CICS **INSIGHT** Series

Automate and Shift-Left Testing: IBM Virtual Test Platform with Galasa

Organizations are transforming their development processes and achieving better business outcomes by incorporating DevOps best practices like Test Automation and Shift-left Testing.

In this session, learn about how the IBM Virtual Test Platform with Galasa are powerful tools that will help your CICS application developers and testers to Shift-Left and Automate test of their hybrid CICS applications.

Wednesday, October 13th
11:00 AM – 1:00 PM Eastern Time

Target Audience:
CICS application developers, CICS systems programmers, architects/leads, and managers.

About the Series
Each event in the CICS Insight Series features a Subject Matter Expert who explores a topic and provides not only "what", but "how" to best address it. The sessions feature best practices, recommendations and demos that aim to leave audiences with a better understanding of the subjects.
