# New from the IBM Center for Cloud Training

ICCT Cloud Professional Architect now streamlined and updated

The updated ICCT Cloud Professional Architect curriculum is designed to reflect the most current evolution in IBM Cloud offerings, including the latest technologies and best practices.

These updates include:

- Course adjustments to cover IBM Cloud changing tools and products.
- Use cases added to strengthen the context relevant to Cloud Architects.
- Study materials aligned to the exam questions.

To help candidates succeed on the Cloud Professional Architect certification exam, ICCT has also strengthened tools including the ICCT Professional Architect Study Jam, scheduled for March 7-9. Other tools include:

- Study guides with practice test questions
- ICCT Cloud Prep App with various study modes
- Optional IBM Cloud labs

The result is a 12–15-hour online curriculum – previously 25 hours – that makes learning new skills in one of the most open and secure Cloud platforms – IBM Cloud – as quick and easy as possible.
