

Register for the Beta Program

Get an early look at IBM's new Data Privacy Extension for Cloud Pak for Data and share your thoughts

We want your input: Participate in the controlled-access beta and give your feedback to influence the development roadmap for IBM®'s new Data Privacy Extension for IBM Cloud Pak® for Data solution.

IBM is introducing advanced data masking capabilities for Cloud Pak for Data to quickly and easily protect sensitive data for use in data modeling, analytics, testing, and development.

Why join the beta program?

- **Get an early look** at product designs and roadmaps.
- **Partner with IBM's product teams** to have input into product offering direction.
- **Shape the product's future** by providing feedback, ideas and domain expertise.
- **Receive periodic updates** regarding how your feedback is influencing product direction.

Who should sign up?

If you're interested in data privacy and governance, we would value your participation. We think people in these roles will get the most value from participating in the beta program:

- Data Stewards
- Data Engineers
- Data Scientists
- Machine Learning Engineers
- Business Analysts
- Application Testers
- Application Developers
- and others interested

What to expect

September

Program Participant Registration begins.

Early October

E-mail invite sent to registered participants.

Mid-October

Kickoff and introduction to the beta. Beta environment access starts.

October-November

Collaborate with IBM via surveys, potential interviews, and within the beta environment.

November
