

Cloud Training News

May 2022

Cloud Training the way you want it – FREE!

This Spring, IBM released a game-changing initiative – free cloud training for anyone, anywhere. Courses include all the role-based curricula offered through the **IBM Center for Cloud Training**.

Including Cloud Architect, Cloud Developer, and Cloud Site Reliability Engineer, as well as specializations in Security, Financial Services, Satellite, and DevSecOps. Each program digitally delivers lectures, study guides, and hands-on exercises that participants can easily fit into their busy schedules.

Security for a better Cloud – using DevSecOps

No longer is security a separate process at the end of the DevOps cycle. Now, it's merged into DevOps. And the **IBM Center for Cloud Training** provides the [DevSecOps training](#) you can use for your organization.

Trained cloud professionals will understand the convergence of development, security, and operations, how to deploy cloud-native apps faster and more securely, and how to leverage modern technologies to detect and respond to faults more efficiently.
