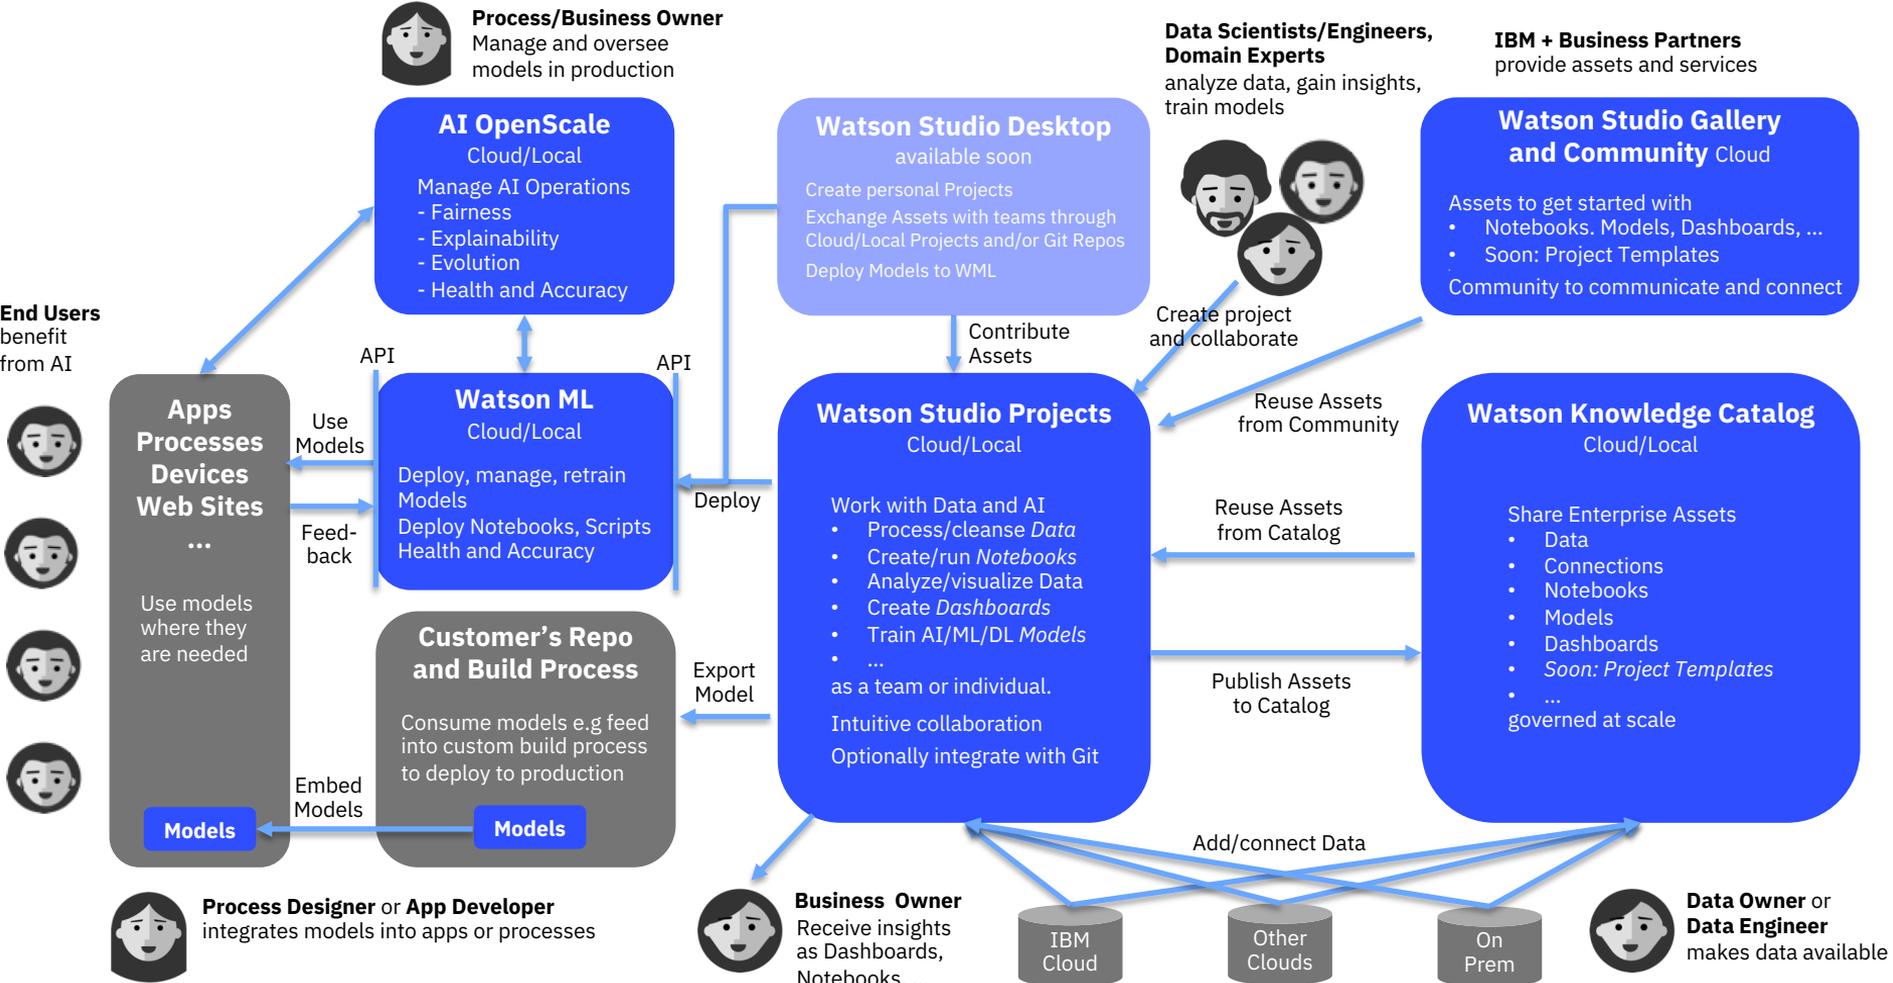

Data
Tools to prepare data for AI and data persistence

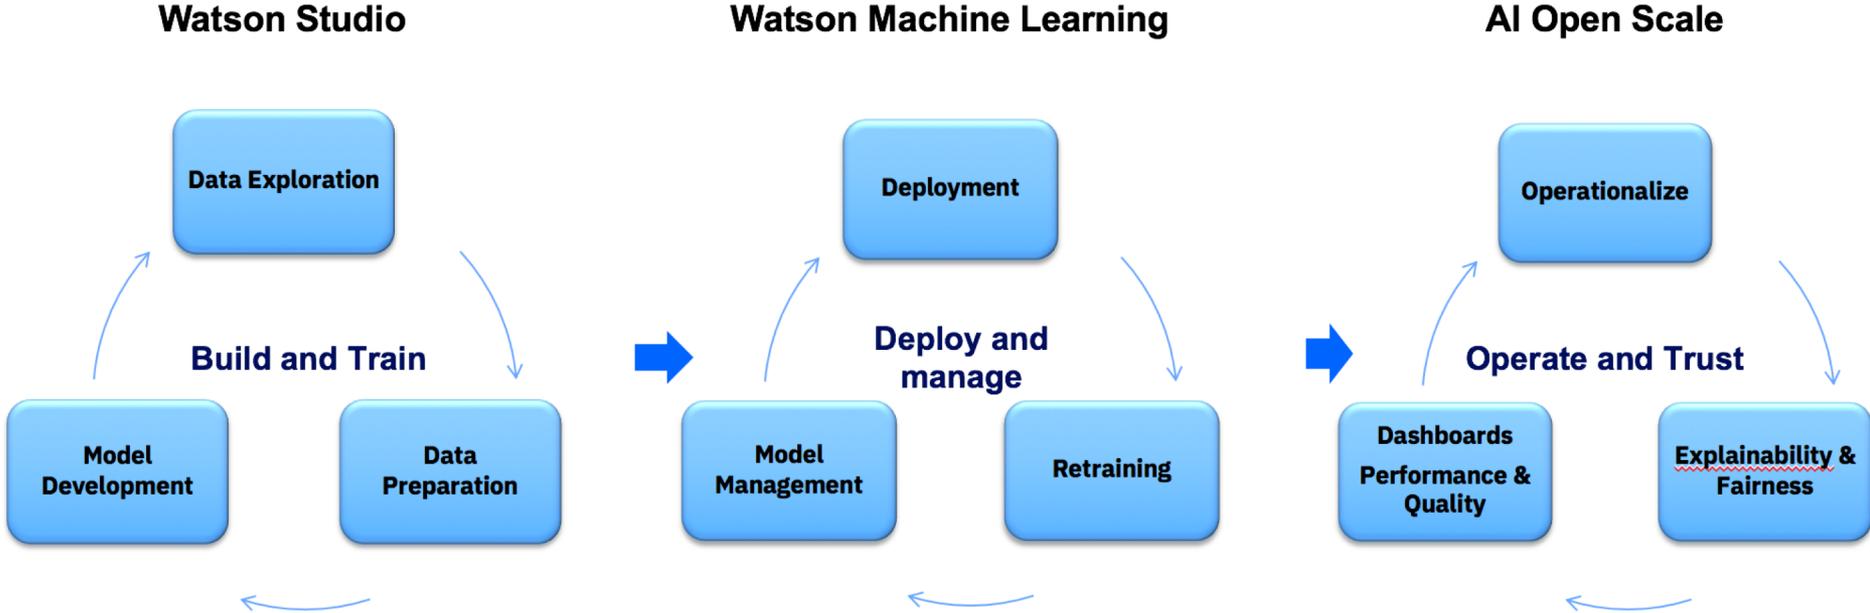

Cloud Infrastructure
A highly scalable, security enabled infrastructure

Collecting, organizing, analyzing Data → Training and deploying Models → Managing AI Ops

Scaling AI in the enterprise

Connect to Data in IBM Cloud Data Services, On Prem Data, or Data on other Clouds

Store your data in the IBM Cloud

and/or connect your on-prem data or third-party cloud data

 Cloud Object Storage  SQL Query

 Cloudant NoSQL DB	 Compose for MongoDB
 Compose for PostgreSQL SQL	 Compose for Redis
 Db2 Warehouse on Cloud SQL	 Db2 on Cloud SQL
 Message Hub	 Streaming Analytics

...

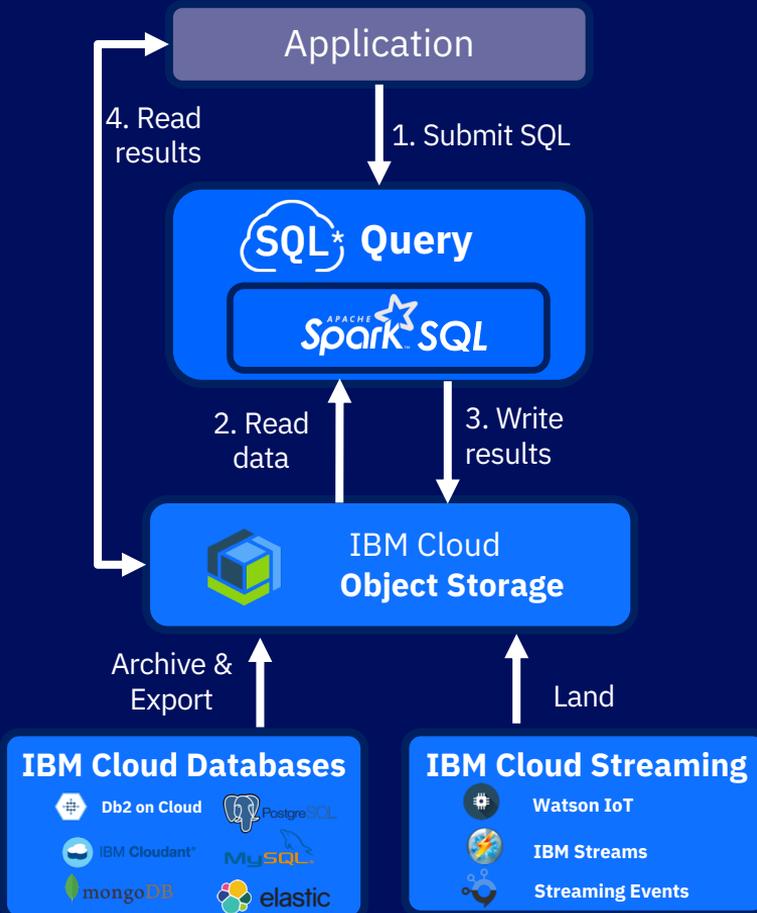

IBM

- | | | | |
|--|--|--|--|
|  IBM Informix |  PostgreSQL on Compose |  MySQL on Compose |  IBM Db2 for i |
|  IBM Cloudant |  IBM Cloud Object Storage |  Bluemix Object Storage |  IBM Db2 |
|  IBM BigInsights HDFS |  IBM Db2 Hosted |  SoftLayer Object Storage |  IBM PureData for Analytics |
|  IBM Db2 for z/OS |  IBM Db2 Warehouse on Cloud | | |

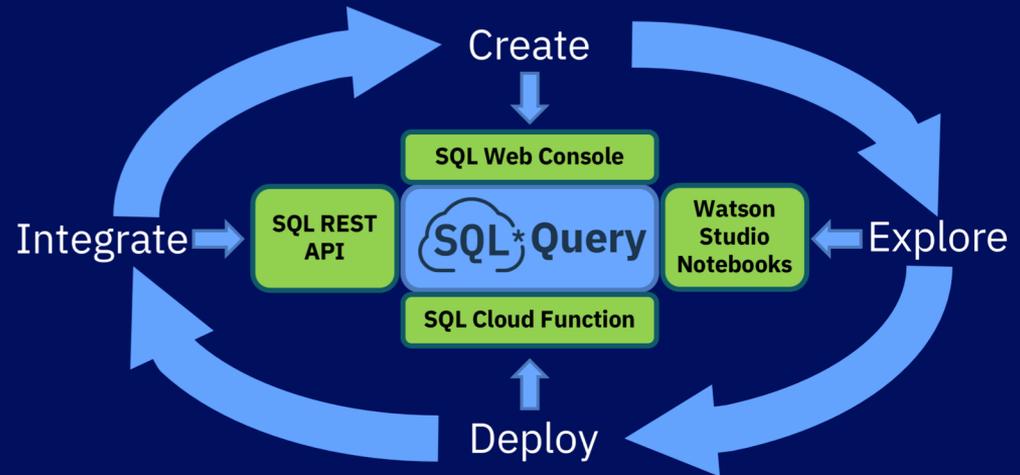

Third Party

- | | | | |
|--|--|--|---|
|  Cloudera Impala |  Salesforce.com |  Apache Hive |  Amazon Redshift |
|  Microsoft SQL Server |  Sybase IQ |  Sybase |  Oracle |
|  Amazon S3 |  MySQL |  Hortonworks HDFS |  PostgreSQL |
|  Pivotal Greenplum |  Microsoft Azure SQL Database | | |

IBM Cloud SQL*Query – Serverless SQL aaS

- Completely **self-service SQL** on cloud data
- **Serverless** scale-out SQL execution on **TB of data**
 - **Pay per query** (pennies per query)
 - Full **ANSI SQL** support, incl. **OLAP** functions & **Spatial SQL**
- Easy **SQL operationalization** for **developers**
 - **REST API**, **Cloud Function** integration, SDKs (**Python**, **Node.js**)

IBM Cloud Databases

A **fully managed** collection of **open source** databases and **persistence** services available through a consistent consumption, pricing, and interaction model

Eliminates the burden of **managing** infrastructure and system health as well as the associated capital expenses

Allows you to **focus on** your **business** objectives rather than the operations and support of your own platform stack

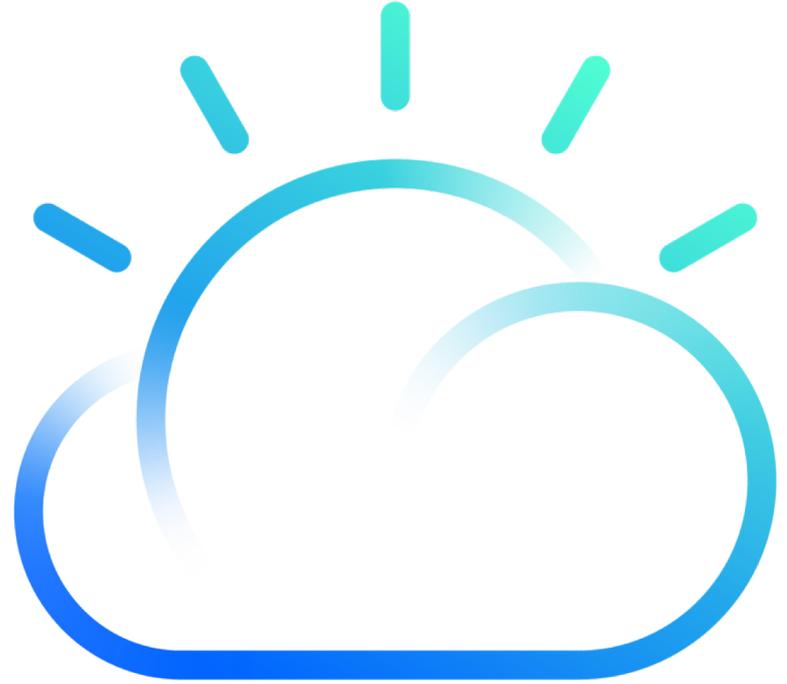

Responsibilities comparison

	On-prem	IaaS	DbaaS
Client Managed (DIY) VS IBM Managed	Performance	Performance	Performance
	Data Model	Data Model	Data Model
	Monitoring	Monitoring	Monitoring
	Backups	Backups	Backups
	High Availability	High Availability	High Availability
	DB Technology	DB Technology	DB Technology
	Security	Security	Security
	Networking	Networking	Networking
	Hardware	Hardware	Hardware

Avoid vendor lock-in and allows for easily coordinating multi-database strategies by using Open Source **DBaaS** like:

- **Postgres**
- **Mongo**
- **ElasticSearch**
- **Redis**
- **RabbitMQ**
- **etcd**
- **MySQL**
- **ScyllaDB**
- **JanusGraph**

Where to get started ?

IBM Cloud

IBM Watson

Log In

Try it for Free

Explore our apps

Use IBM Watson to collaborate and build smarter applications. Quickly visualize and discover insights from your data and collaborate across teams.

IBM Watson Studio

Democratize ML/DL to accelerate infusion of AI in your business.

[Learn more](#)

IBM Watson Knowledge Catalog

Securely discover, catalog, and govern enterprise data.

[Learn more](#)

Try Watson Studio and Knowledge Catalog

Powered by IBM Cloud

Take advantage of machine learning an AI to analyze your data. Catalog your data to make it easy to find. Both applications are free and without time limit!

Your Watson Applications

Watson Studio

Machine learning and AI made easy! Solve your business problems in a collaborative environment.

Watson Knowledge Catalog

Connect the right data with the right people. Index, find, and protect your knowledge.

Activate Watson applications with your IBM Cloud account

Create an IBM Cloud Account

I accept the [IBM Watson Studio terms](#) and the [IBM Watson Knowledge Catalog terms](#).

Have an IBM Cloud account?

By clicking Log in, you agree to our terms and that you have read our [Data Use Policy](#), including our [Cookie Use](#).

[Log in to activate Watson](#)

[Get started](#) ▾

Welcome Thomas!

Watson Studio and Watson Knowledge Catalog are both part of IBM Watson Studio.

What's new? As part of the AI OpenScale beta program you can get started with [AI operations](#) today.

Get started with key tasks

New project

Catalog and find data

Refine data

New notebook

Operationalize AI

Govern data

Watson Assistant (formerly Conversation)
Lite • IBM • EU Supported
Add a natural language interface to your application to automate interactions with your end users. Common applications include virtual agen...

AI OpenScale
Lite • IBM
IBM AI OpenScale is an enterprise-grade environment for AI infused applications that provides enterprises with visibility into how AI is...

Compare Comply
IBM • Beta
Process governing documents to convert, identify, classify, and compare important elements

Discovery
Lite • IBM • EU Supported
Add a cognitive search and content analytics engine to applications.

Knowledge Catalog
Lite • IBM
Discover, catalog, and securely share enterprise data.

Knowledge Studio
Lite • IBM • EU Supported
Teach Watson the language of your domain.

Language Translator
Lite • IBM • EU Supported
Translate text, documents, and websites from one language to another. Create industry or region-specific translations via the service's...

Machine Learning
Lite • IBM
IBM Watson Machine Learning - make smarter decisions, solve tough problems, and improve user outcomes.

Natural Language Classifier
IBM
Natural Language Classifier performs natural language classification on question texts. A user would be able to train their data and the predict...

Natural Language Understanding
Lite • IBM • EU Supported
Analyze text to extract meta-data from content such as concepts, entities, emotion, relations, sentiment and more.

Personality Insights
Lite • IBM • EU Supported
The Watson Personality Insights derives insights from transactional and social media data to identify psychological traits

Speech to Text
Lite • IBM • EU Supported
Low-latency, streaming transcription

Text to Speech
Lite • IBM • EU Supported
Synthesizes natural-sounding speech from text.

Tone Analyzer
Lite • IBM • EU Supported
Tone Analyzer uses linguistic analysis to detect three types of tones from communications: emotion, social, and language. This insight can...

Visual Recognition
Lite • IBM
Find meaning in visual content! Analyze images for scenes, objects, faces, and other content. Choose a default model off the shelf, or create your own...

Watson Studio
Lite • IBM
Embed AI and machine learning into your business. Create custom models using your own data.

 **Compose for etcd**
IBM • Beta • EU Supported

etcd is a key/value store for distributed server configuration management.

 **Compose for JanusGraph**
IBM • Beta • EU Supported

JanusGraph is a scalable graph database optimized for storing and querying highly-interconnected data

 **Compose for MongoDB**
IBM • EU Supported

MongoDB is a JSON document store with a rich query and aggregation framework

 **Compose for MySQL**
IBM • Beta • EU Supported

MySQL is a fast, easy-to-use, and flexible RDBMS.

 **Compose for PostgreSQL**
IBM • EU Supported

PostgreSQL is an open source relational database. Consider using our new service, Databases for PostgreSQL.

 **Compose for RabbitMQ**
IBM • EU Supported

RabbitMQ asynchronously handles the messages between your applications and databases

 **Compose for Redis**
IBM • EU Supported

Redis is an open-source, blazingly fast, low maintenance key value store. Consider using our new service, Databases for Redis.

 **Compose for RethinkDB**
IBM • EU Supported

RethinkDB is a JSON document based, distributed database with an integrated administration and exploration console.

 **Compose for ScyllaDB**
IBM • Beta • EU Supported

ScyllaDB is a highly performant, in-place replacement for the Cassandra wide-column distributed database.

 **Databases for PostgreSQL**
IBM

Postgres is a powerful, open source object-relational database that is highly customizable.

 **Databases for Redis**
IBM

Redis is an open source (BSD licensed), in-memory data structure store, used as a database, cache and message broker.

 **Db2**
Lite • IBM • EU Supported

A next generation SQL database. Formerly dashDB For Transactions.

 **Db2 Hosted**
IBM

Db2 Hosted: Offers customers the rich features of an on-premise Db2 deployment without the cost,

 **Db2 Warehouse**
IBM • EU Supported

Db2 Warehouse on Cloud is a flexible and powerful data warehouse for enterprise-level

 **Informix**
IBM

IBM Informix on Cloud helps businesses gain a trusted view of data in a hybrid computing

 **SQL Query**
Lite • IBM

Analyze data in Object Storage with ANSI SQL.
