Master Skills University

September 22, 2020

AM Session: 9:30 am - 10:00 AM CST

PM Session: 3:30 pm - 4:00 PM CST

i2 for Insurance Fraud

Speaker: Alex Hurtado Global Threat Management Specialist

The IBM® i2 Security Intelligence Platform helps your organization turn overwhelming and disparate data into actionable insight and intelligence.

In this session, we will demonstrate current insurance specific market utilizations of the technology. From Claim Entity Resolution to OSINT comparison analysis, and discuss real scenarios to show how we can help prioritize your analyst efforts based on industry standard best practices.

Join Alex and hear about:

- **Identity Resolution.** Automatically match entities and suggests relationships using temporal & geospatial visualizations.
- **Find Connecting Networks.** Find suspicious networks and relationships across claims, policies, vehicles, third party sources based on a multitude of different types of analysis.
- **Visual Query.** Build and refine industry specific custom queries

IBM is committed to continuously helping you identify fraud & advanced sophisticated attacks more effectively and efficiently.
