

The Offer*

To demonstrate the **value** in our products and better understand the end user requirements we are offering the following:

- A scan of up to **15,000** square meters of one of their sites
- Three months **hosting** and **support**
- Integration of up to 15 assets and 1 IoT data source
- Two client **workshops**

* Offer for **first 5 Applicants**

The Benefits

- **Gain** insight into how you can **enhance** the value and performance of Maximo within your business
- **Understand** the use cases relevant to your business in order to build the business case and see the **ROI**
- **Add** value to your Maximo investment through increased functionality
- **Increase** the efficiency of your assets through improved first time fix rates, improved decision making, streamlined workflow processes and by breaking down silos

By **integrating** a 3D Scan into Maximo, clients can see where assets are; how to **locate** them, **monitor**, **access** and **share** information

The integration allows **two-way** communication from the scan to Maximo and from Maximo to the Scan. This increases **workflow efficiencies** and overall effectiveness by managing **work order** schedules and **defect reporting** whilst on site, as well as from the desktop Maximo application.

It is now possible to share information between disciplines from a single source leading to **collaboration** and enhanced decision making. **Doing more with less.**
