

# TRIRIGA Tuesday

## Interactive Wayfinding with IBM TRIRIGA

—

**Indoor Maps**

2

**Introduction**

1

**Indoor Maps + TRIRIGA**

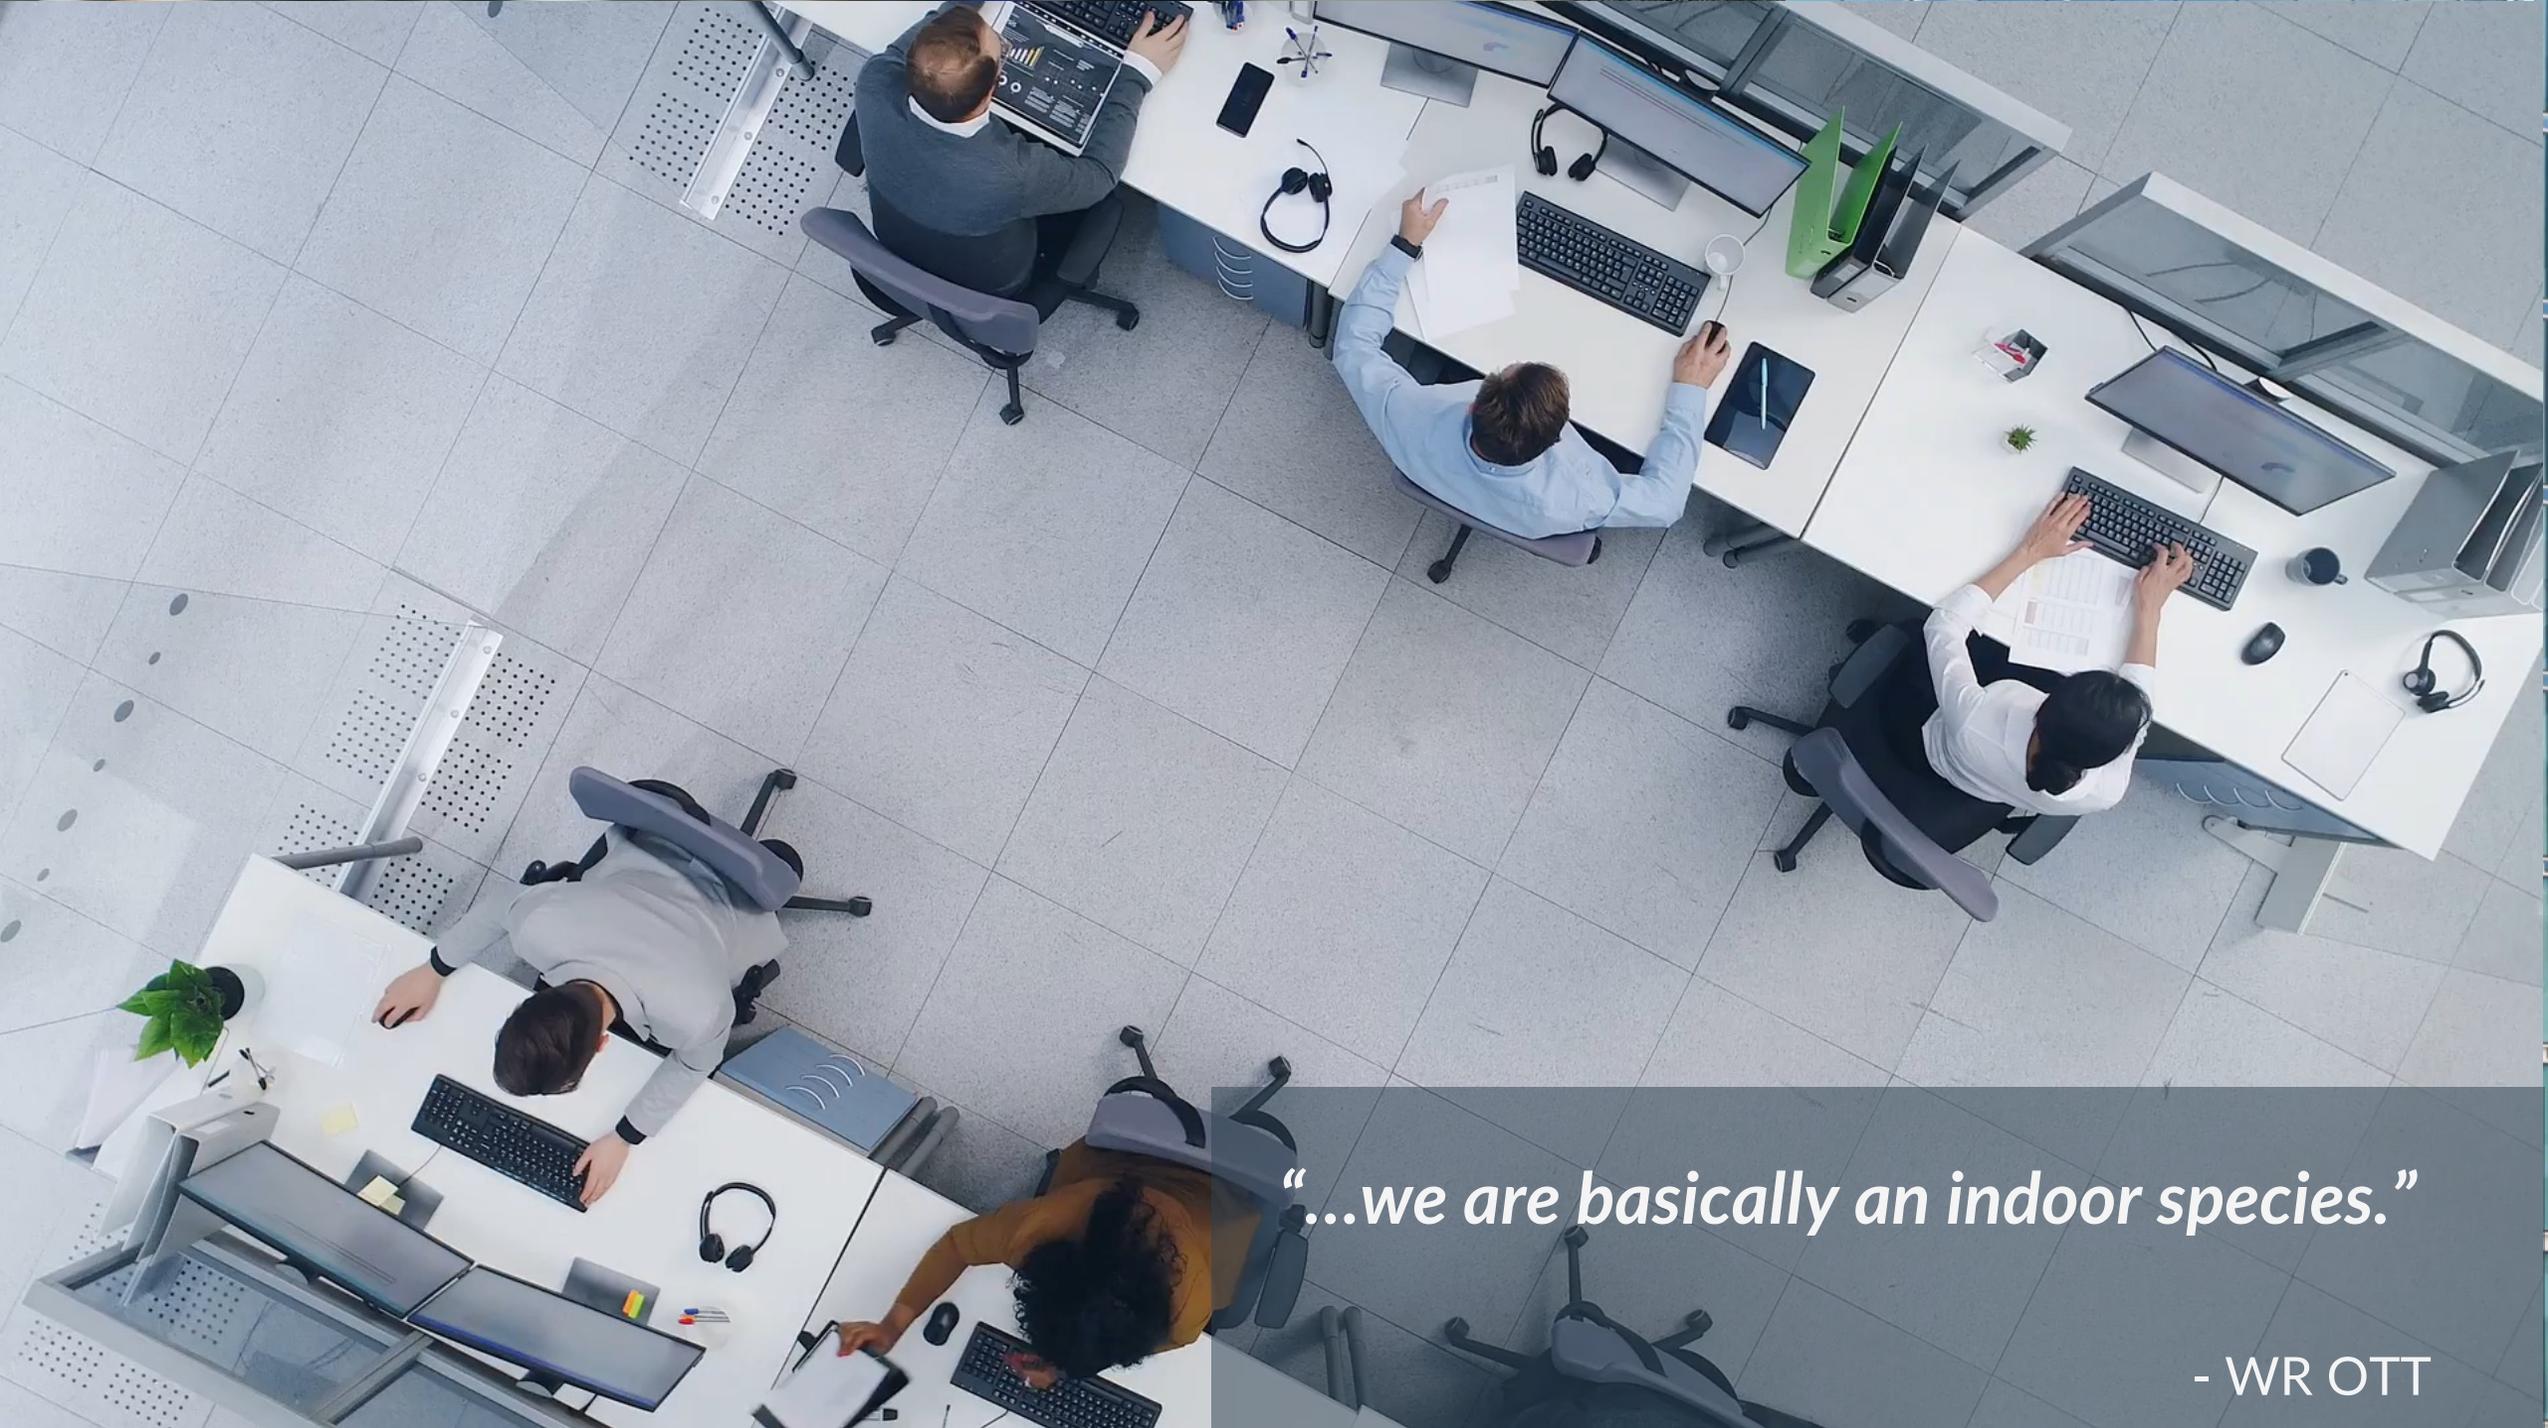

3

**Getting Started**

4

**Question & Answer**

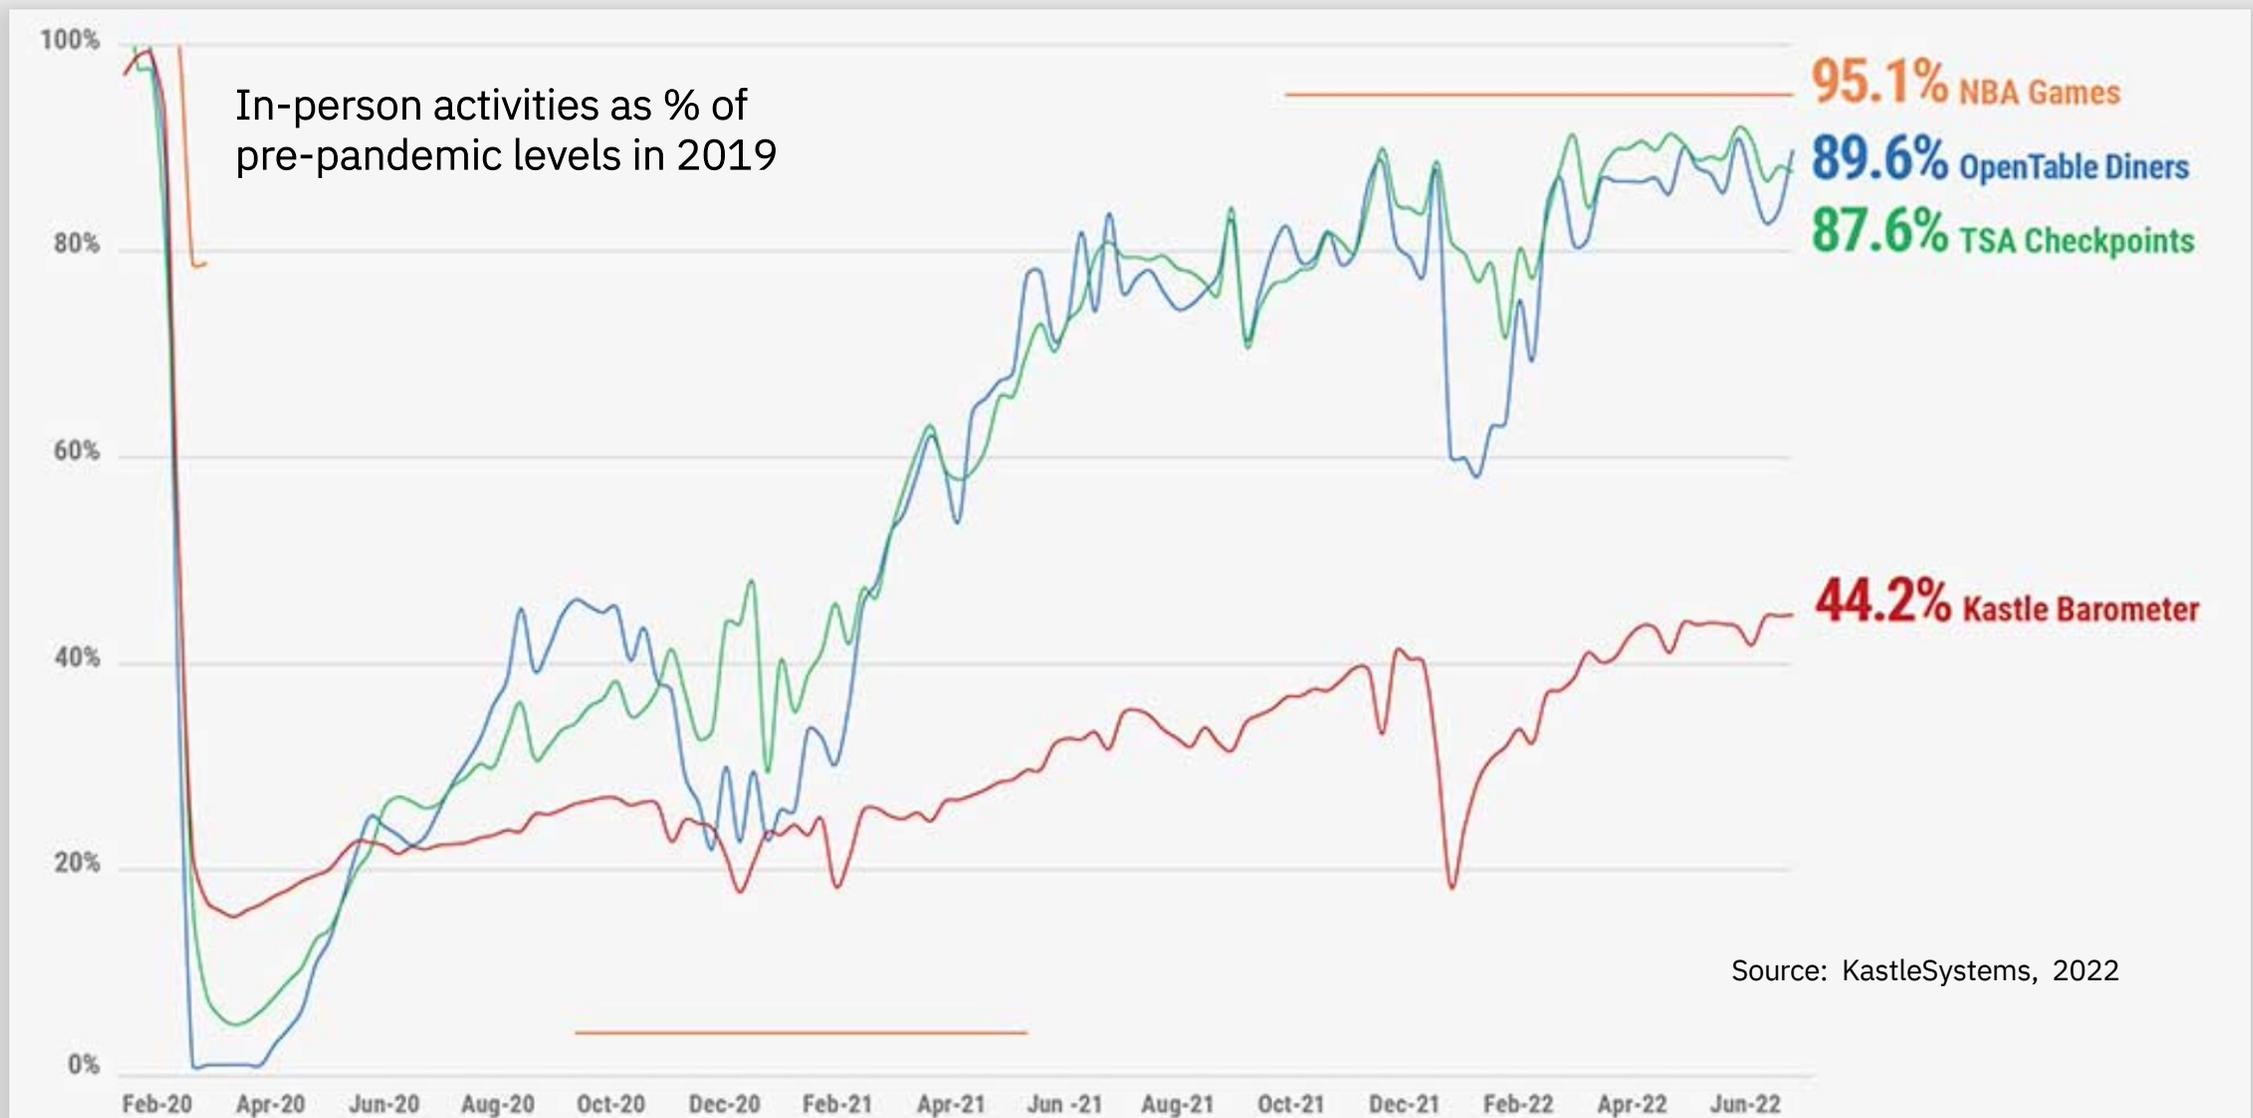

5

*“...we are basically an indoor species.”*

- WR OTT

While the “new normal” is apparent,  
office occupancy lags considerably

# Workforce needs have become a leading issue for executives to navigate

Enterprises are faced with the need to [attract and retain talent](#) as...

# 45%

of employees are looking to make a change, with the [“way they work”](#) being a leading cause of dissatisfaction

Source: Gallup, 2021.

Executives [want people in the office](#) as much as possible, as only...

# 12%

believe productivity is as high through remote work models

Source: Savills Research, 2021.

But...

# 80%

of [employees want flexibility](#) in how they work

Source: Slack Future Forum Survey, 2022.

...Enterprises recognize that improvements in [facilities, space, and services](#) boost employee engagement and help with retention

# Indoor mapping is increasingly becoming an expectation of the modern flexible workplace

**Facility Managers** need strategic, administrative and oversight capabilities to manage and tune how space is to be used efficiently

**Space Users** expect to access facilities and space seamlessly, to add productivity to their day rather than impeding work tasks

## Strategic

- Get more value from floor plan data
- Leverage automation and best of breed software
- Configurable workflows, maps, and routes

## Configurable

- Visualize entire buildings and campuses inside and out in 2D and 3D
- Identify important points of interest on the map
- Define safe and accessible routes for users

## Daily Usage

- Indoor maps and wayfinding
- Easily locate important spaces and points of interest
- Responsive designs for mobile, desktop and Kiosks

## Elevated Experience

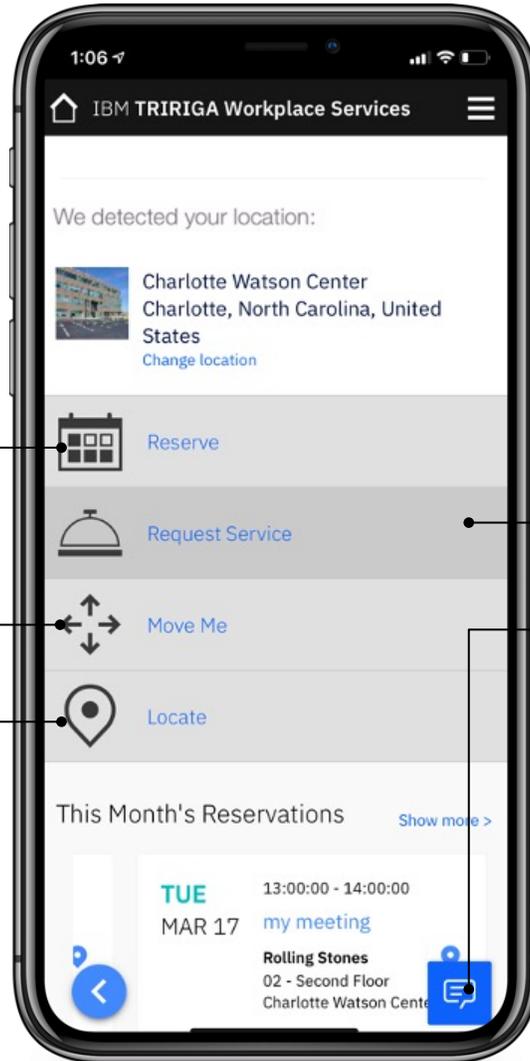

- Enhance employee experience with capabilities to help them understand the workplace and the available services more intuitively

# The workforce needs a **single solution** for daily space management needs

**Reserve** app enables employees to reserve individual work and team meeting space

**Move Me** app allows employees to self-select their assigned work location

**Locate** app enables users to find colleagues and rooms that can be **enhanced with Indoor Maps**

**Service Request** app enables easy work request submission

**AI Assistant** enables employees to access services faster through chat

Desktop / Tablet designs for the portal and apps provide a **responsive design** for power users on larger screens

# IBM TRIRIGA Indoor Maps

TRIRIGA Indoor Maps provides wayfinding capabilities for employees, service technicians & visitors

- Interactive maps allow users to search for rooms, spaces & people (based on allocation/reservation)
- Wayfind & navigate as user moves throughout building
- Travel modes allow users to choose walking or accessibility mode
- Points of interests allow user to identify areas of interest such as the canteen, restroom etc.

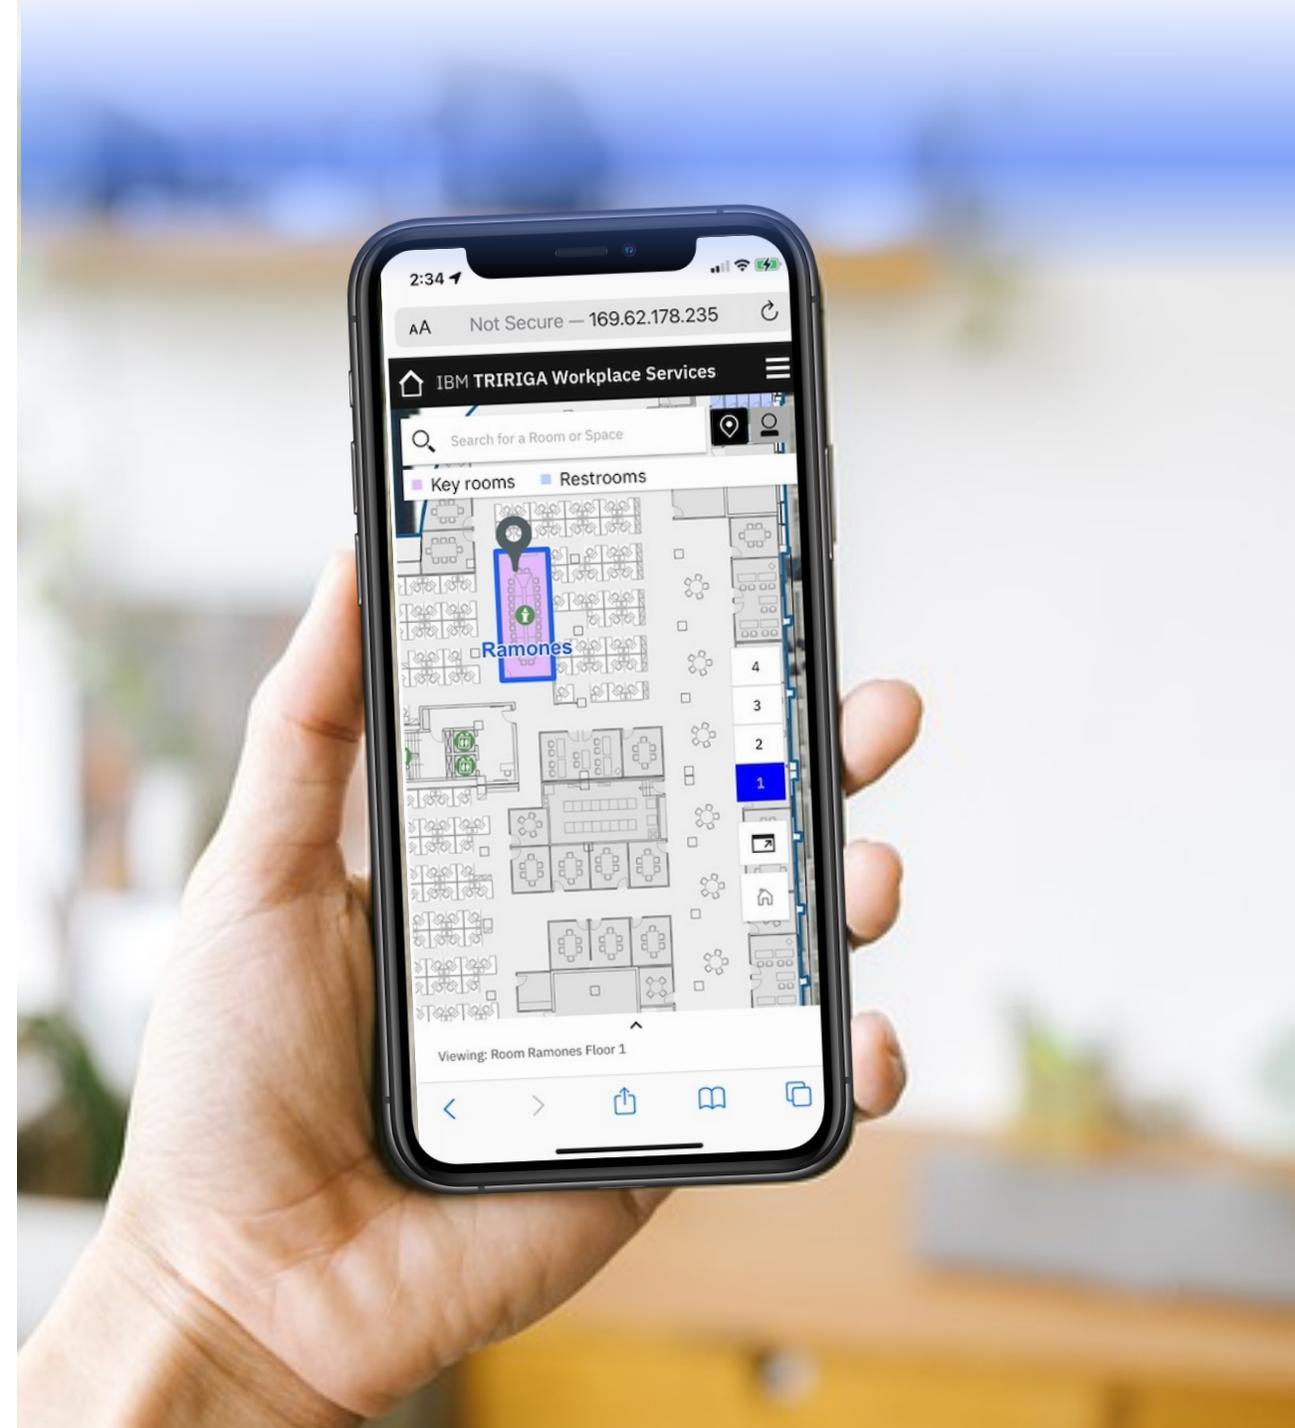

Powered by Esri ArcGIS Indoors, a set of tools and services turn your static floorplans into interactive maps

Responsive designs support mobile, desktop & kiosk modes

# Navigation and Wayfinding for employees & service technicians **on the go**

- Users quickly orient themselves, find what they are looking for and plan their route
- Mobile allows user to navigate as they move throughout the building or campus
- Creates efficiency as fastest routes are suggested
- Improves workplace experience by providing tools that allow users to be productive

# Interactive maps for building users & visitors

- Kiosk mode allows for starting point to be pre-defined
- Users can identify where they are in the building right now
- Generally placed at entrance to building and on each floor
- Always on display, with no log in allowing all building users to interact
- Reduces confusion for visitors

# Integrated Solution Architecture

Floorplans in CAD or BIM

Space Data in TRIRIGA

Indoor Map in TRIRIGA Apps

Geospatial Model in Esri ArcGIS Indoors

# Floorplans

Floor plans are defined using CAD drawings or BIM models. They are the basis of space data in TRIRIGA and the indoor maps.

# Space Data

TRIRIGA ingests building and floor plan data and creates space hierarchy model of the entire facility

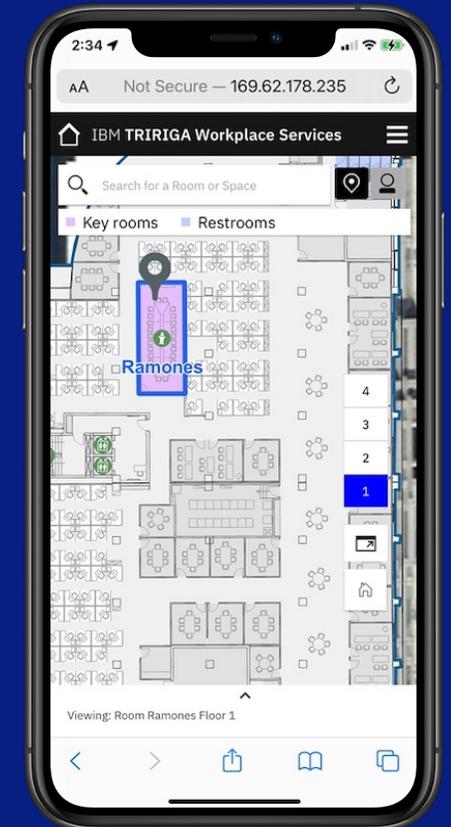

# Geospatial Model

ArcGIS Indoors produces a geospatial model and routing pathways across the entire facility or campus. ArcGIS Indoors has 2 components that work together ArcGIS Pro and ArcGIS enterprise.

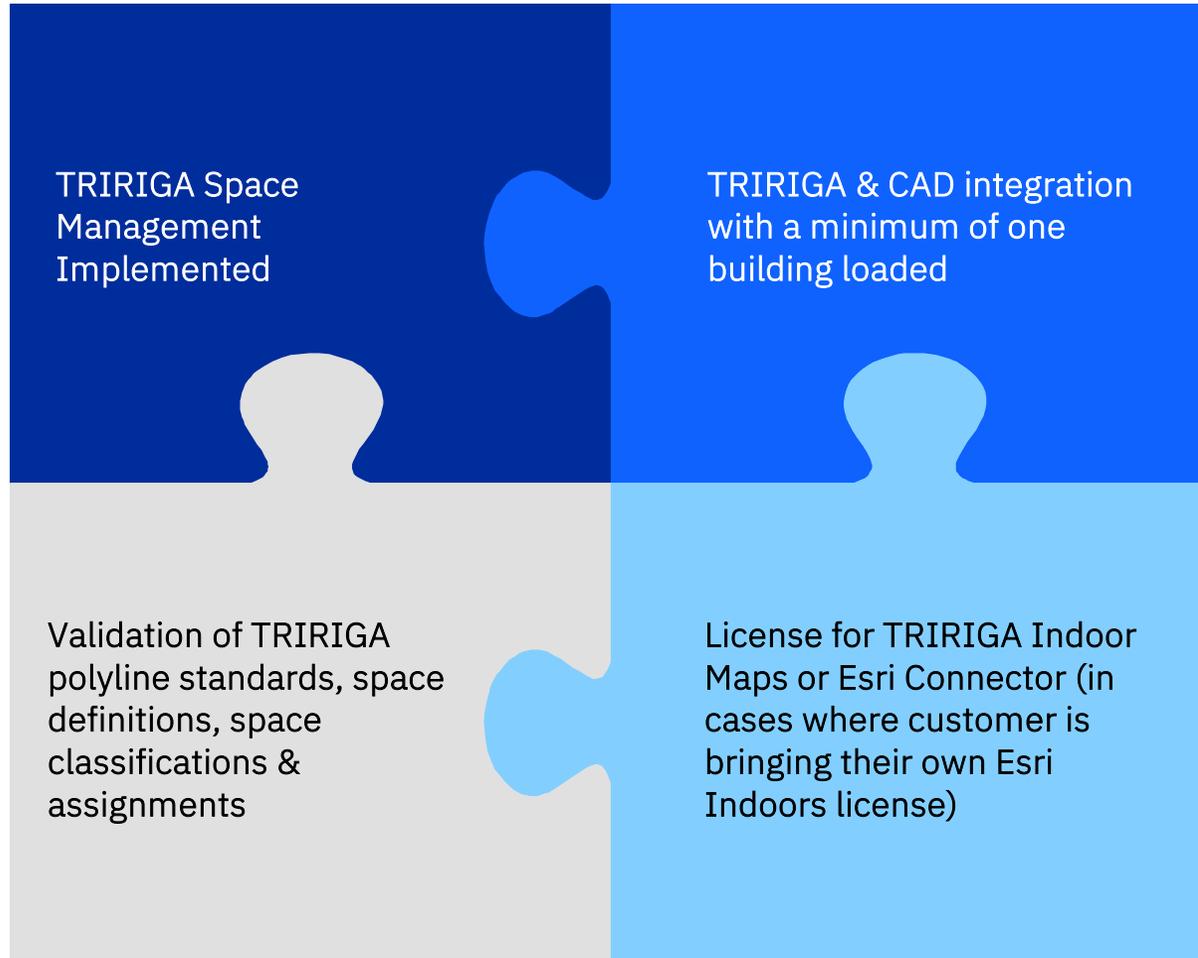

# Indoor Map

Connector for Esri ArcGIS Indoors enables interactive maps and wayfinding within TRIRIGA perceptive apps.

# Pre-Requisites for Getting Started with TRIRIGA Indoor Maps

These steps highlight requirements and validations to be completed to start deploying Indoor Maps

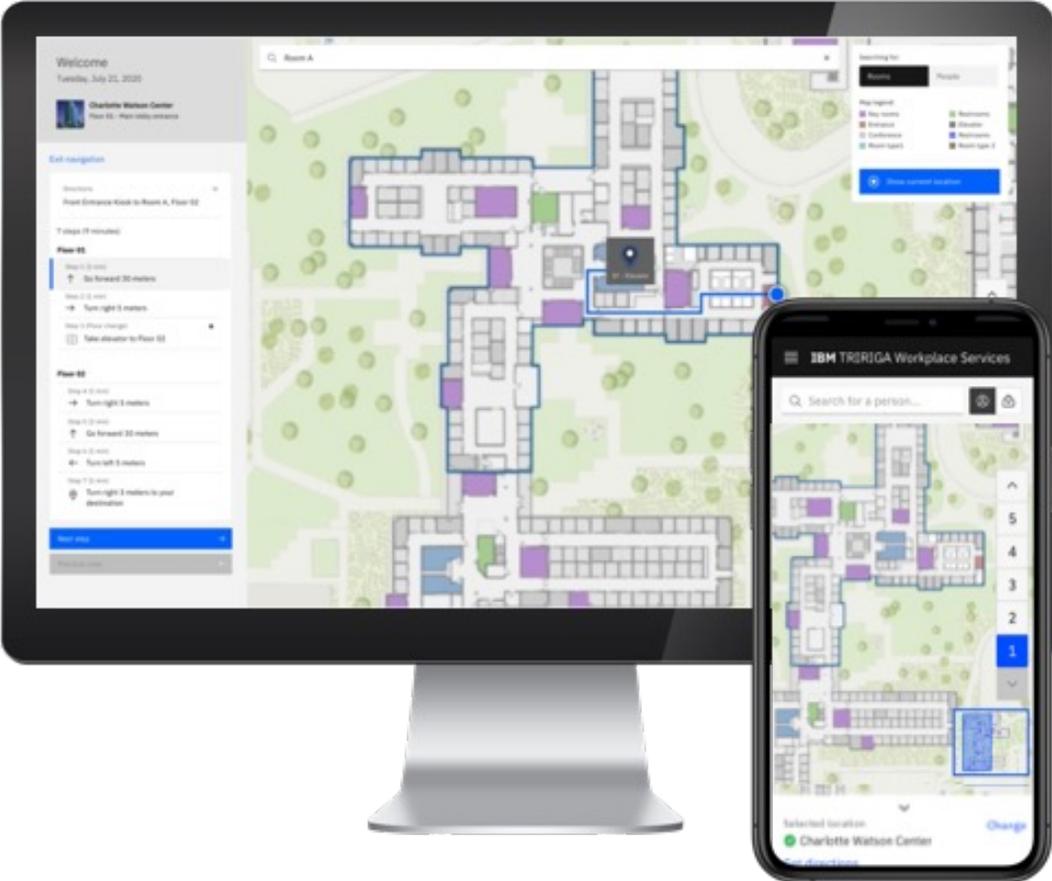

# Implementing TRIRIGA Indoor Maps

Start with a pilot & replicate at scale

- 1 building
- Up to 7 floors
- 3 months duration
- 1 month:
  - Set-up, configuration & testing
- Month 2 & 3:
  - Validate & production strategy

# Demo

Thank you
