

Seven Super Secrets to Debugging on IBM Z

Chris Van Wagner
z/OS Systems Programmer

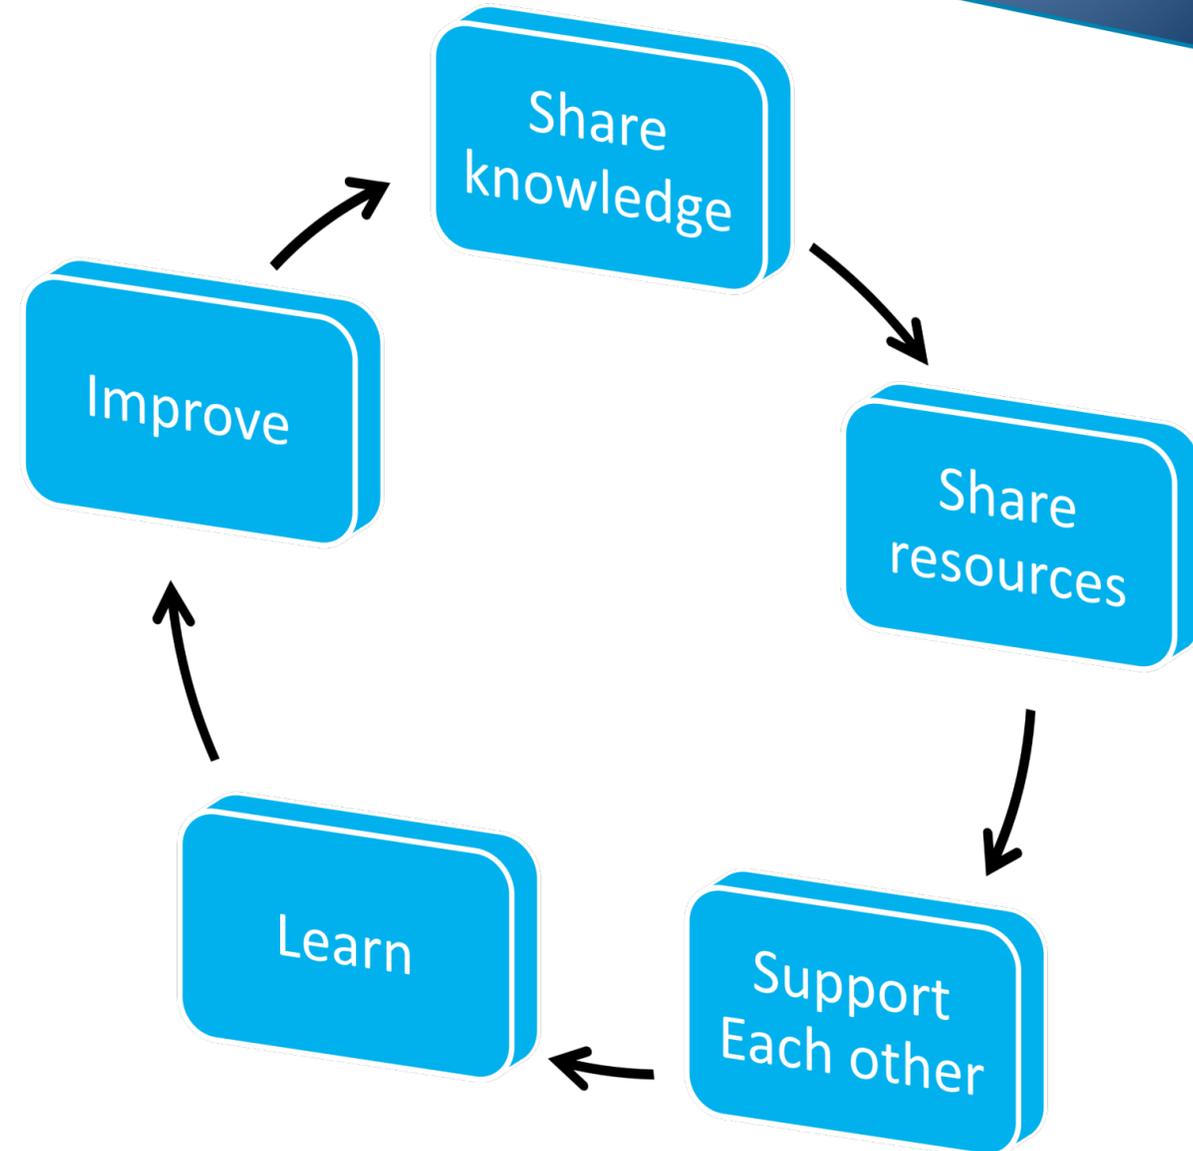

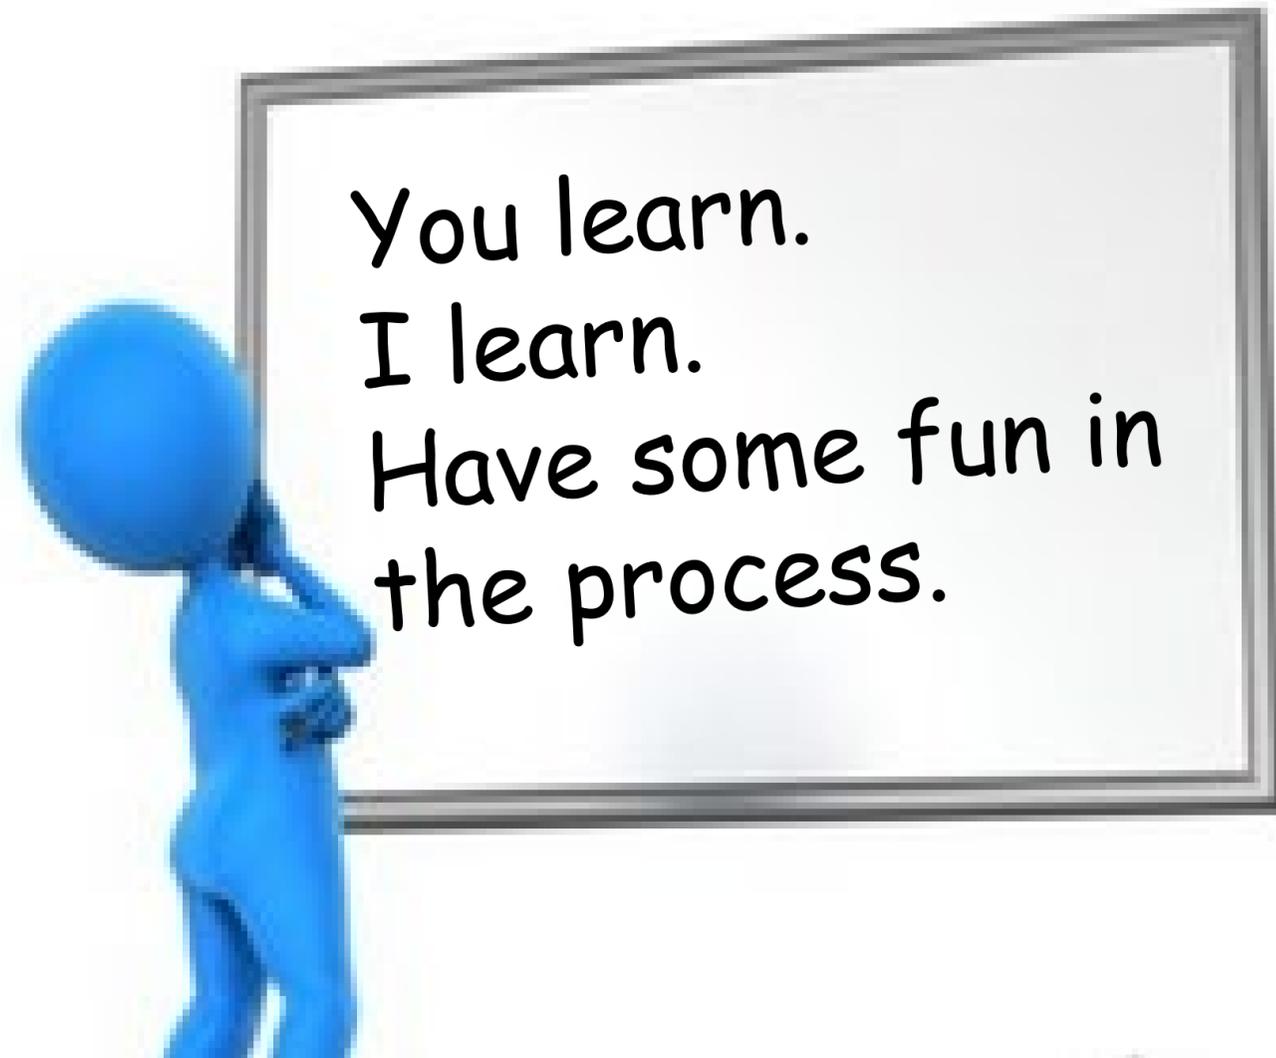

Agenda

- Background - What is a zSysProg?
 - Some context for this prez
 - How I am learning and developing
- Secrets
- Closing

Expectations for this session....

Please feel free to ask questions!

What is a zSysProg and why is debugging important?

My zSysProg journey.... timeline

My experience:

6 months of deliberate, focused, on-purpose time to be functional

1.5 years to be competent

4 years to be well versed in breadth of z/OS topics

10 years to be the go-to-guy for z/OS

Malcolm Gladwell / Outliers:

“to become an expert it takes 10,000 hours of deliberate practice.”

June, 2021
5.5 years
Expert level improving.
much to learn.

IPL troubleshooting
RACF Administration
Storage Administration
Problem Solving Speed

My typical zSysProg Day.

Can you install PTF UI56183 for DVM? We need this by 3pm. Thanks.

My day

Proactive Work...

From: Christopher B Vanwagner/Poughkeepsie/IBM@IBM
To: [redacted]
Cc: [redacted]
Date: 04/06/2021 11:30 AM
Subject: zCX service maintenance

Hey Chris,

I have a request for you that is not urgent but needs to be done at some point when you have some cycles. We will need to have some zCX service maintenance applied to as well as the new Analytics workshop LPAR.

Here are a list of APARs that I would like to have on these 3 LPARs:
OA60303, OA60452, OA60513, OA60530, OA60920, OA60923, OA61001, OA61002.

Thanks in advance.

Proactive fire-fight 90%

Can you please create 30 lab userids with access to...

June 5th, 2021

10:24 AM **Sally** Can you please create an HMC userid for our team to activate / deactivate the Linux partition L101?

Some context; my debugging journey... ... and introduction to zSysProg work...

Began with a very small, very embarrassing, very eye-opening first step.

And I tripped and fell. Here's the story...

True story....On day 3 of my zSysProg journey....

Hey Chris, can you reset my password on z/OS?

Ummmm..... I'll try.

....30 minutes later....

I have to ask my mentor.

Sigh Newbies.....

Four days later.....

Hey Chris, can you reset my password on z/OS (again)?

Dude, you owe me lunch.

....10 seconds later....

Done. Your password has been reset to "4GETFUL".

Sigh zSysProg's.....

What does this reflect about my debugging situation?

Negatives

- No experience
- No process for debugging
- No understanding of basic nuts-n-bolts
- Inexperience with zSysProg doc

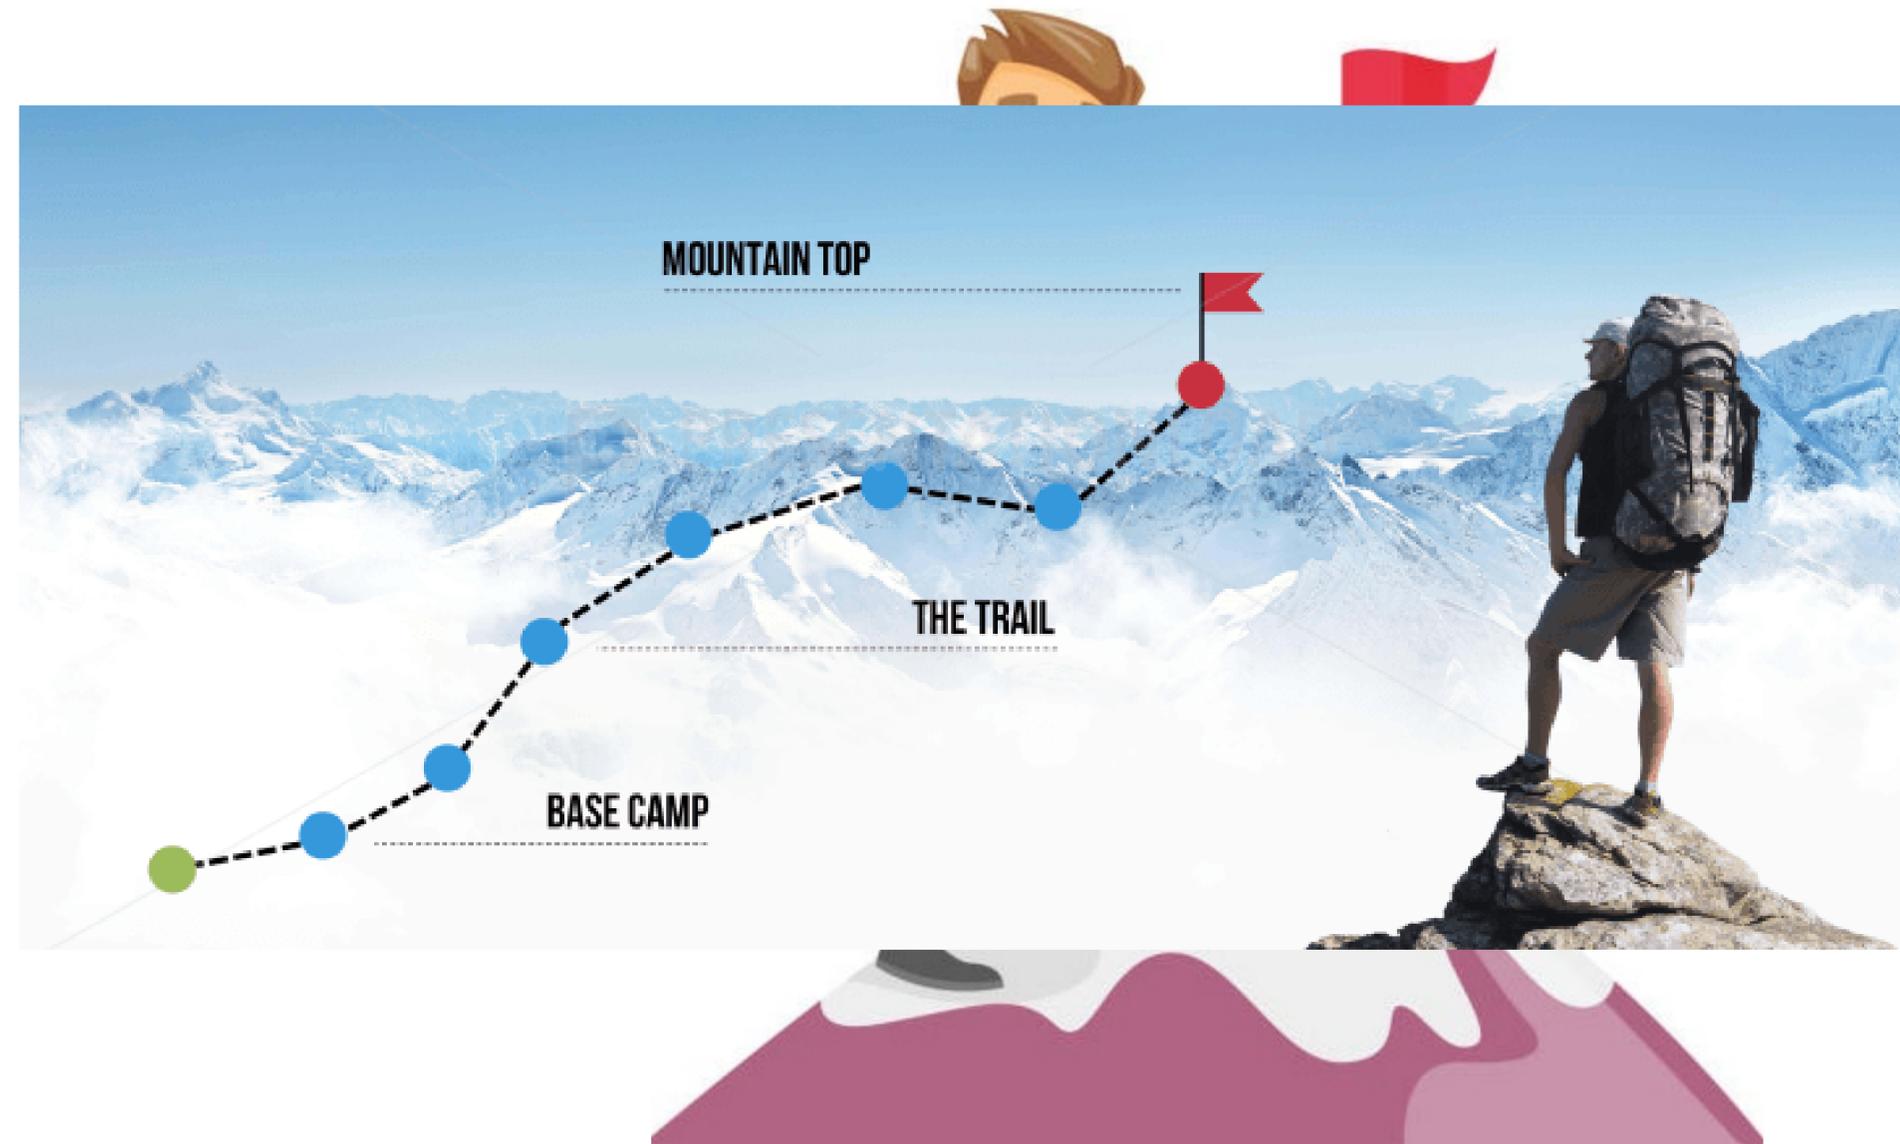

Positives

- Supportive Team – KEY!!!
- Start my own crib-notes document
- Start to develop a debugging process
- Gain experience
- Gain mentors

My rate of effectiveness with our team

How long will it take you to become a high-functioning zSysProg?

My #1 obstacle for progress....

FEAR

Lack of confidence
to get out of a jam

Wrecking a system

Letting down
my team mates

Inexperience leading
to accidental impacts

Fear.... A healthy thing....

All veteran zSysProg's have **HORROR** stories.

Let's hear 'em...

I made a RACF change that prevented TN3270 from starting. Next IPL, PCOMM would not start....

My mentor.... Dynamically activated an IODF change. Hit <enter>. PCOMM goes blank.

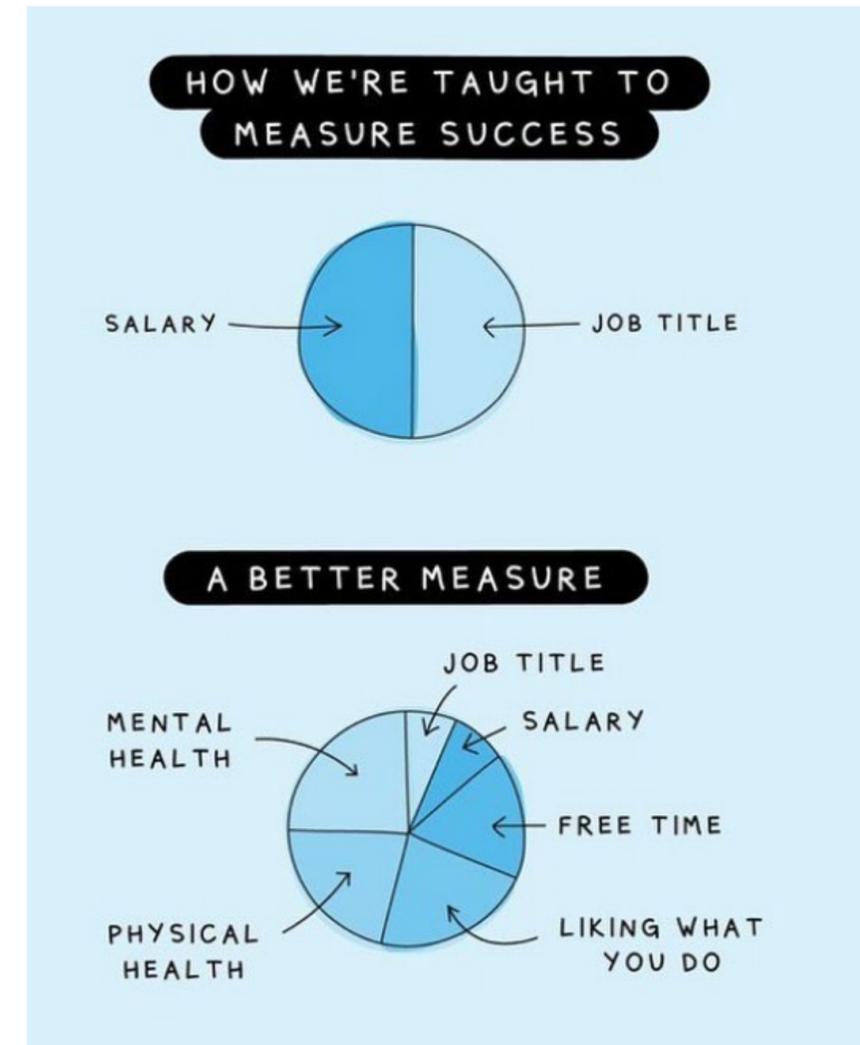

Know a guy who did RACF cleanup and deleted TCPIP.** profiles.

Know a guy who "restored" a customer's DB2 instead of making a copy.

Super Secret #1 – ATTITUDE!

- Deciding to get some sleep and continue debugging tomorrow is NOT giving up
- Sometimes, the journey is more valuable than the destination

Avoid the negative attitude trap

My Mentor and
POSITIVE influence

Story – TCPIP Nightmare

- May 2021
- Could not get
- Used my de
- Went to IBM

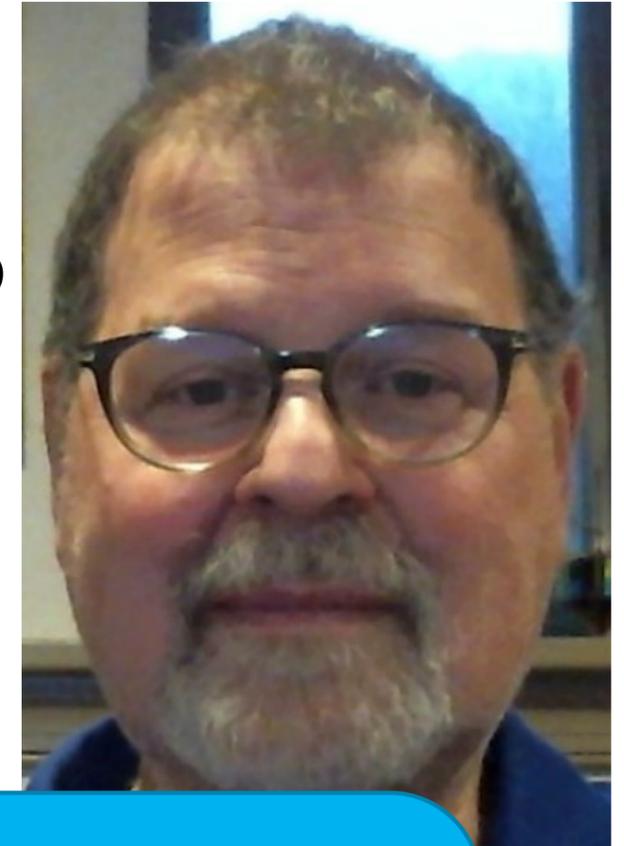

System action

The TCP/IP failed to initialize.

Operator response

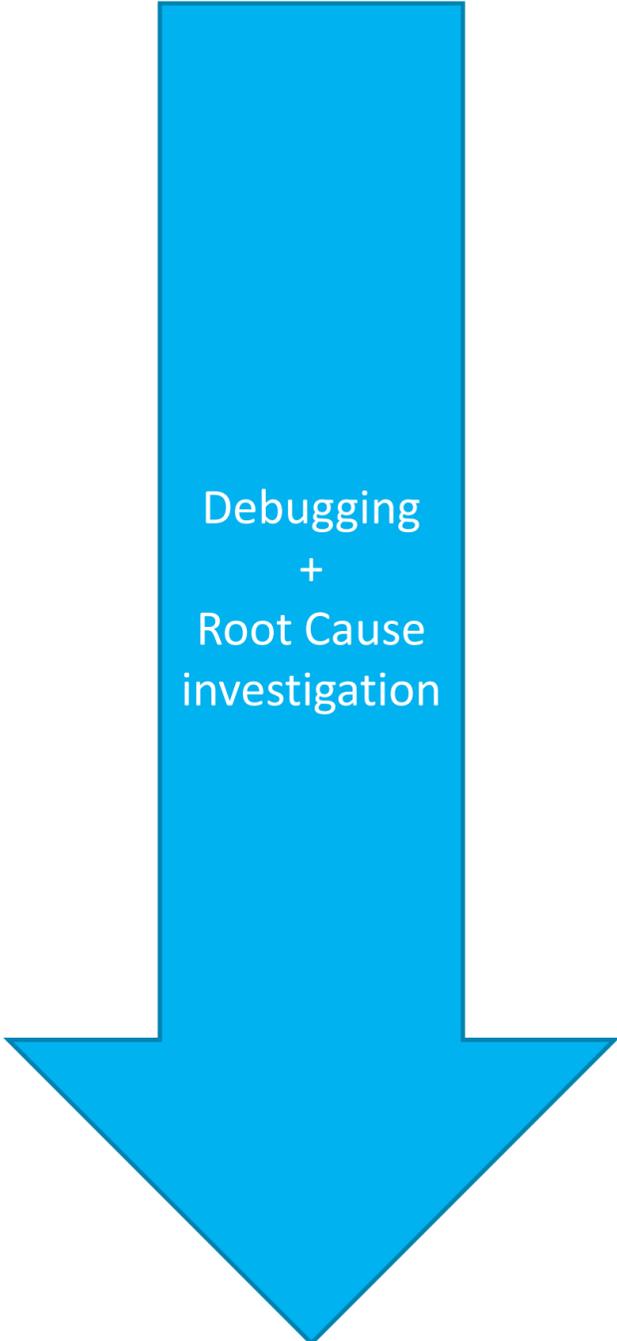

Contact the system programmer.

TCPIP

1. Reminded me of root cause analysis
2. Reminded me of my current attitude
3. Taught me some new tricks
4. Together, we solved the problem

TCPIP story continued... debugging

Debugging
+
Root Cause
investigation

✓	TN3270
✓	TCPIP
✓	VMCF
✓	Network settings (firewall)
	z/OS

Steps to foster a positive attitude

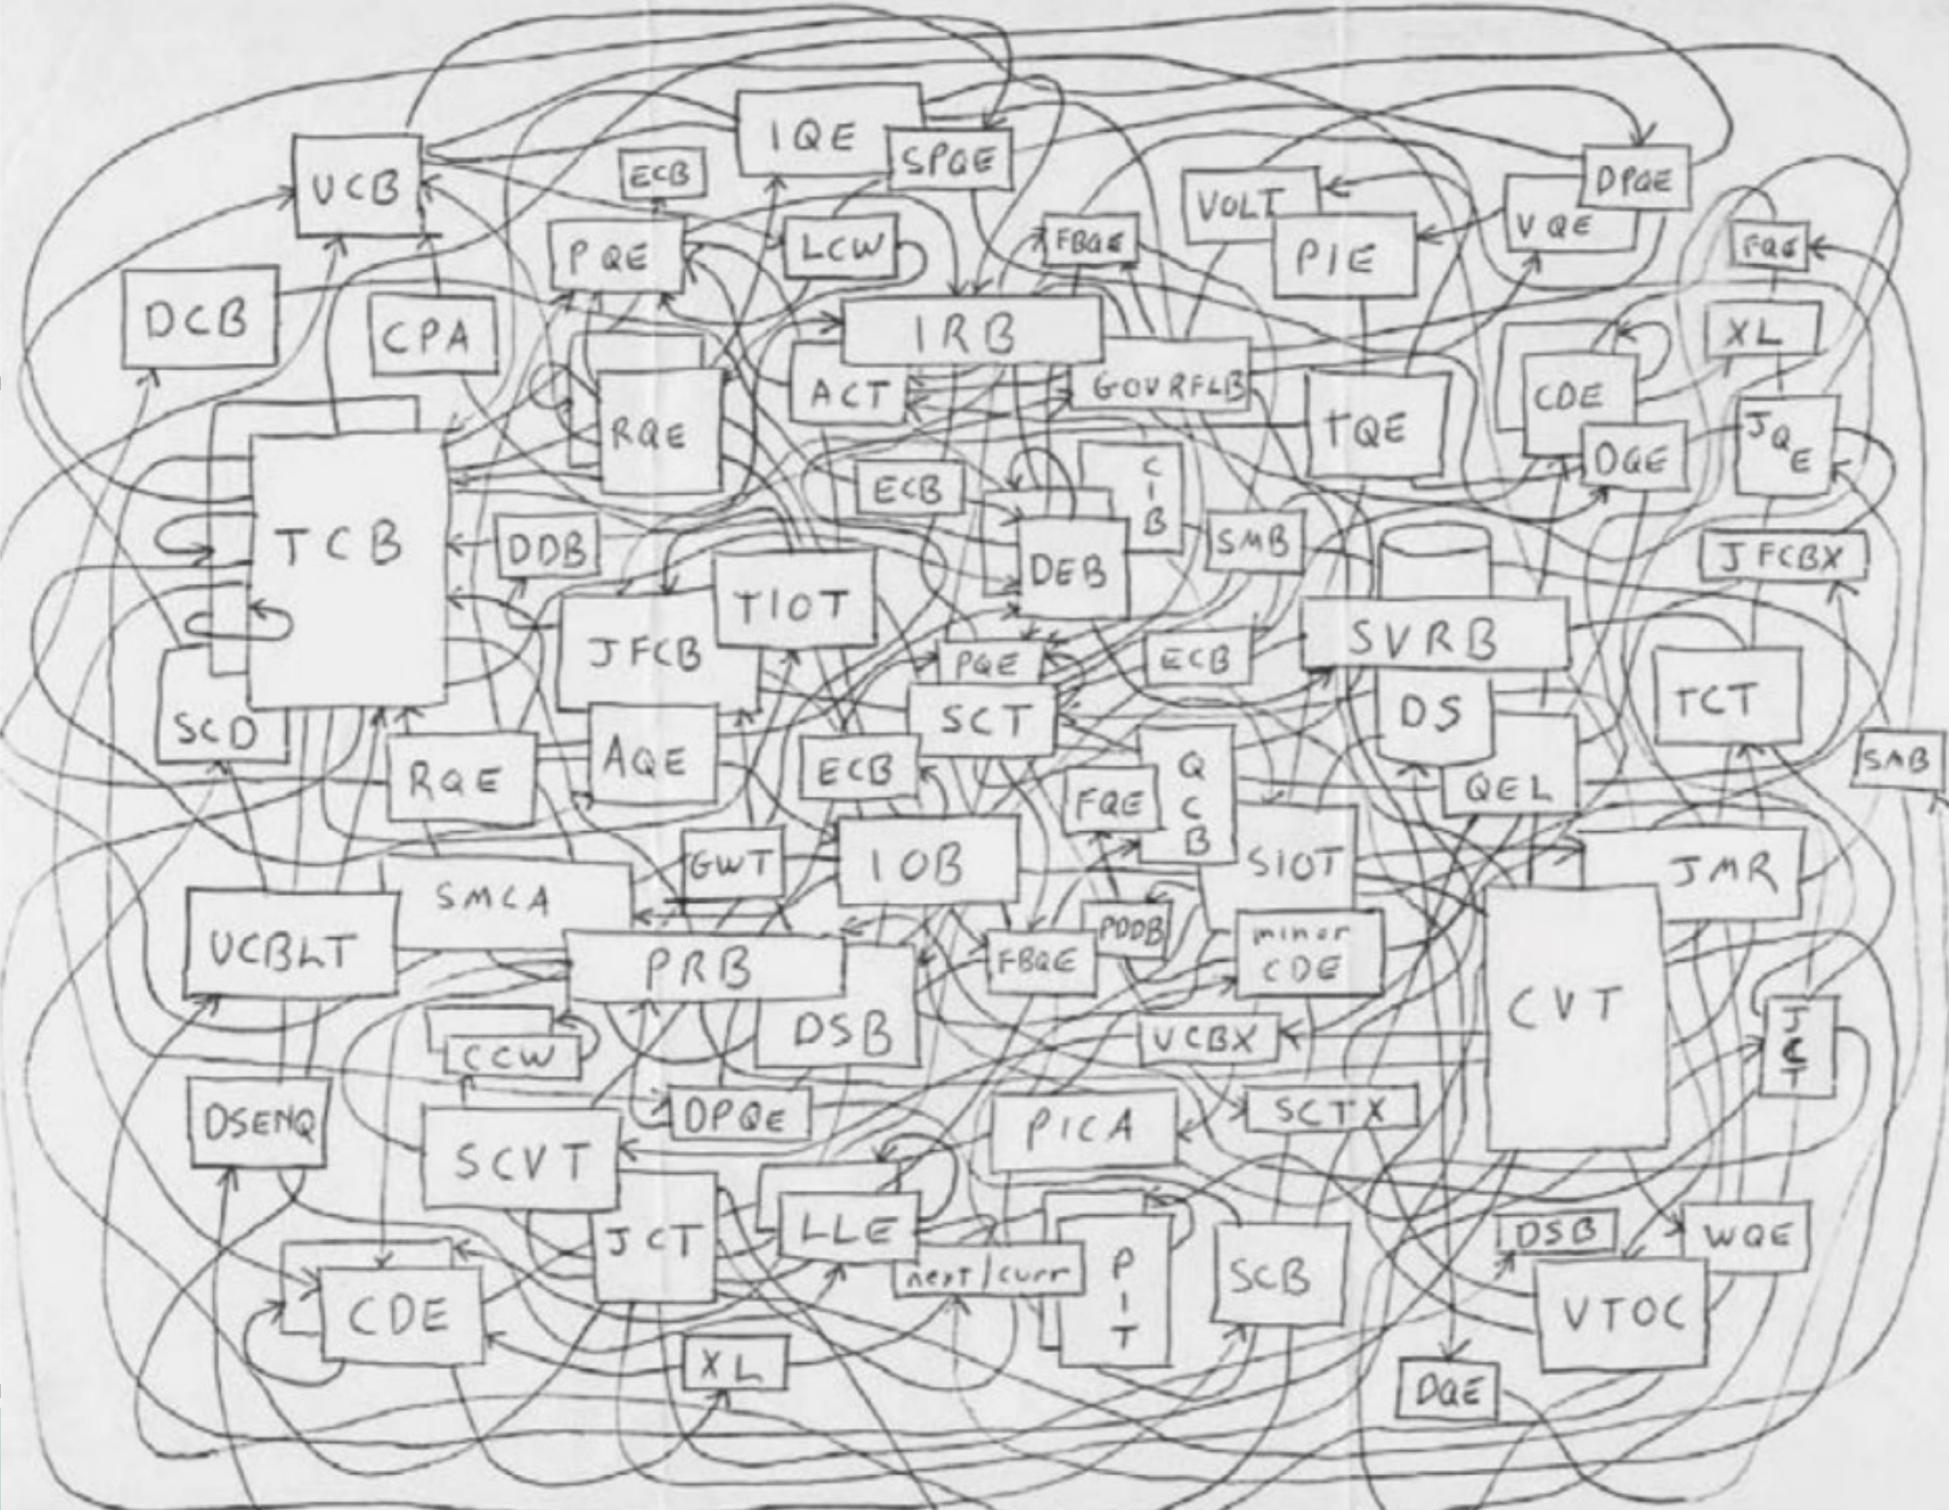

1. There are two wolves fighting; a good wolf and bad wolf. Which one wins?
2. Help others.
3. Solve the problem.
4. Find the humor.
5. Surround yourself with positive people.
6. Put your team first and listen to them. Practice the art of listening.
7. Sincerely say ‘thank you’ to someone each day (gratitude).
8. Use the “yes, but...” answer.
9. Stop complaining.
10. Smile

**CHANGE YOUR
THINKING!**

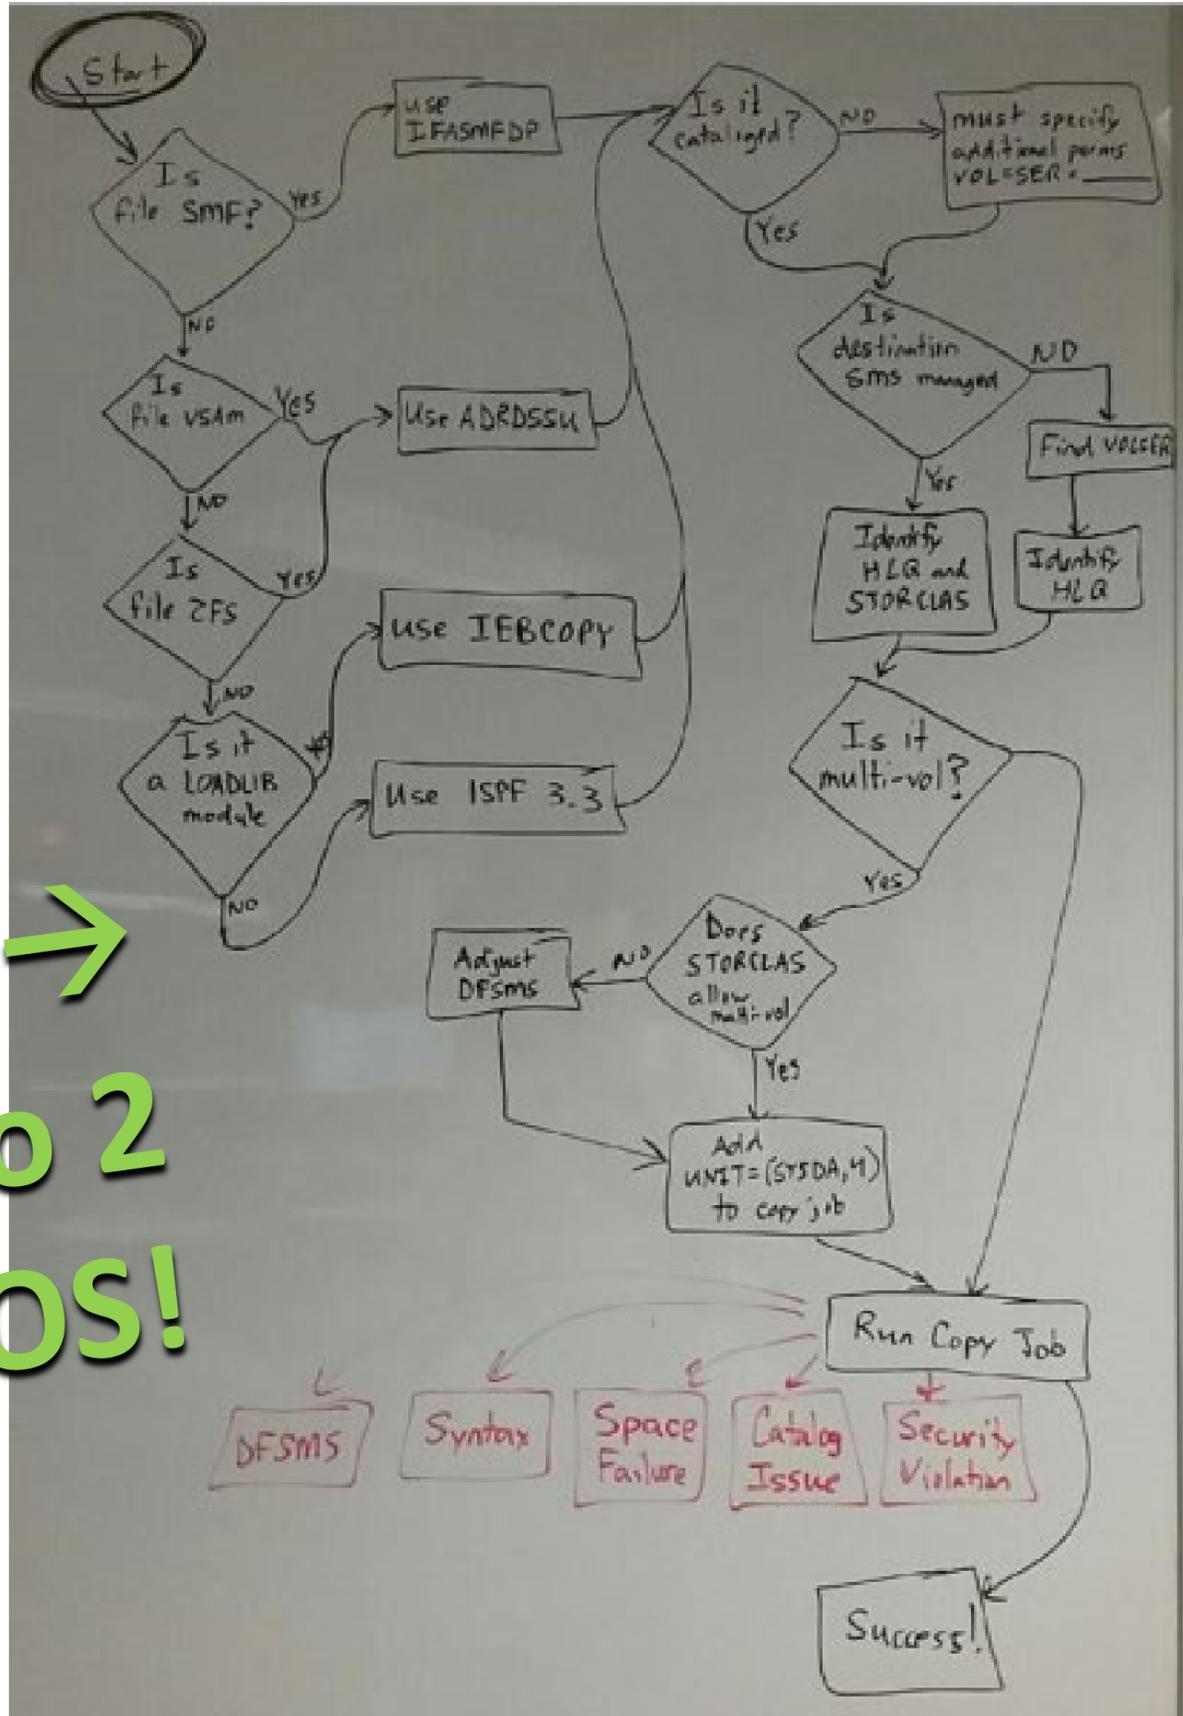

**BE THE LEADER
YOU WISH YOU HAD**

Super Secret #2

Set your expectations accordingly

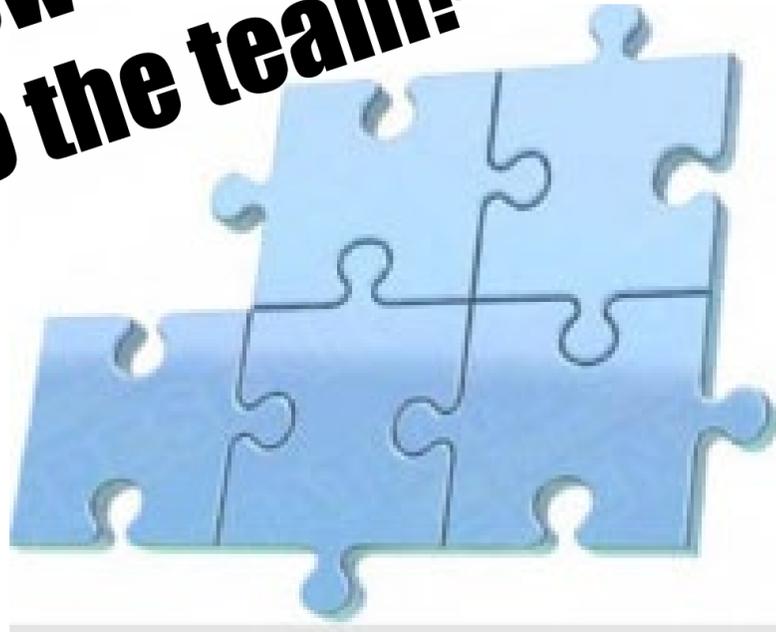

→
to 2
/OS!

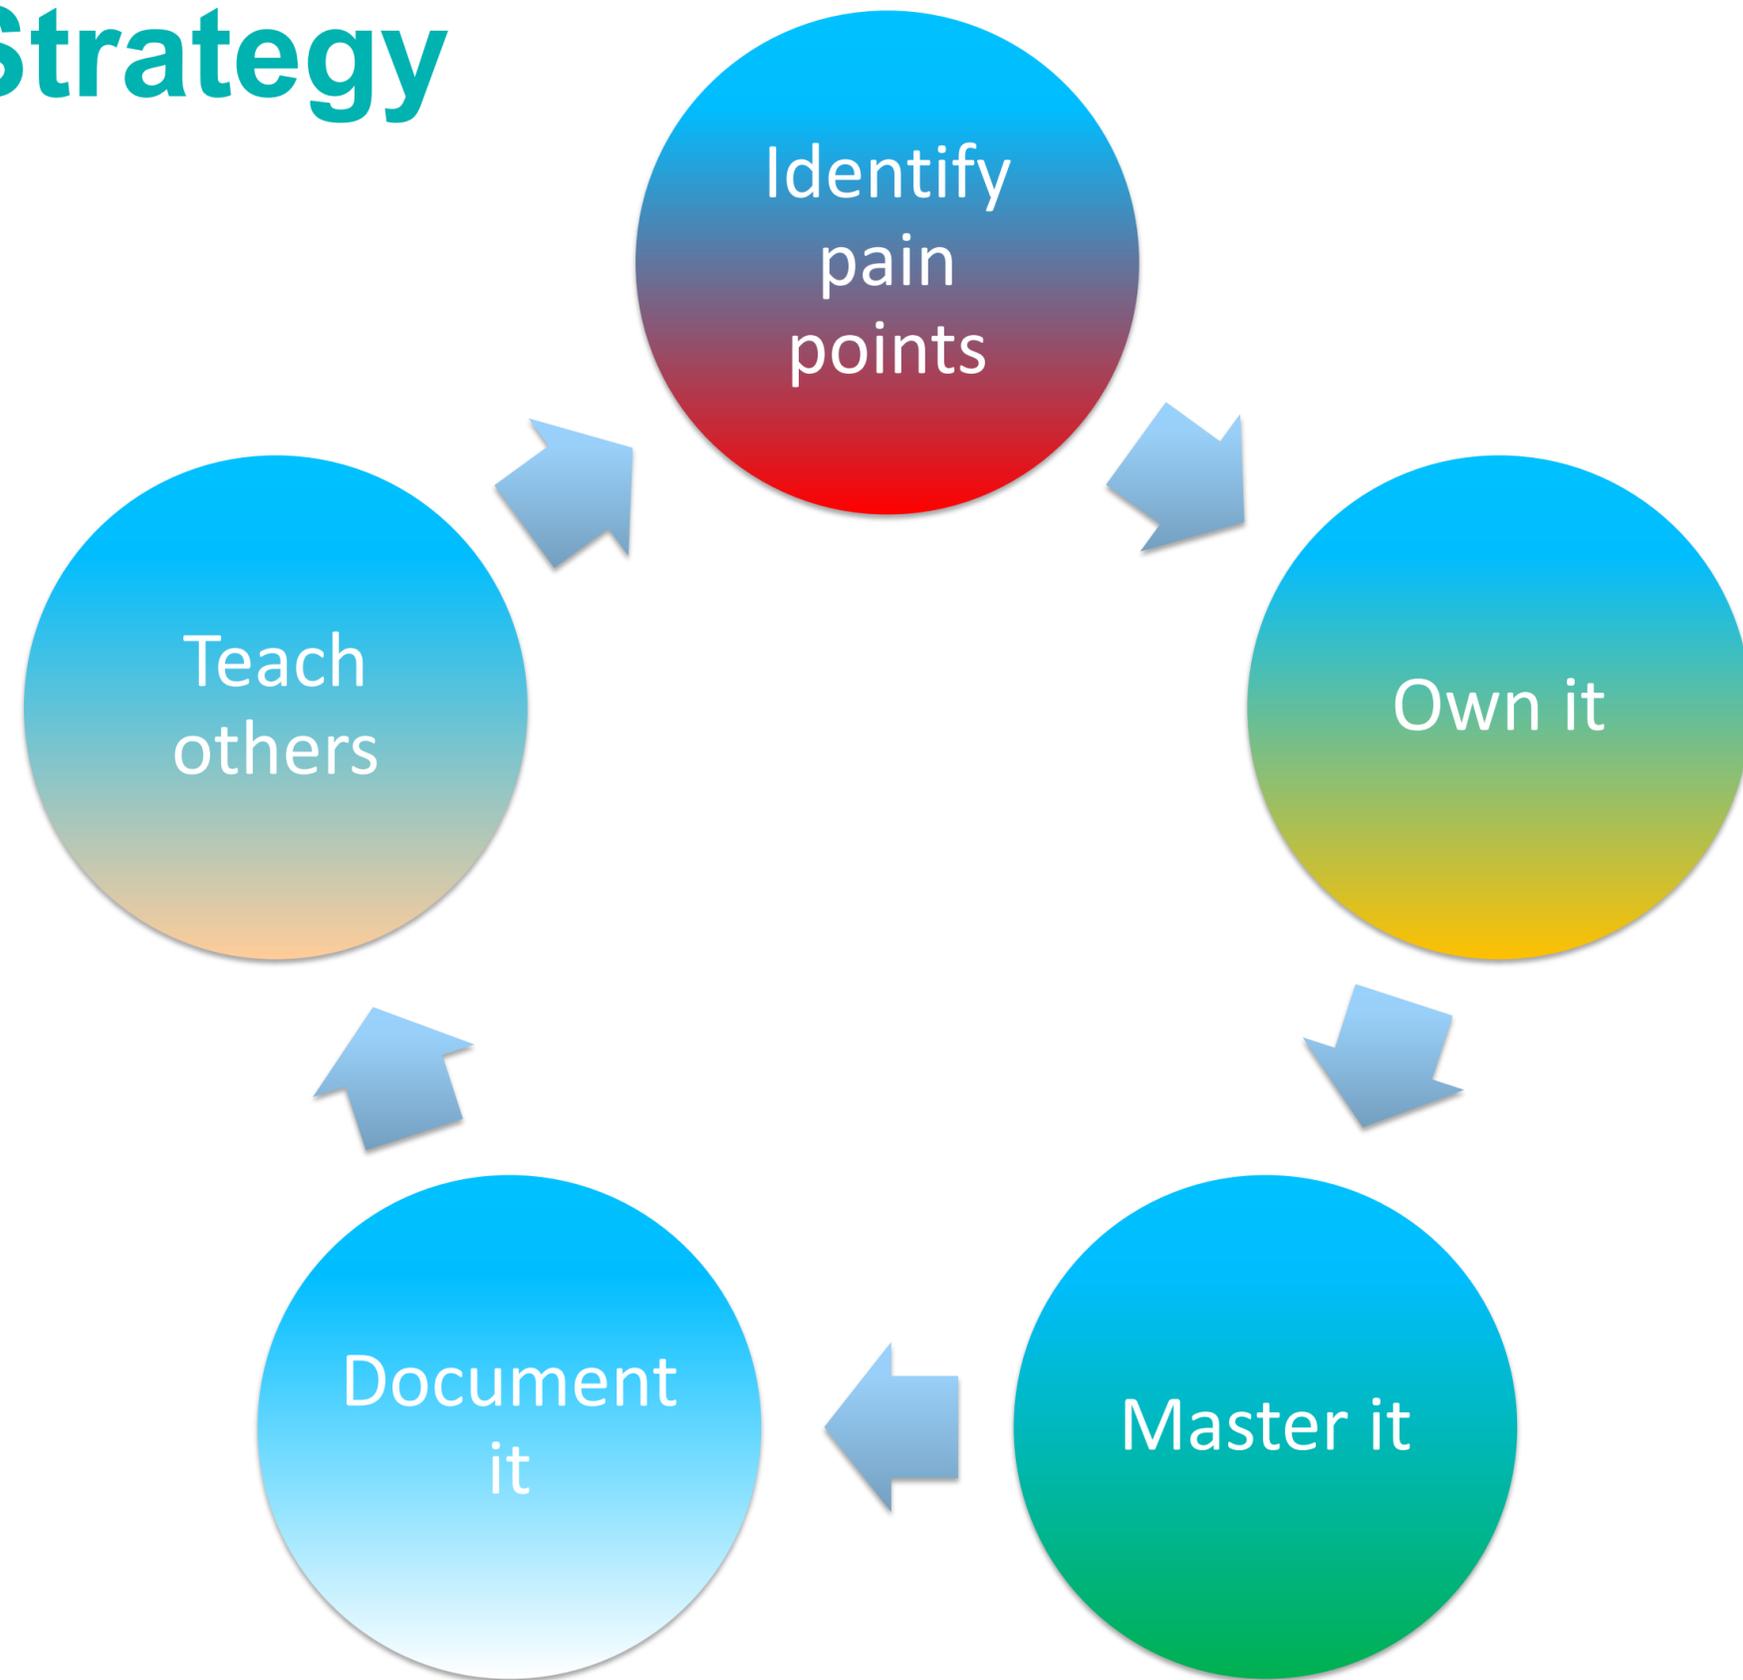

Super Secret #3 - Your Strategy

How do I fit in to the team?

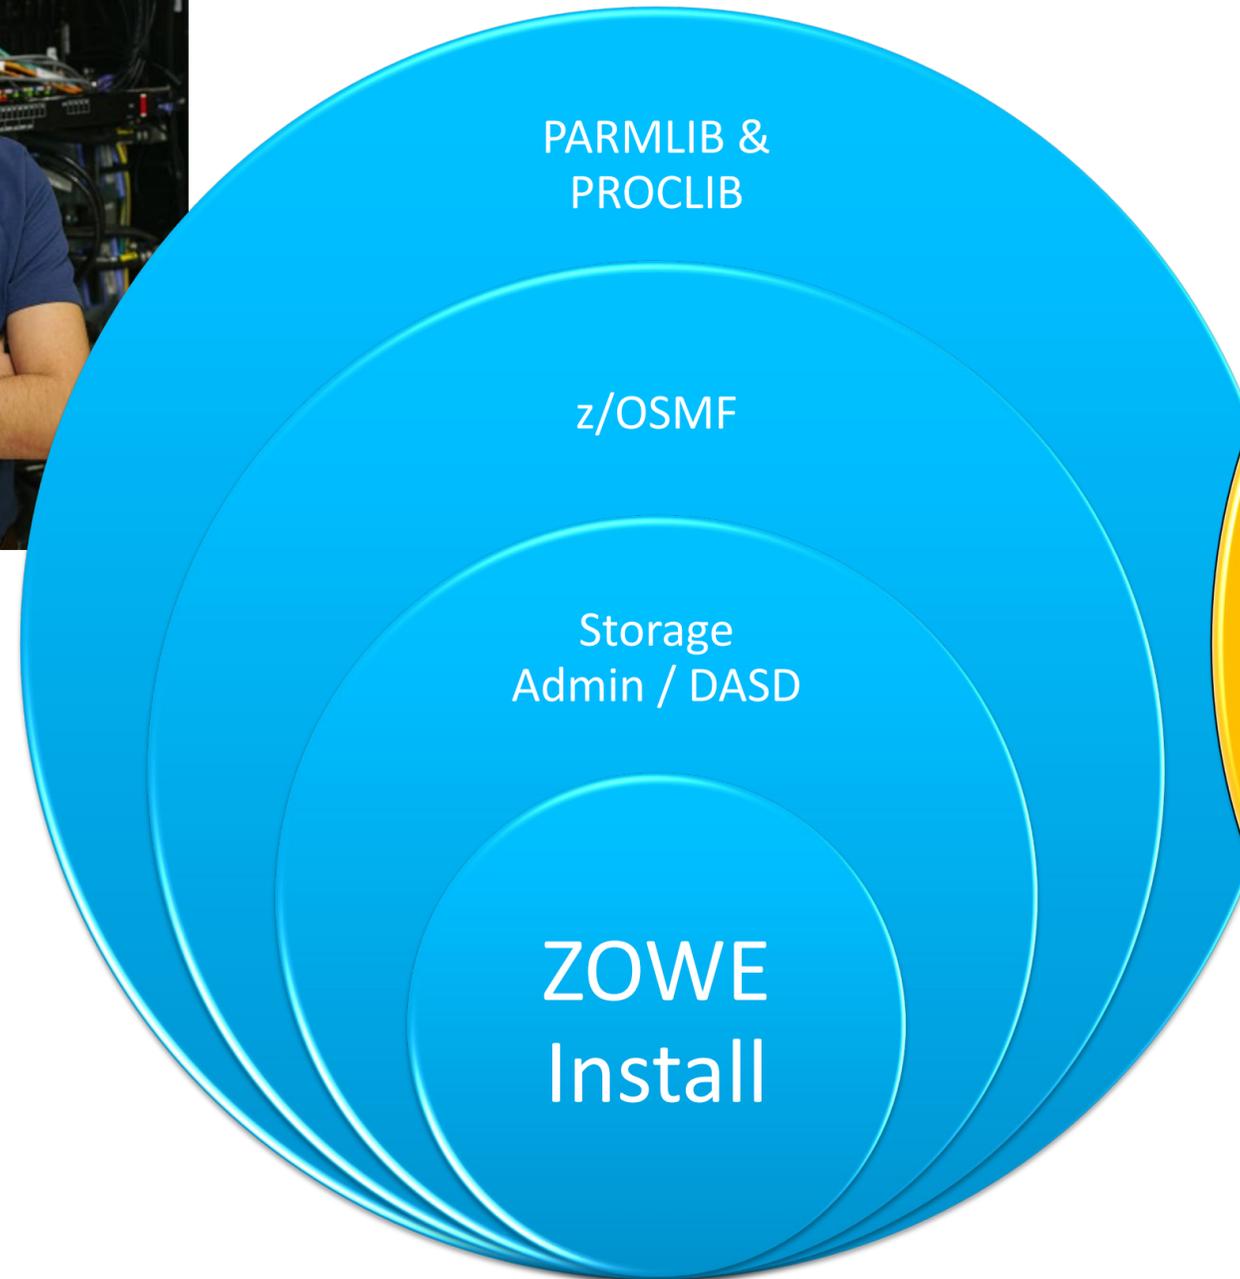

What How should I learn?

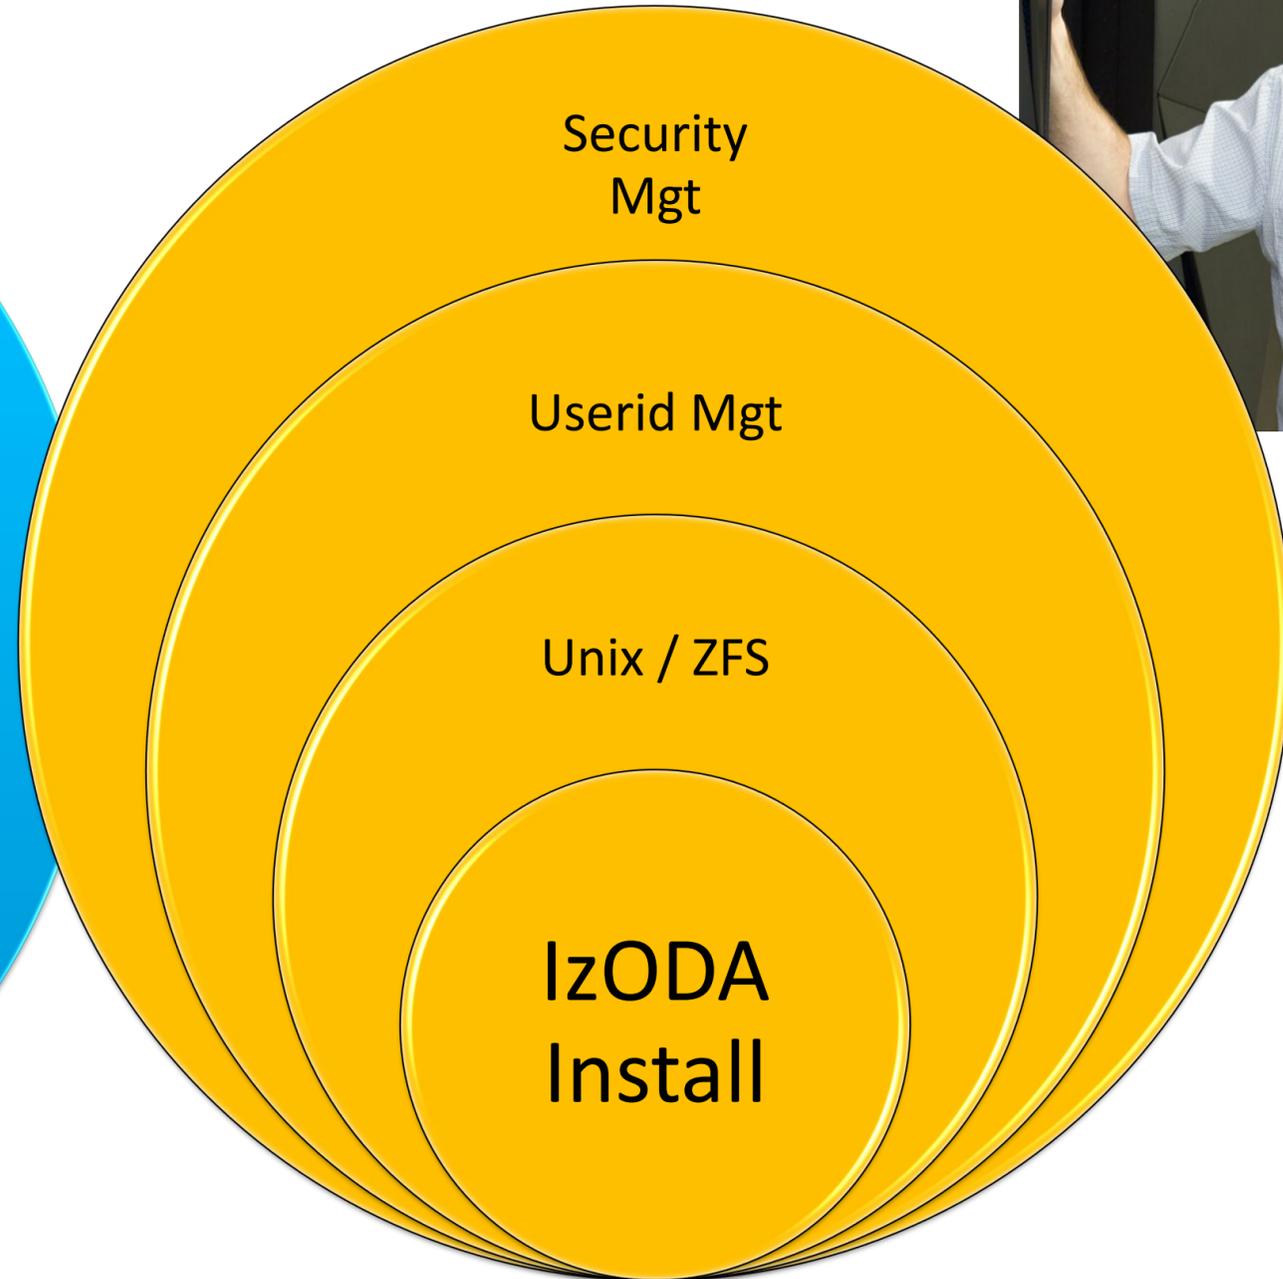

Super Secret #3 - Your Strategy

Example 1

Example 2

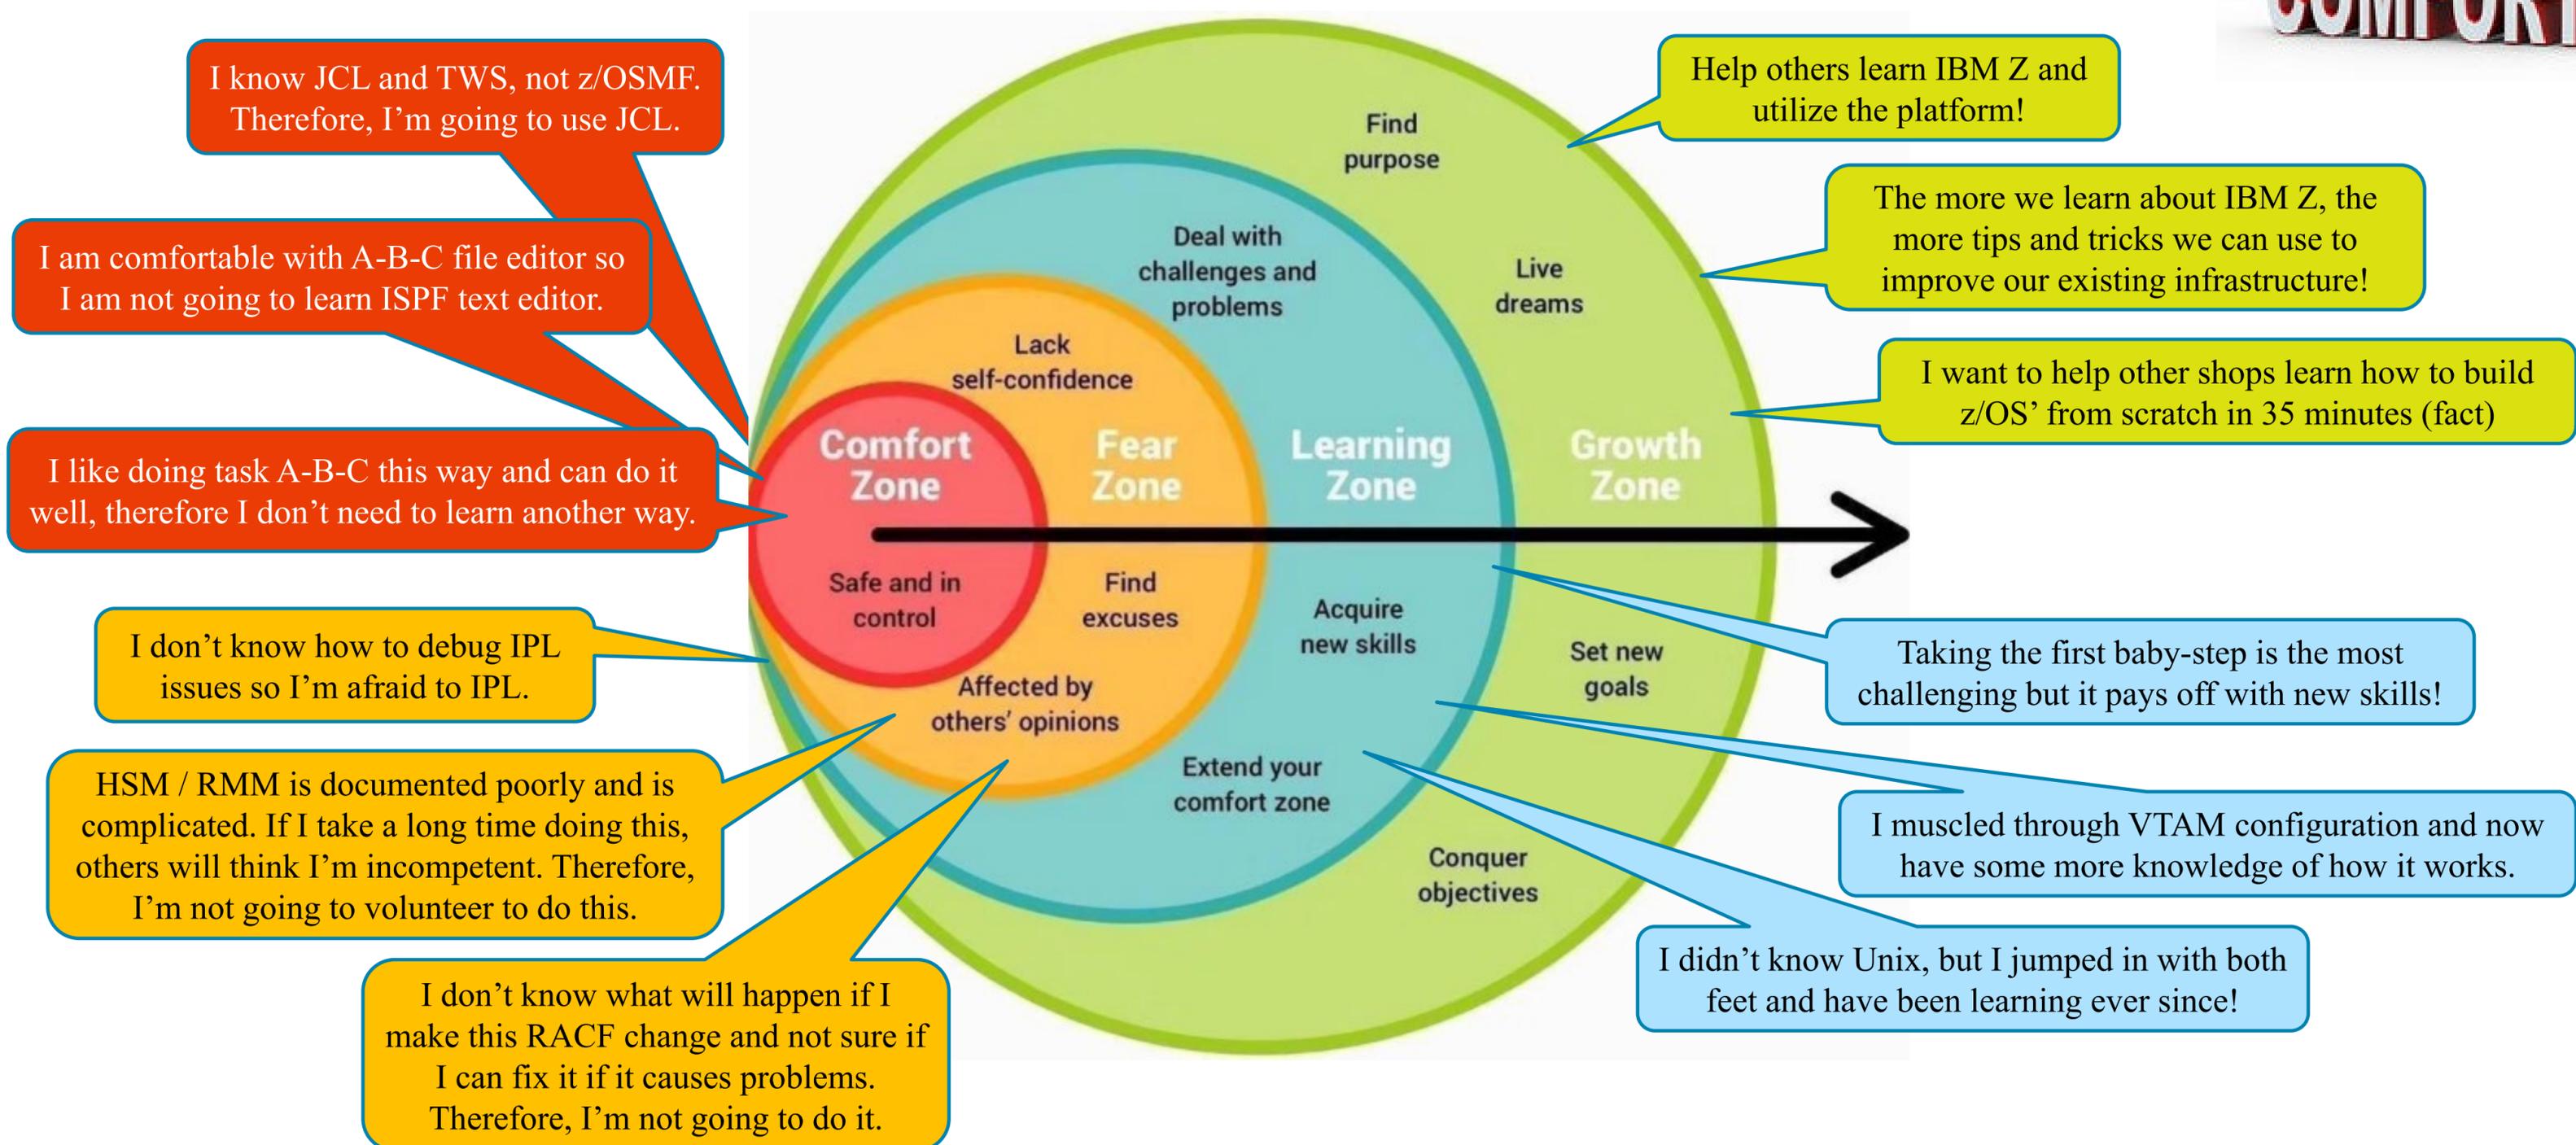

Your strategy for debugging

- What is the error message? Read it slowly again.
- Lookup message in IBM manual
- Check your personal notes / journal
- Check team notes / Box
- Compare to another system
- Google
- Mentor
- Don't sit there idle. Do something, anything! Generate the error again if you can. Query things.
- Write up the problem officially in true root cause format. Engage with team.

Super Secret #4

GET OUT OF YOUR COMFORT ZONE

Get out of your comfort zone!

Hardware Architecture	Storage	Z Base	Networking	Security	Operations	Middleware	Performance	Automation / Programming
Architecture	Architecture	z/OS Building	Architecture	Architecture	Automations	SMP/e install	SMF / RMF	JCL
Floor admin	DASD, TAPE, RMM	z/VM....	Port admin	RACF	Daily maint	Configuration	Omegamon	REXX
Server admin	DASD volser mgt	Linux-on-Z.....	TCPIP stack	Pervasive Encryption		Dependencies	Tuning	COBOL
Cabling	Flash-copy	Catalogs	TN3270	Userid admin		Tuning	SMT	PL/1, PL/x
Performance	DCOLLECT admin	PARMLIB/PROCLIB		Keyrings, certificates		PTF applies	Unix --vs-- TSO	PERL
Card admin	DFSMS admin	Logon Procs						Unix Shell scripts
		GDPS						Bash
		SYSPLEX building						Java
		DR						
		IPL						
		Unix System Services						

Get out of your comfort zone!

Super Secret #5 – Teamwork & networking

True story:

May 2019....

Stress
Test

Test

Test
again

m

Super Secret #5 – Teamwork & networking

Career Mentor

Meet 4 times a year

Team-lead Mentor

Meet once a month

Technical Mentor

1 hour per day!

Peers

Daily

There is no one perfect path! Pick your own!

You must learn these z/OS things, like I did 35 years ago. Then you'll be a perfect zSysProg like me.

- Team Core Deliverables
- Organizational strategy
- Skill Gaps

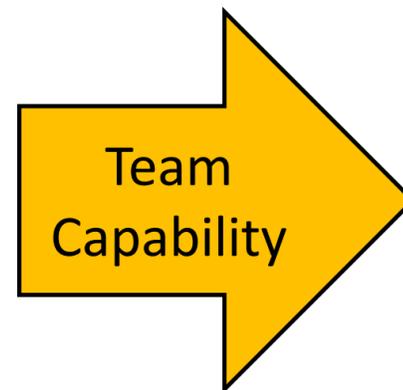

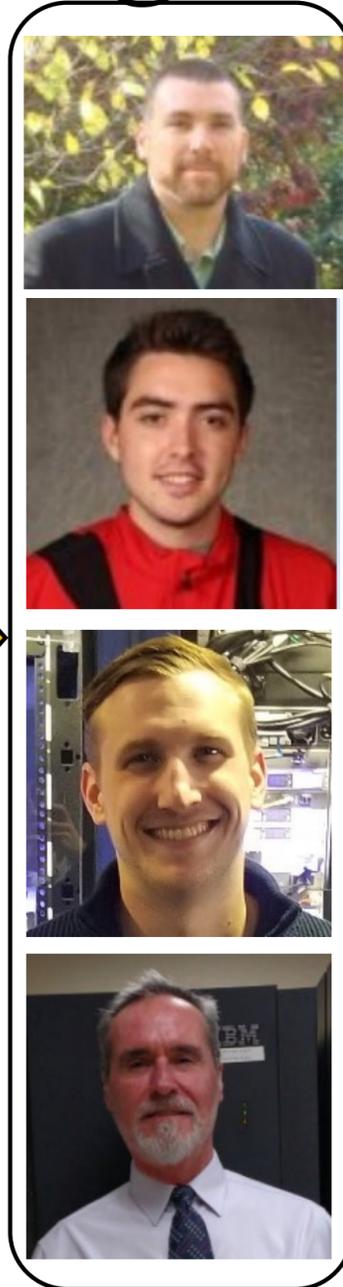

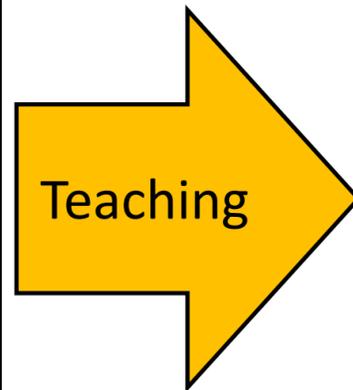

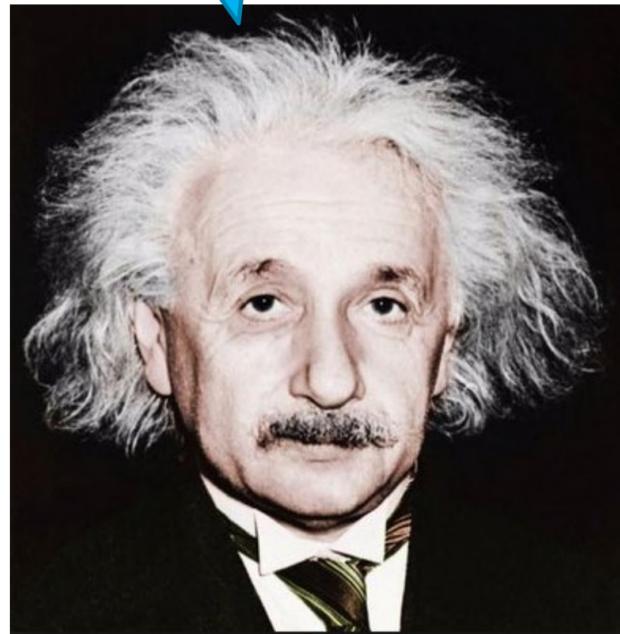

- My Personality
- Career Direction
- Likes / Dislikes

Super Secret #6 – Teach others & give-back

A gift that keeps on giving.

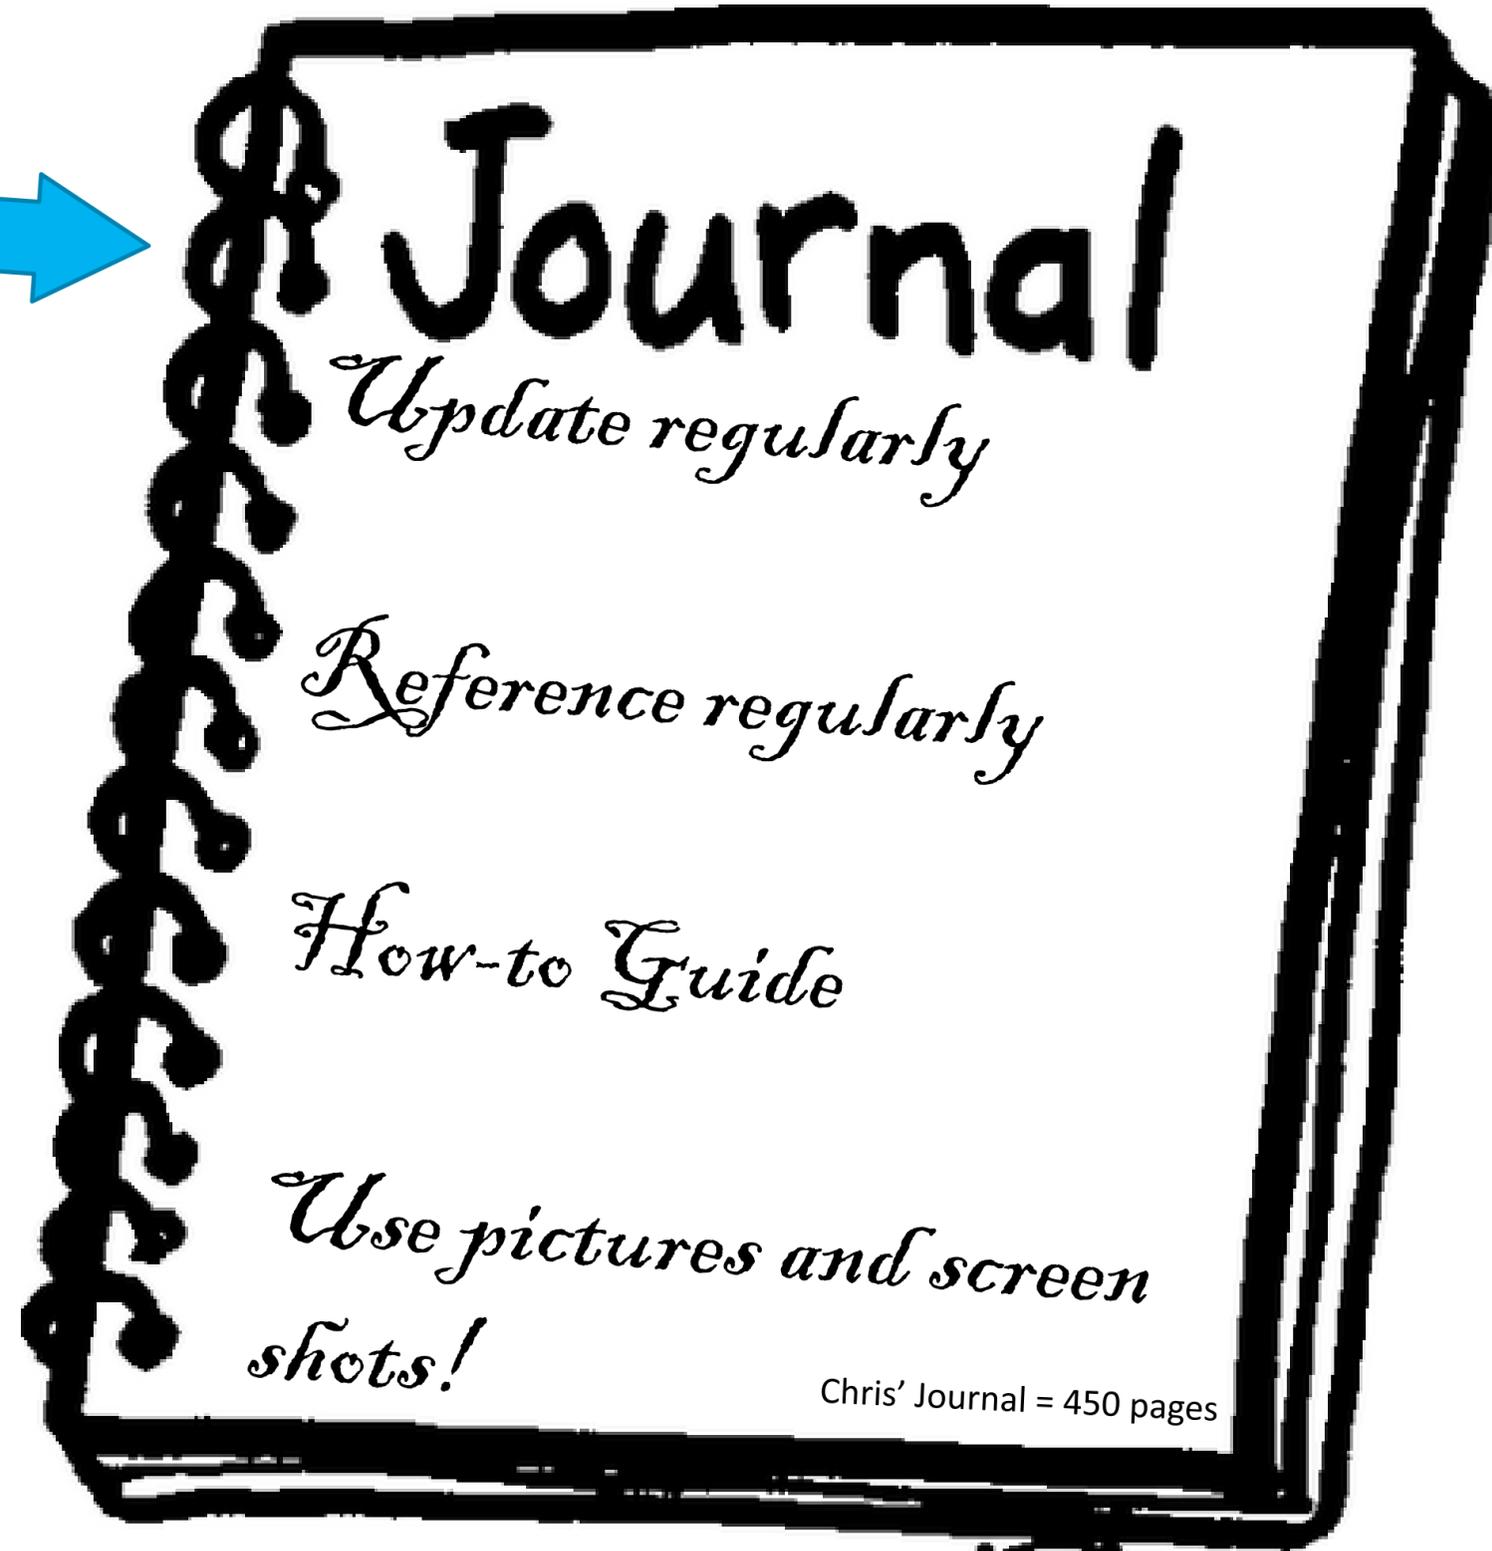

“I have no special talent. I am only passionately curious.”

“Those who know do. Those that understand, teach.” - Aristotle

Super Secret #7 – Journal + Documentation

Personalized
for me.

Extension of my
memory

Once in 3 years = the
number of times I've
done a SLIP SET

My Journal – Table of Contents

Super Secret #7 – Journal + Documentation

Focus on facts and improvements, not on blame

Writing the problem out will help you be methodical.

Learn from my mistakes!

1. Attitude
2. Set your expectations appropriately
3. What's your strategy for learning?
4. Get out of your comfort zone
5. Teamwork makes the dream work
6. Give back to others
7. Journal + documentation

Abraham Lincoln:

“A man's mind stretched to a new idea never returns to its original dimension.”

Forward we go....

Support each other!

Veterans, remember what it's like to be a newbie!

Newbies, due diligence first before asking veterans!

Introduction to the New Mainframe: z/OS Basics

Slack template

The image shows a Slack interface with a dark theme. On the left is a sidebar with a 'Starred' section containing a list of users: Joe User, Sally, Jimmy, and Mary. The 'Mary' entry is highlighted with a light blue bar. The main chat area has a dark background. At the top of the chat area, a date separator 'May 10th, 2021' is displayed in a white box with a small downward arrow. Below this, a message from 'Mary' is shown, starting with the timestamp '10:24 AM' and the text 'My file system is out of space. Can you please make it bigger?'.
