

Registering for the IBM Planning Analytics Trial

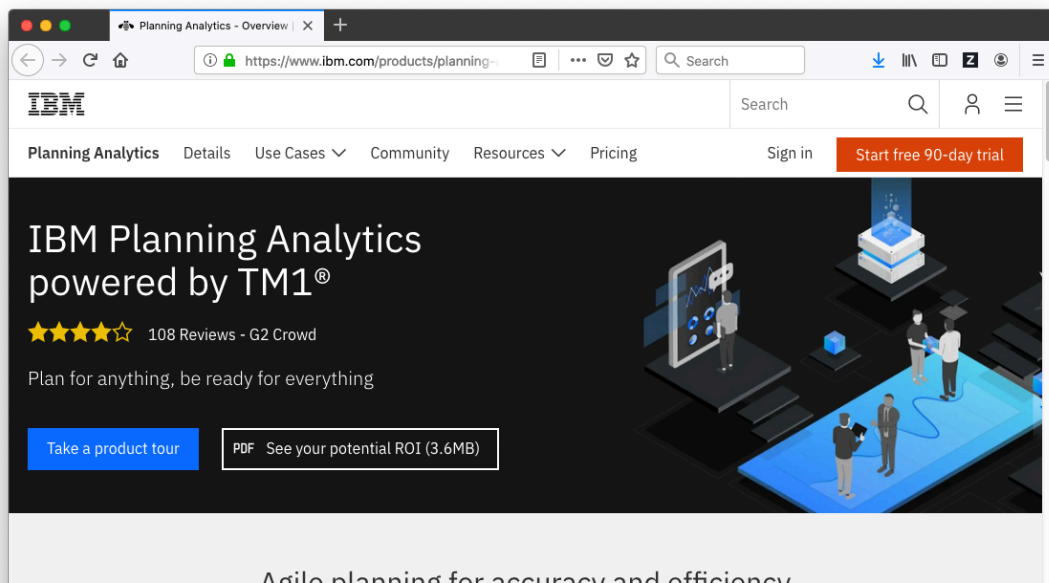

The IBM Planning Analytics trial provides full access to IBM Planning Analytics Workspace, allowing you to build applications, perform analysis, create dashboards and share with others in your team. It also gives you access to the Spreadsheet transformation utility (Beta).

Registration is quick – it only takes a minute to complete the form and validate your email address. The registration process *immediately creates your own* unique space in the cloud so that you can fully explore the powerful modeling, analysis, and planning capabilities.

Finding the registration page

Registration to the IBM Planning Analytics trial is via a registration page that can be accessed by clicking the *Start free 90-day trial* button on the product page on [ibm.com](https://www.ibm.com/products/planning-analytics).

Signing-up for an IBMid

Registration is quick and simple asking for a few key fields that are necessary to set up an IBMid (which you will need to access your IBM services and subscriptions) and create your own individual tenant – that's a workspace just for you.

Simply fill-in the form, watch your inbox for a validation email and the process will set-up a Planning Analytics environment. You will have full access to IBM Planning Analytics Workspace and the Spreadsheet Transformation utility – the only restriction is the time-limit of the trial.

I already have an IBMId

If you already subscribe to an IBM service (but not IBM Planning Analytics, see below) and have an IBMId then you can click on the *Log In* link, where you will be asked to sign-in –the trial instance is immediately created for you.

I already have an IBM Planning Analytics subscription

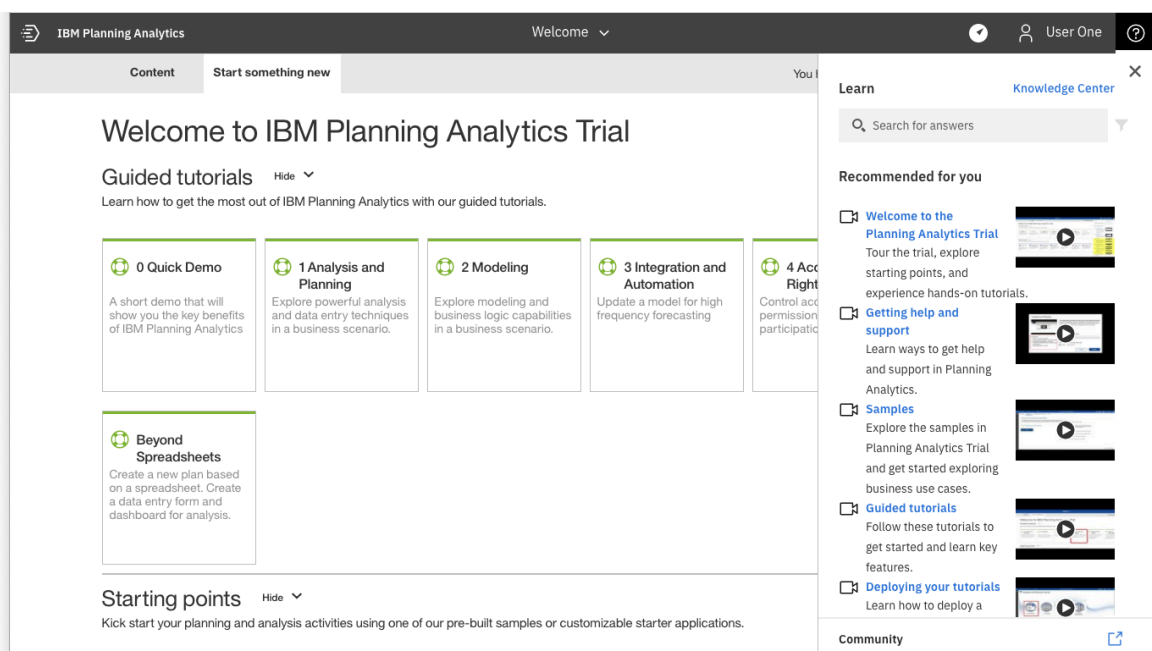

If you already have an IBM Planning Analytics subscription – **do not** use this subscription, instead create a new subscription using a different email account.

You **will not** be able to sign up for the trial using the IBMId associated with the email that you signed up for the subscription with. If you sign up with that IBMId you will be automatically redirected to your existing IBM Planning Analytics.

Why? The trial creates a new tenant exclusively for you and in order for you to be able to manage that subscription (and control who you invite to join you in that trial) you will become a subscription administrator. If you attempted to use your existing IBMId then your account would have its role elevated, meaning that you would have elevated rights in the existing subscription.

To protect the original production subscription, you **cannot** use an IBMId that associated with existing subscription to register for the trial.

However, it is possible for you to use an alternative IBMId, based on an alternate email address. Simply use an email service to create a new IBMId, and you will have full access to the IBM Planning Analytics Trial to explore, learn and build confidence.

The screenshot displays the IBM Planning Analytics Trial welcome interface. At the top, the header includes the IBM Planning Analytics logo, a 'Welcome' dropdown menu, and a user profile for 'User One'. Below the header, there are two tabs: 'Content' and 'Start something new'. The main content area is titled 'Welcome to IBM Planning Analytics Trial' and features a 'Guided tutorials' section with a 'Hide' dropdown. This section contains five tutorial cards: '0 Quick Demo', '1 Analysis and Planning', '2 Modeling', '3 Integration and Automation', and '4 Acc Right'. Below these is a 'Beyond Spreadsheets' card. At the bottom of the main content is a 'Starting points' section with a 'Hide' dropdown. On the right side, there is a 'Learn' sidebar with a search bar and a 'Recommended for you' list containing video thumbnails for 'Welcome to the Planning Analytics Trial', 'Getting help and support', 'Samples', 'Guided tutorials', and 'Deploying your tutorials'. A 'Community' link is visible at the bottom of the sidebar.
