

# Get an early peek at the new IBM Data Replication on Cloud solution and share your thoughts!

IBM Data Replication Beta Program

## We want your feedback!

Register for the limited access IBM Data Replication Beta Program to influence the new product direction and stay updated on advancements.

The beta delivery will provide support for sourcing from Oracle database on AWS, Oracle database on Oracle Cloud and Db2 on IBM, Azure and AWS, while targets would include Db2 Warehouse on AWS/Azure, Kafka and Cloud Object Stores on the IBM, Amazon and Azure Cloud platforms.

Data Replication on Cloud will rapidly evolve to support captures from Oracle (on premises, Db2 z/OS, Db2 LUW, Db2 on IBM cloud, etc.), and targets such as Snowflake and Redshift on Amazon and Azure SQL Data Warehouse. Over time, additional sources and targets will be added based on client requirements to address on-premises to cloud and cloud to cloud requirements.

## Why join the program?

- **Get an early sneak peek** of product designs and roadmaps
- **Partner with our product teams** to have a say in product offering direction.
- **Shape the product's future** providing feedback, ideas and domain expertise.
- **Receive quarterly updates** on how your feedback is influencing product direction.

## Who should sign up?

- Current Db2 warehouse on Cloud clients,
- Current Data Replication users
- New customers with real time data replication use-cases involving on-premises to cloud and cloud to cloud requirements.

## What to expect

### October 2020

Program Participant Registration begins.

### Early October 2020

E-mail invitations start to be sent to selected participants.

### Late October 2020

Kickoff and introduction to new product starts. Opportunity to view a demo starts.

### Q1 2021

Open beta availability.

### Q2 2021

GA of IBM Data Replication on Cloud

### And as we move forward

Stay informed via quarterly updates.
